Avadhesh Patel

Sr. Software Developer

+(91) 8368797865
avadheshpatel47@gmail.com
Khora colony , sec-62, Noida UP, 201301.

I am a dedicated and results-driven Java developer with **3.9 years** of hands- on experience in software development. I have Strong Knowledge of Application Development using **JAVA, J2EE, JAVA 8, Spring Boot, Microservices, Hibernate, RESTful Web Services, SQL, MySQL, Cassandra DB, Multithreading, Kafka, mqtt, Docker, Jenkins, Kubernetes, CI/CD pipelines, Memory Leakage Testing (VisualVM), JOLT, SonarQube, Collections and Exception handling.**

I also have 1 year of experience in UI development using Angular, .NET Core and Node.Js,CSS and HTML.

EDUCATION

2017 – 2021 **B.Tech (ME),** JSS Academy of Technical Education Noida sec-62 (73%)
2014 – 2015 **XII,** U.P. Board VIC, Varanasi (81.5%)
2012 – 2013 **X,** U.P. Board VIC, Varanasi (82%)

CERTIFICAT

Certificate: Java Full-Stack Developer course from Qspider & Jspider institute Hyderabad.

EXPERIENCE

Dec 2022-Present **Sr. Software Developer,** Inventia Technology Consultants pvt ltd Noida U.P. India

Project: HES (Head-End System) IoT Energy Management Solution.

Description: HES projects can communicate with smart meters to manage and monitor energy consumption and optimize grid operations. This dynamic project can be used for electric, gas, and water meters.

Responsibilities:

- Developed and maintained **backend services for smart meter communication**, handling high-volume data processing efficiently.
- Designed and implemented **RESTful APIs and microservices** using **Spring Boot , Cassandra and presto.**
- Conducted code **reviews**, **mentored junior developers**, and ensured adherence to coding standards.
- Performed **performance tuning** and **memory leak analysis** using VisualVM.
- Led **CI/CD** pipeline integration with **Docker**, **Jenkins**, and **Kubernetes** for smooth deployment.
- Collaborated with cross-functional teams to deliver **scalable** solutions.

May 2022-Nov 2022

Software Developer, Scoreme Solutions Pvt LtdGurgaon Haryana India

Project: PDF_To_JSON

Description: This project is a banking software. this is useful for convert the PDF into TXT and JSON format.

Responsibilities:

- Developed modules for **PDF to TXT/JSON conversion** and data validation using Java and Spring Boot.
- Wrote Hibernate mappings and DAO layer for database interactions.
- Designed Controller and Service layers, ensuring modular and maintainable architecture.
- Implemented **exception handling and logging mechanisms** using Log4j and ELK Stack, enhancing debugging and system monitoring.
- Collaborated with QA teams to ensure data accuracy and process reliability.

Projects / Achievements

- **HES Project**: Optimized backend APIs to handle **high traffic request**, reduced latency by **45%**.
- **PDF_To_JSON Project**: Implemented multi-threaded parsing, improving **data conversion speed by 40%**.
- Contributed to **Kafka-based messaging system** for real-time smart

SKILS

Programming Languages: Java, J2EE, C#, Typescript

Frameworks: Spring Boot, .NET Core, MVC

Databases: SQL Server, MySQL, Cassandra, MongoDB

Development Tools: Visual Studio, Visual Studio Code, Eclipse, STS

Systems: Windows, Linux (Ubuntu)

DevOps tools: Docker, Jenkins, Kubernetes, CI/CD pipelines

Others: Data Structures, REST APIs, Hibernate, Microservices, Multithreading, JOLT, SonarQube, Kafka, mqtt, Cron, Memory Leakage Testing(VisualVM), Postman, ELK Stack (Elasticsearch, Logstash, Kibana) ,SVN, GitHub.
