JEFFONIA AROCKIARAJ

+91 8778757957 ajeffonia01@gmail.com

SUMMARY

- 2 years of hands-on experience in **manual and automation testing** for **web and mobile applications**.
- Proficient in automation tools: **Appium**, **Selenium (Python)**, **WebdriverIO**, and **Jasmine**.
- Strong manual testing skills including **test case design**, **execution**, **defect tracking**, and **edge case identification**.
- Solid understanding of **API testing** and **database validation** using **Postman**, **Swagger**, and **SQL**.
- Experienced in various testing types: **Functional**, **Regression**, **Integration**, **UAT**, **Sanity**, and **System Testing**, with a strong focus on **Sanity Testing**.
- Skilled in preparing detailed **test plans**, **test cases**, **test scenarios**, and comprehensive **documentation**.
- Conducted end-to-end testing for applications in **Salesforce CRM** and **Full Stack environments**.
- Collaborated effectively with **developers**, **business analysts**, and **project managers** to ensure quality deliverables.
- Contributed to final testing phases and client approvals, ensuring successful project delivery.
- Additional experience in **business development** and **client engagement**, supporting organizational growth.

SKILLS

- **Automation Testing Tools:**
  Selenium WebDriver (Python), Appium, WebdriverIO, Jasmine, Mocha, Chai, Android Studio
- **Programming & Scripting Languages:**
  Python, JavaScript, TypeScript
- **Testing Types & Methodologies:**
  Automation Testing, Manual Testing (Test case creation, defect tracking, UAT facilitation), API Testing, Cybersecurity Testing (ADB)
- **CI/CD Tools:**
  GitHub
- **Browsers & Platforms:**
  Chrome, Mozilla Firefox, Internet Explorer, Windows Safari
- **Soft Skills:**
  Communication, Collaboration, Problem Solving, Negotiation

WORK EXPERIENCE

Texve System Private Limited | May 2023 - June2024
Junior Associate | Chennai, India

Project 1: Al Ishan
***Domain:* Salesforce**

- Performed manual testing including UAT, integration, sanity, regression, and cross-browser testing on Salesforce CRM and web/mobile applications.
- Tested Salesforce-specific features, validated data integrity, and ensured UI/UX consistency across browsers and devices.
- Used JIRA for defect tracking, test case management, and progress monitoring. *Team Size:* 7

Project 2: C4D System

Domain: **Full Stack (Mobile Application)**

- Conducted manual testing of customer and driver apps covering OTP-based registration, real-time trip management, payments, KYC, and admin panel functions.
- Verified OTP processes, real-time tracking, and seamless interaction across Android and iOS devices.
- Managed defect reporting and tracking via JIRA to ensure smooth functionality and compatibility.

Plenome Technologies – Software QA Engineer,IITM Research Park, Chennai
Oct 2024 – Present

Project 3: Securely Monitoring Ophub and PHR
Domain: Healthcare – Tablet and Mobile Applications

- Conducted functional and regression testing for healthcare applications focused on secure Personal Health Record (PHR) management, aligned with the Ayushman Bharat Digital Mission (ABDM).
- Verified core healthcare features such as health record management, appointment scheduling, and comprehensive clinical workflows including:
    - Vitals entry
    - Vibra sense device integration ○ Prescription management ○ Case sheet documentation
- Validated ABHA (Ayushman Bharat Health Account) creation and linking, ensuring seamless ABDM interoperability.
- Executed testing across tablet and mobile platforms, ensuring application performance, data accuracy, and user interface consistency.
- Worked closely with developers, healthcare domain experts, and product managers to identify issues, log defects, and track resolution.

Project 4: Securely Monitoring HMS (Hospital Management System)
Domain: Healthcare – Web Application

- Managed and tested hospital operations including **patient registration**, **appointment scheduling**, **billing**, and **discharge** via a unified web platform.
- Validated seamless **Personal Health Record (PHR)** integration by enabling hospital records (lab results, prescriptions, discharge summaries) to be uploaded directly to patients' **ABHA-linked health accounts**.
- Ensured **streamlined access** for hospital staff and patients to view and manage health records and hospital services through an intuitive web interface.

Roles and Responsibilities

Automation Test Engineer:

- Develop, maintain, and enhance **automated test scripts** for web applications using **Selenium WebDriver with Python.**
- Automate tests for mobile applications using **Appium** and **WebdriverIO**.

- Perform cross-browser testing to ensure compatibility across multiple browsers and devices.
- Collaborate with stakeholders to define testing strategies and create detailed test plans for new features.

Manual Testing:

- Execute comprehensive **manual test cases to identify defects, usability issues, and inconsistencies, ensuring software meets business requirements and user expectations**.
- Log defects using **GitHub and JIRA**, and coordinate with developers to facilitate timely resolution.
- Facilitate **User Acceptance Testing (UAT)** to validate that the application aligns with business needs and end-user expectations.

EDUCATION

Bachelor of Engineering | Computer Science Engineering

Kingston Engineering College | Anna University

Tamil Nadu, India| June 2023

CERTIFICATIONS

- Certified in **Full Stack Python** from Green's Technology
- Completed internship at **IIT Madras** related to **Python and Machine Learning**
- Completed **Python** related project at Global Techno Solution
- Certification in **Core Java** from Internshala
- Completed project at **IBM**

DECLARATION

I hereby confirm and declare that the information given above is true to the best of my knowledge and belief.
