# Akshat Jain

Ghatkopar, Mumbai 400075, India | akshatbjain.aj@gmail.com | +91 9425919685 | LinkedIn
Personal Details:
Indore

## Profile

Dynamic Software Engineer with 3+ years of experience, driving impactful solutions in full-stack development and data analytics. Expertise in crafting scalable applications and intuitive user interfaces, utilising a suite of technologies including JavaScript, React, and Python. Proven ability to enhance performance metrics through innovative architecture and real-time analytics, enabling significant improvements in operational efficiency. Adept at collaborating with cross-functional teams to deliver user-centric products that meet diverse market needs. Passionate about leveraging technology to transform complex data into actionable insights while supporting global usability.

## Professional Experience

### Software Engineer, Infinite Analytics, Mumbai

Aug 2023 to Present

- Led the development of a scalable BI platform (PowerBI-like) used for multi-platform campaign monitoring, enabling **better visualization & 40% faster performance analysis** through data-driven dashboards.
- Architected a flexible chart-creation framework integrating Plotly, ApexCharts, Deck.gl letting user visualize and analyze any data they want.
- Built a resizable, Bento-style analytics dashboard to create custom insights with **zero engineering involvement**.
- Designed a **SQL query-builder** that accelerated chart creation and **supported geospatial + marketing datasets**.
- Implemented Redis caching and RabbitMQ queueing, cutting dashboard load times by **35%** and improving data pipeline reliability.
- Integrated **New Relic** for performance monitoring and **Google Analytics** for usage tracking, improving observability and guiding product decisions.
- Implemented geospatial analytics dashboards using **Kepler.gl / deck.gl**; optimized query + delivery layer with **Trino**, **Redis caching**, **data compression**, and **SSE streaming**, improving report performance **20x** (5 min → 15 sec).
- Delivered multilingual support for **16 languages**, expanding platform usability across global teams.
- Built a campaign performance optimization dashboard using advanced analytics to **speed up marketing decision-making**, and am currently developing a segment-level spend recommendation engine using Random Forest, MinMaxScaler, and TensorFlow/Keras-based RNN models.

### Founder & Full-Stack Developer, Finemate, Indore

May 2022 to Jul 2023

- Designed, built, and deployed a full-stack **learning platform** aimed at improving **long-term memory** through **spaced repetition, social learning, and gamified engagement**.
- Developed a React-based frontend and Flask backend, delivering a responsive, SEO-optimized web app with an intuitive user experience.
- Implemented Single-sign on(SSO) to support login using Google, Meta and Linkedin.
- Created a **flashcard system and social-media-style interface** supporting interactive learning, collaboration, messenger features, graphical to-do lists, and community engagement.
- Built a custom content-creation platform using H5P and WYSIWYG tools to support infotainment posts and question-based learning modules.
- Managed end-to-end UX/UI design, content writing, and product strategy—including research in **cognitive science** to guide feature development.
- Implemented scalable backend services using MongoDB, MongoEngine, REST APIs, AWS deployment pipelines, and modern UI libraries like Material UI and Bootstrap.

### Software Engineering Intern, SI Online, Ratlām

Jan 2022 to Apr 2022

- Developed and maintained applications using MERN stack, contributing to core modules such as **IRCTC Agent Registration**, **AEPS**, and **Video Tutorials**.
- Built backend APIs to enable fast, reliable querying of analytical data for IRCTC agents, improving data accessibility and operational efficiency.
- Collaborated on feature enhancements and module optimizations, ensuring secure, scalable, and high-performance backend workflows.

## Education

### Shri Vaishnav Institute of Science and Technology, Indore

Bachelors in Information Technology, Jul 2018 to Jun 2022

### Patidar Higher Secondary School, Dhar

12th

### St. George Higher Secondary School, Dhar

10th

## Technical Proficiencies

| | |
|---|---|
| **Languages:** | JavaScript, TypeScript, Python |
| **Frontend:** | React.js, Next.js, Redux, Redux-thunk, TanStack, BootStrap, Tailwind, Material UI, Radix, Plotly.js, Apexchart.js, Chart.js, D3, Kepler, React-hook-form, Streamlit, HTML5, CSS3 |
| **Backend:** | Node.js, Express.js, Nest.js, Flask, FastAPI, MongoEngine, SQLAlchemy, |
| **Database:** | MySQL, PostgreSQL, MongoDB, Firebase, Redis, RabbitMQ, Elasticsearch, Cassendra |
| **Other tools and technologies:** | Docker, Selenium, Beautiful Soup, AWS, IAM, Lambda, VPC, EC2, S3, Route53, Nginx, Pandas, Numpy, Matplotlib, Scikit-learn, Figma, Git, Wordpress, Websocket, WebRTC, Splunk, Superset, Trino, Auth0, DataDog, N8N, MCP |
| **Learning:** | Pinecone, Neo4j, RAG, CAG, LangChain, LangGraph, LlamaIndex, Airflow, React Native |

## Professional Training

### Artificial Intelligence & Machine Learning using Python, Ardent Computech
