TECHNICAL SKILLS

- Manual Testing
- Requirement Analysis
- Test case design execution
- Functional Testing
- Regression Testing
- UAT
- Smoke/Sanity Testing
- Exploratory Testing
- SDLC
- STLC
- Agile methodologies/Scrum
- AI/ML Testing
- SQL(Basics)
- JIRA
- Linear
- iOS/Android testing
- Mobile app testing
- Postman
- Excel
- Git
- Bug tracking
- API testing
- Cypress (Basics Knowledge)
- Playwright (Basics Knowledge)
- Javascript (Basics Knowledge)
- Test automation framework design knowledge

PERSONAL SUMMARY

Software Test Engineer with over 3.5 years of experience in manual and automation testing at IndiaMart. Proficient in validating applications across Banking, FinTech, SaaS, B2B, E-commerce, and Online Payments sectors. Expertise in JIRA for effective bug tracking and a strong advocate for Agile methodologies, contributing to high-quality deliverables and team collaboration.

PROFESSIONAL EXPERIENCE

September 2024 - Current

Software Test Engineer QAoncloud | Chennai, India

- Project Overview: Worked on Tomato.AI, a US-based BPO accent-softening SaaS product used by customer support agents to improve communication clarity.
- Performed manual testing and automation testing on the web-based and PC app platform, ensuring proper functionality across different modules, like audio feedback, user onboarding, and training sessions.
- Validated AI-generated voice feedback, checking correctness, responsiveness, and alignment with expected pronunciation standards.
- Logged and tracked bugs using GitHub, and collaborated with developers and product teams for timely resolutions.
- Participated in Agile Scrum, including sprint planning, stand-ups, and interacted with US-based stakeholders.
- Designed and implemented automation scripts for smoke test case and test frameworks for the Tomato.AI web application using Playwright.
- Created and maintained Page Object Model (POM), and reusable utilities to improve test efficiency and reduce redundancy.
- Participated in client meetings and requirement discussions, ensuring clear communication of testing updates, blockers, and timelines.
- Collaborated closely with US-based product managers, developers, and QA leads to clarify requirements and prioritize bug fixes.
- Conducted cross-browser and cross-platform testing to ensure compatibility across Chrome, Firefox, and Edge browsers on Windows and macOS.
- Provided test effort estimation during sprint planning and contributed to defining acceptance criteria for user stories.
- Prepared test strategy, test cases, and traceability matrices, aligning with business and technical requirements.
- Mentored new QA team members in Cypress test automation best practices and Agile processes.

- Postman

Proficient (C2)

June 2022 - September 2024
Software Test Engineer IndiaMart | Noida, India

- Project Overview: The project focused on enhancing and maintaining IndiaMart's internal B2B payments module, which enabled buyers and suppliers to perform secure online transactions through multiple payment gateways and net banking systems.
- Performed manual testing and automation testing for payment modules, invoice generation, payment confirmation, and refunds.
- Validated UPI, credit/debit card, and net banking integrations through third-party gateways.
- Conducted end-to-end testing of the transaction lifecycle, including status updates, error handling, and ledger entry validations.
- Raised and verified defects in Jira related to payment failures and gateway timeouts, reducing bugs in production.
- Collaborated with multiple teams, including developers, product managers, and others.

EDUCATION

May 2020
Bachelor of Technology | Mechanical Engineering
Vel Tech Dr. RR & Dr.SR Institute of Technology, Chennai, TamilNadu,India
GPA: 7.0 CGPA

PROJECTS

Tomato.Ai: A smart AI-powered rewards and lifestyle platform offering curated deals and personalized experiences across travel Uses AI to analyze speech patterns and provide real-time pronunciation feedback for accent neutralization, offers a web-based SaaS platform with modules for agent onboarding and voice training. My contribution in this project are,

- Designed and executed test cases for AI-powered voice training and pronunciation feedback modules.
- Performed end-to-end functional, UI, and regression and automation testing of the SaaS platform modules including agent onboarding, voice training, and performance analytics.

IndiaMart: B2B payments net banking integration, the project focused on enhancing and maintaining IndiaMart's internal B2B payments module that enabled buyers and suppliers to perform secure online transactions through multiple payment gateways and net banking systems. My contribution in this project are,

- Validated payment workflows involving multiple gateways and net banking APIs to ensure secure and smooth transactions.
- Performed integration testing for payment APIs, verifying encryption, data accuracy, and error handling.
