PROFESSIONAL SUMMARY

Detail-oriented and proactive Associate Quality Analyst with 1+ year of experience in both **manual and automation testing**, currently specializing in **Data Science QA**. Skilled in validating complex data pipelines and model-driven applications. Proficient in **API testing** using **Postman**, and experienced with **Playwright** and **Pytest** for automation scripting in **Python**. Knowledgeable in **performance testing** using **JMeter**, and experienced with **SQL databases** such as **PostgreSQL** and **MySQL** for backend validation. Adept in using **Jira** for task tracking, **Bitbucket** for version control, and **Jenkins** for CI/CD automation. Strong analytical mindset with a focus on test coverage, defect tracking, and high-quality delivery in Agile environments.

PROFESSIONAL EXPERIENCE:

Associate Quality Analyst

Digit Insurance - Hyderabad| May 2024 – Present

- Executed **1000+ test cases** covering functional and non-functional aspects of diverse **RESTful APIs**, ensuring robust system validation and service reliability.
- Managed and executed detailed test cases using **Tuskr**, tracking execution results and improving test planning and reusability across projects.
- Implemented **database testing of APIs** using **Playwright**, incorporating **SQL validations** for backend consistency across complex data pipelines.
- Utilized **Pytest** in **Python** to design and assert automated test scenarios, enhancing scalability and code maintainability.
- Automated high-volume workflows using Playwright, enabling **parallel execution of 10,000+ records**, reducing regression time by over 60%.
- Collaborated with **AI (NLP, CV)**, **ROBOT**, and **Machine Learning** teams to identify **critical bugs**, driving a **productivity increase from 46% to 75%**.
- Conducted **performance testing** using **Apache JMeter** to simulate load conditions and uncover backend bottlenecks.
- Built and maintained **CI pipelines in Local Jenkins environment**, integrating test suites to support continuous testing
- Integrated **Microsoft Teams** with Jenkins to send **webhook alerts and test execution results**, improving team visibility and coordination.
- Logged and tracked defects in **JIRA**, ensuring traceability and effective communication of bugs and test outcomes.
- Pushed automation code to **Bitbucket** and integrated it with Jenkins, enabling continuous test execution and version control.
- Participated in **Agile ceremonies** and cross-functional discussions, ensuring alignment between QA efforts and product objectives.

Technical Skills:

Testing Tools: Playwright, Pytest, Postman, Apache JMeter, Tuskr, JIRA, TOSCA AUTOMATION

Scripting Languages: Python , Java

Database Technologies: PostgreSQL, MySQL

Version Control: Bit bucket

CI/CD Tools: Jenkins, GIT

Test Management & Defect Tracking: Tuskr (test case management), JIRA (bug tracking & reporting)

Agile Methodologies: Scrum, Sprint planning, Daily stand-ups

PROJECTS:

Project 1: Automation Testing Framework Using Playwright

Technologies: Python, Playwright

Responsibilities:

- Developed a robust **automation framework** using **Playwright with Python** to automate functional test cases across backend services.
- Implemented **parallel execution**, enabling the automated handling of **10,000+ test scenarios**, significantly reducing execution time.
- Generated detailed **HTML reports** to provide visibility into test execution and facilitate faster issue resolution.
- Built a scalable, modular architecture to support multi-environment testing and code reusability.
- **Reduced manual QA effort by 70%**, streamlining the regression cycle and boosting team efficiency.

Project 2: Pytest Framework with Jenkins Integration for WhatsApp Chatbot Engine

Technologies: Python, Pytest, Git, Bitbucket, Jenkins, Microsoft Teams

Responsibilities:

- Designed and implemented a **Pytest automation framework** to validate flows for the **WhatsApp Chatbot Engine and Aadhar Masking and Classification services**.
- Asserted end-to-end test scenarios and pushed automation scripts to **Bitbucket** using **Git** for version control.
- Integrated the test suite into a **local Jenkins CI pipeline** for continuous execution and faster release validation.
- Connected Jenkins with **Microsoft Teams** using **webhooks**, enabling real-time alerts and job summaries post-execution.

Project 3: Performance Testing for Machine Learning, CV and NLP Services

Technologies: Apache JMeter

Responsibilities:

- Conducted **performance testing** on key ML, AI (CV and NLP) based services to assess system behavior under various user load scenarios. Contributed to identifying critical performance bottlenecks.
- Identified system thresholds and **stress points** through carefully designed **load and stress testing** with **JMeter**.
- Analyzed and visualized results using **graphical reports and HTML summaries**, enabling stakeholders to evaluate service scalability and resource utilization.

EDUCATION

Bachelor of Technology (COMPUTER SCIENCE AND ENGINEERING) 2024

Andhra University College of Engineering *8.59 CGPA*

DECLARATION:

I hereby declare that the above information is true to the best of my knowledge and belief and request to give me an opportunity to serve in your esteemed organization.

Pravalika Guntuku
