SHUBHAM AGARWAL

Senior Solution Engineer |Senior Technical Implementation Engineer | Technical Account Manager

shubhamagarawal10@gmail.com |+91 7411856216 |Bengaluru KAR |linkedin.com/in/-agarwal-shubham/

Professional Summary:

Tech-savvy **Implementation Engineer** with 4+ years of experience solving complex implementation challenges across SaaS, enterprise platforms, analysing & visualisation of data, and AI-enhanced ecosystems. Adept at bridging business needs with technical solutions, I specialize in API integration, data analytics, AI-driven enablement, and scalable cloud deployments.

I bring a **customer-first** mindset to every project, having delivered **impactful** onboarding, product customizations, and AI-powered enhancements across multi-device platforms. Known for debugging complex issues, driving cross-functional collaboration, and improving product adoption through strategic solutioning. I believe great **solutions** are built **not** just by writing **code**, but by understanding business goals, anticipating user needs, and crafting experiences that drive adoption and retention.

I thrive at the **intersection** of **technology** and **business**, bridging the gap between technical complexities and practical applications. Whether it's leading Proof of Concepts, streamlining technical workflows, or closing product gaps through customer feedback, I act as a trusted collaborator and partner to Product, Engineering, and Customer Success teams—driving collaboration and alignment across functions.

Professional Experience:

- ***Senior Solutions Engineer - Whatfix (July 2024 – Present | Bangalore, Karnataka, India):***
  - Led technical implementations for global enterprise clients & Fortune 500 Clients across domains like BFSI, HCM, CRM/CLM & Custom. ensuring Whatfix integrates seamlessly with complex front-end architectures (web/mobile), Managing ~2.8M ARR.
  - Solved implementation and integration issues using deep knowledge of HTML, JavaScript, CSS, DOM manipulation and RET APIs.

- Designed and delivered customized onboarding frameworks with value-based outcomes, resulting in ~75% increased user engagement & feature adoption, with reduced onboarding time by 25%.
- Partnered with product & engineering teams to address platform bugs, drive product improvements, and test emerging features (mobile + web).
- Facilitated AI-driven Product analytics integration, enhancing customer insights and usage patterns for continuous optimization.
- Utilized SaaS analytics tools to drive value realization strategies & influence customer KPIs.
- Developed deep product expertise to serve as SME for two flagship Whatfix products, driving hands-on implementation, successful deployments and internal enablement, enabling cross-functional support and strategic implementations.

- ***Solutions Engineer - Whatfix (March2022 – June2024 \| Bangalore, Karnataka, India):***
  - Delivery Implementation of Whatfix across client's web & mobile platforms, ensuring seamless deployment and user adoption, Managing approximately 1.5M ARR.
  - Integrated third-party platforms API such as Salesforce, SuccessFactors, and Workday using OAuth 2.0 authentication flows to enable dynamic content rendering and personalized onboarding experiences.
  - Resolved technical problems via debugging, log analysis, and client communication.
  - Developed custom implementations using HTML, CSS, JavaScript, and dynamic DOM manipulation to meet unique client requirements.

- ***Software Engineer – L & T (Sept2021 – March2022 \| Bangalore, Karnataka, India):***
  - Performed automation and manual testing for Intel.

- ***Software Engineer Intern - Compegence (Apr2021–Sept 2021\|Bangalore, Karnataka, India):***
  - Developed an R&D data management & analytics solution for an agricultural machinery industry.
  - Utilizing ETL (Extract, Transform, Load) methodology & visualizing data through the Forewarm Application.
  - Utilized Postgres Database to efficiently extract and transform data, while automating the extraction and transformation process using Shell Scripting language.

Technical Skills:

- **Analytics & AI:** Data Analysis, Machine Learning , Generative AI Concepts
- **Programming & Web:** JavaScript, HTML, CSS, Node.js, Python
- **Backend & APIs:** REST APIs, Postgres, MySQL, MongoDB
- **Dev & Deployment:** SaaS Product Integrations, Mobile Deployments, Browser Extensions
- **Automation & Scripting:** Shell Scripting, ETL Processes
- **Other**: DOM Manipulation, Debugging, Technical Documentation
- **Soft Skills:** Problem-solving, Cross-functional collaboration, Technical consulting, Presentation skills.

Education:

- **Executive Diploma in Machine Learning and Generative AI** – Pursuing
  International Institute of Information Technology Bangalore (IIIT-Bangalore)
- **Bachelor of Technology in Computer Science and Engineering (CSE)**
  Ramaiah University of Applied Sciences Bangalore, August 2017 – July 2021, Grade: 9.0 (CGPA)

Awards:

- **Innovation Award** - Whatfix for H2'2023 and for Innovative ideas and implementation on Mobile DAP
- **Spot Award** - Whatfix in July 2023 & Dec 2024 for outstanding performance and exceptional contributions to various Mobile Project and Task.
- **Spot Award** - Compegence in May 2021, July 2021 & August 2021 for outstanding performance and exceptional contributions towards Implementing and testing ETL (Extract, Transform, Load) Process, automating the data extraction and data transformation process.
