Sex: Male | **Date of Birth:** 13-10-1996 | **Nationality:** Indian

PROFILE SUMMARY

- Results-driven Implementation Engineer with 3 + years of industry experience in Implementation Engineering and Technical Consultation
- Expertise in Customer Success Operations, Data Privacy, Data Discovery, and Data Analysis
- Strong Project Management and Project Delivery skills
- Proficient in collaborating with cross-functional teams and identifying client needs
- Track record of delivering high-quality solutions on time
- Ability to adapt to new technologies and excel in challenging environments
- Focused on driving client satisfaction and operational excellence

PROFESSIONAL EXPERIENCE

DEC 2024 – Present | **IMPLEMENTATION ENGINEER | MOTADATA**

Product: - ServiceOps, AIOPs
Industries Domains: AIOPs, IT Operations Management, IT Service Management

- Acted as a strategic technical liaison between client stakeholders and internal teams, translating business needs into actionable technical specifications.
- Spearhead end-to-end deployment, configuration, and integration of Motadata ITSM, ITAM, AIOps, and Monitoring Solutions for enterprise clients across diverse industry verticals.
- Acted as a trusted advisor by addressing technical queries, resolving integration issues, and guiding clients through best practices in **compliance implementation** and platform configuration
- Perform continuous evaluations to identify opportunities for enhancing privacy practices and optimizing the use of OneTrust solutions. Keep solutions up-to-date with evolving regulations.
- Create and maintain detailed documentation on system configurations and usage. Generate reports and dashboards to provide insights into compliance status.
- Conduct Comprehensive requirements gathering workshops and translate needs into tailored system configurations ensuring with ITIL best practices.
- Design and execute solution architecture, prepare implementation plans and manage projects timelines to ensure smooth and timely project delivery.
- Perform system installations, module configurations and configurations, including workflow automation, SLA setup, asset discovery, and service catalog design.
- Integrate Motadata products with third-party systems such as Active-Directory, EMail Servers,SSL Certificates and Network Devices.
- Develop and deliver user training sessions, administrator handover, and post-implementation knowledge transfer to empower customer team.
- Provide pro-active technical support during “System Acceptance Testing (SAT)” and “User Acceptance Test(UAT)” phases to ensure sign-off and go-live readiness.
- Troubleshoot implementation challenges, escalate product gaps by raising tickets to the development team, and validate fixes through rigorous testing.
- Collaborate closely with project managers and cross-functional teams to monitor progress, manage risk, and maintain high customer satisfaction-levels.
- Create and maintain accurate implementation documentation, solution manuals, and project closure reports for internal and client reference.
- Adhere to ISO standards, Security guideline, and compliance policies during solutions deployment and data handling.

JAN 2022 – Nov 2024	**Implementation Engineer | UNIPHORE SOFTWARE SYSTEMS**
Technology: - Conversational AI technology Company Products: - U-analyze, U-assist, U-self serve	• Served as the **primary point of contact** for customers during implementation projects, ensuring timely delivery and client satisfaction. • **Led cross-functional implementation teams**, providing technical guidance, mentoring, and resolving critical issues across project lifecycles. • Oversaw **UAT and production environment setup**, including infrastructure sizing and configuration tailored to customer needs. • Managed **cloud infrastructure** for on-cloud deployments, including monitoring, cost optimization, disaster recovery, and performance tuning. • **Troubleshot and resolved complex technical issues** related to deployments and cloud infrastructure, improving system reliability and uptime. • Collaborated with software engineering teams to support seamless **cloud-based application deployment** and upgrades. • Designed and implemented **comprehensive backup and disaster recovery strategies**, ensuring business continuity and compliance. • Maintained clear and proactive communication with **Project Managers and Technical Project Managers** through regular updates and reporting. • Ensured smooth **handoff to Customer Support teams** post-implementation, with complete documentation and knowledge transfer. • Developed and maintained **detailed technical documentation** for custom deployments in line with industry standards. • Set up **monitoring and alerting systems** for deployed applications to support real-time performance tracking and incident response. • Kept current with **emerging cloud technologies and best practices**, proposing and implementing innovations to enhance system performance and scalability. • Acted as a trusted technical advisor by **translating complex technical concepts** for non-technical stakeholders and addressing evolving client requirements.

NOTEWORTHY ACHIVEMENTS	
	• Spot Performer of Team for Deployments and Customer Success in March 2024. • Performer of the Quarter in Dec 2023 for successful and On-time delivery of project. • Voted Best Performer twice by Team in FY 2022-23. • Voted Best Team Player of the Quarter by Manager in FY 2022-23.
EDUCATION	
	Bachelor of Engineering | Information Technology | Gujarat Technological University- Visnagar, Gujarat
CERTIFICATION	
AWS	AWS Certified Solutions Architect - Associate

LANGUAGE SKILLS	
Mother Tongue	Hindi, Gujarati, Rajasthani
TECHNICAL SKILLS	

Tools:	Kafka & Zookeeper, Redis, Tableau	
Monitoring Tool:	HA Proxy, Grafana, Datadog AWS, Azure,	
Clouds:	Openshift, AWS	
Management Tools:	JIRA, Confluence, Maven Link, Zendesk, ServiceOps,AIOps	
Database:	Postgres, MySQL	
No SQL:	Mongo DB	
Call Logger:	Ameyo, OrecX	
Deployment Tool:	Ansible, Docker-swarm	
Container:	Orchestration Docker, Docker swarm, Kubernetes	
Version:	Control Git	
Operating System:	Linux and Windows	
Scripting:	JavaScript, API	
AREA OF EXPERTISE		
	Implementation | Client Engagements | Production Support| SQL | Linux | Docker | Configuration | Project management | Technical Consultation | Customer Success Operations| Data Discovery | Data Analysis | Project Delivery | Cross-functional Collaboration | Client Needs Assessment | Solution Design | System Integration | Software Configuration | Troubleshooting | Technical Support | Client Satisfaction | Operational Excellence | Process Improvement | Change Management | Adaptability
