Profile

I love turning technology into customer success stories!
With close to 7 years in tech, I've worked across support, consulting, implementation, and enablement—helping businesses adopt the right tools and use them well. I focus on solving real problems, building trust, and delivering outcomes that delight users and drive long-term value.

Experience

OCTOBER 2024 – PRESENT

Implementation Engineer / FYB Pty Ltd. (a Banyan Software portfolio company), Victoria, Australia – Remote, India

- Delivered end-to-end implementations of enterprise content management (ECM) and records management systems (OpenText Content Manager, EzeScan, Archive360) for government and enterprise clients across Australasia.
- Integrated FYB's proprietary solutions into client environments, aligning with existing infrastructure, compliance needs, and operational workflows.
- Managed secure data migrations, ensuring accuracy, minimal downtime, and regulatory compliance.
- Collaborated with client ICT teams and internal project stakeholders to design, deploy, and validate solutions that met both technical and business requirements.
- Provided technical support, troubleshooting, and issue resolution through deployment and hypercare phases.
- Created training materials, technical documentation, and handover guides to enable smooth client adoption and long-term success.

DECEMBER 2023 – FEBRUARY 2024

Senior Solutions Engineer / SuperOps, Chennai, India

Note: Stepped away briefly for health reasons — now fully recovered and ready to take on new challenges.

- Delivered technical solutions and onboarding support for Managed Service Providers (MSPs) using SuperOps' PSA and RMM platform.
- Scoped and tailored implementations with the sales team to align platform capabilities with client requirements.
- Handled real-time support through live chat, resolving client issues quickly while capturing product feedback for the engineering team.
- Advised MSP clients on operational best practices, driving adoption and improved service efficiency.
- Acted as the liaison between clients and product teams, translating user needs into actionable product enhancements.

OCTOBER 2022 – APRIL 2023

Technical Account Manager & Solutions Engineer / Lummo, Chennai, India

Note: Lummo was shut down due to macroeconomic challenges, and all employees were laid off.

- Designed and implemented onboarding, training, and customer success workflows for Donut.cx, Lummo's WhatsApp-first engagement platform, supporting its launch from idea to production (I2P).
- Led product demos and onboarding for SMB clients, ensuring smooth implementation and quick adoption.

- Served as the primary contact for technical support and account management, resolving client issues and maintaining a 95% retention rate.
- Solved client-specific technical and business issues by analyzing root causes and delivering tailored solutions that improved platform adoption and usability.
- Managed client contracts, negotiations, and renewals, ensuring seamless handovers and long-term relationships.
- Achieved a Net Promoter Score (NPS) of 90+ through responsive support and proactive engagement.
- Partnered with product and design teams to translate client feedback into product improvements and feature updates.

DECEMBER 2017 – OCTOBER 2022

Technical Support Engineer / CGI, Chennai, India

- Managed a multi-terabyte Microsoft SQL data warehouse, executing ETL processes and production tasks to maintain 99% data accuracy.
- Improved database query performance by 30% through retention management, performance tuning, and optimized purging processes.
- Delivered Level 2 technical support, resolving data quality and application issues within an average of 48 hours.
- Ensured 99% on-time delivery of daily reports and outbound files to enterprise clients.
- Led migrations and upgrades of Microsoft applications and servers (SharePoint, SQL) with minimal downtime and seamless transitions.
- Deployed 50+ hotfixes and production changes following strict change management standards to reduce risks and downtime.
- Collaborated with developers, DBAs, and project managers to ensure successful application deployments and high customer satisfaction.
- Documented incident management and change requests for compliance, maintaining 100% audit readiness.

Education

2013 -2017

Bachelor of Engineering, Computer Science / R.M.D. Engineering College, Chennai, India

- Contributed to the improvement of the college website and email newsletters.
- Organized and hosted a diverse range of events, from tech fests to social and cultural gatherings.

Recognition

- **Key Contributor Award - CGI (2021):** Awarded for driving measurable improvements in data reliability, system performance, and support efficiency.

Certifications

- Azure Fundamentals (AZ-900), Microsoft Certified
- Azure Data Fundamentals (DP-900), Microsoft Certified
