Objective

Highly experienced managerial Project Engineer and Lead support professional with over 12 years of expertise in Tele-Com/Contact center building. Proficient in Contact center/VOIP, with a proven track record of achievements and success. Possess extensive pre-opening experience, complemented by sound strategic planning, operational, and system skills, enabling seamless performance in multi-site environments.

Tech Skills

Basics of AWS, SCRUM, ITIL v3,Agile, Lean six sigma yellow belt.
Windows administration,Hypervisor,IIS,eventviewer,registry.
Knowledge in AI, NLU's and NLP's.
Tools known: Salesforce, Clearquest,Jira,wireshark,postman,apea,netmon,perfmon.
Protocols known: HTTP/S, TCP, UDP,RTP,SIP,H323.
Also known to SQL, postman, VMware,Hypervisors,Linux,postman,RestAPI,Webservices,Weblogic..etc
Voice,SMS,VOIP,FXO/FXS gateways,Port mirroring,Analog-SIP conversions,Tone detections.

Five9 (previously Acqueon) [Sr. Implementation Engineer] – Jun 2022-Till Date

- Lead the end-to-end implementation of Acqueon solutions (e.g., Acqueon Engagement, Campaign Manager, etc.) for enterprise clients.
- Configure and deploy applications in customer environments, including cloud, hybrid, or on-premise models.
- Customize workflows and dialer logic to meet client-specific outbound/inbound contact strategies.
- Collaborate with clients to understand business requirements and translate them into technical solutions using Acqueon products.
- Act as the technical point of contact during the implementation lifecycle.
- Conduct requirement-gathering sessions, solution design workshops, and user acceptance testing (UAT) support.
- Integrate Acqueon solutions with third-party platforms such as CRM systems (Salesforce, Microsoft Dynamics), telephony platforms (Cisco UCCE/PCCE, /Five9), or workforce optimization tools.
- Work with APIs, databases (SQL/Oracle), and custom connectors to ensure seamless data exchange.
- Diagnose and resolve implementation and post-deployment issues, including application performance, data flow errors, and dialing logic problems.
- Optimize configurations to improve campaign performance, compliance, and agent productivity.
- Create and maintain implementation documentation, including architecture diagrams, configuration guides, and knowledge base articles.
- Provide training to client technical staff and users on system operation and maintenance.
- Lead or mentor junior engineers and implementation team members.

Sr. Technical Engineer-Support

- Taking accountability for service delivery performance, meeting customer expectations, and driving future demand.
- Recommending methods of improvement and seeing that actions are implemented on time for service delivery upgrades.
- Leadership qualities to guide and motivate their team members. This includes the ability to delegate tasks, provide clear directions, and inspire collaboration and teamwork.
- As Acqueon supports multiple dialers, I am proficient Integration with Cisco,Five9 etc.
- RAW troubleshooting of issues with a positive approach starting from narrowing down the issue till RCA, summarizing the issue details, method of approach, incident data collection, depth log analysis and issue analysis till framing the detailed RCA.

Tools used: MySQL, Jira,Wireshark,Salesforce,In house custom tools.
Protocols: TCP,UDP,Http,Https,Webservices.
Technical skills: IIS,Tomcat,SQL,DNS,DHCP,Virtualization,ports ,Debug,S3,EC2,RestAPI,Postman,VMware,Hypervisors,linux.

Verint [Senior Engineer-Infra]- July 2021-May 2022

- Maintained communication, access existing clients and new assigned clients.
- Maintaining high performance levels for service-related processes and implementing improvement activities wherever necessary.
- Taking ownership of critical incidents, coordinating with resolution parties, and establishing effective communication between stakeholders for post-incident reviews.
- Ensuring that systems, procedures, and methodologies are in place to support outstanding service delivery.
- A significant part of my expertise lies in log analysis of various services and components, including SQL and IIS, to comprehend the intricacies of system behavior and identify areas of improvement.
- With my strong troubleshooting skills, I am well-equipped to prepare detailed Root Cause Analysis (RCA) reports, providing insights into the "why," "how," and "when" of issues. My experience spans both on-
  premises and cloud setups, making me adaptable to diverse environments.

Tools used: MySQL, Microsoft IMS, wireshark,dumps.
Protocols: TCP,UDP,Http,Https,httpd,RTP,Webservices.
Technical skills: IIS,Tomcat,weblogic,oracle,SQL,DNS,DHCP,AD,Recording.

Aspect Software [Sr. Engineer product support] April 2019-June 2021

- In the realm of technical expertise, I possess advanced proficiency in handling Aspect's powerful software, Unified IP (UIP) and Advanced List Management (ALM).
- I have a solid grasp of prechecks and the implementation processes of Aspect products, which are essential for ensuring smooth deployments.

- Additionally, my knowledge extends to various critical aspects, including APEA reports, Failover Cluster Manager validations, and PAL reports. This detailed understanding enables me to make informed decisions and take appropriate actions based on the data obtained.
- Played a well established role of business relationship manager , which results in upselling.
- Maintained the trust factor by providing on time resolution.
- Followed complete process of 1st,2nd ,3rd level of escalation points.
- Strived hard to maintain the customer balance, by following the thumb rule of incident manager i.e. commitment to customer, on time delivery of the system fully tested.
- In challenging situations where end users are unable to isolate or resolve problems with malfunctioning equipment or software, I effectively respond and provide comprehensive support.

Tools used: MySQL, salesforce,ClearQuest, wireshark,dumps,APEA,Netmon,perfmon,Resorce monitor.
Protocols: TCP,UDP,Http,Https,httpd,RTP,Webservices.
Technical skills: IIS,Tomcat,SQL,DNS,DHCP,AD,VMware,Hypervisors,linux,

Telefinity Work profile (Project engineer implementation and Solution consultant)
Oct2013-Dec2018

Major Projects accomplished.

Below are the top Projects executed during the tenure.

1) **DPWORLD-Call recording solution**
2) **DHL(Qatar, Bahrain, Kuwait, Morocco, Saudi Arabia)call recording solution**
3) **ADNOC (Abu Dhabi National Oil Company)-Call center solution**
4) **CG Group (Dubai Police)**
5) **Fujairah Chamber of commerce and Industry-IVR solution**
6) **Arab Link Tourism-Call recording and billing solution**
7) **IL Café DI ROMA-Call center solution**
8) **Emirates Auction-IPPBX/Call center solution**
9) **Tabreed-Helpdesk/call center solution**
10) **Holiday Factory-Complete contact center solution**

Designed, Planned, Implemented and configured standalone as well as integrated with Avaya /Cisco/Alcatel/Panasonic/NEC ….etc.

-Call Center system -Infinity IP PBX
-Call recording system
-Interactive voice response
-Helpdesk/Incident management system

- Implemented FXO, FXS, E1, T1, SMPP, H323, SIP, H323,RTP,GSM involving protocols such as TCP/IP,Telnet,SSH,FTP,DHCP,DNS configurations.
- My expertise extends to IP Telephony Design and Implementation, enabling the setup and optimization of voice communication over IP networks.
- For enterprise-level and call center environments, I possess advanced skills in architecture design, encompassing intricate call center ACD systems. I am proficient in crafting advanced inbound and outbound call routing and dial plan designs to ensure efficient call handling.
- Additionally, I have extensive experience with IVR systems, encompassing connectivity and design for seamless customer interactions.
- Successfully implemented/integrated and finetuned the contact center solution with PBXs, such as Alcatel, Avaya, Nortel, Cisco, and more.
- Furthermore, I am well-versed in implementing call recording and monitoring solutions for various interface types, including Analogue, Digital, ISDN, SIP, H323, and others.
- I have also designed Interactive Voice Response solutions using both analogue and SIP channels, enhancing customer engagement and self-service capabilities.
- Actively participated in the presales calls to understand the customer requirements and feed in the best practice if required.
- Additionally, I oversee the delivery and installation of these customized software solutions in the customer's environment.
- Stay updated with the future release and past versions .
- Demonstrate the technical feasibility of our offerings, I conduct beta tests and trial programs.
- Furthermore, I conduct briefings and demonstrations for users to enhance system productivity, making the best use of our solutions.
- Moreover, I have experience in preparing high-level and core-level documents for tenders, providing consultation for the tender process. I am well-versed in working with RFPs (Request for Proposal), RFQs (Request for Quotation), and BOQs (Bill of Quantities).

Escalation/ incident management skills

- I effectively lead and guide Incident triage calls from a technical standpoint, analyzing various components of the infrastructure and application environments. During these calls, I have the ability to influence other technical teams, effectively articulating troubleshooting

steps to ensure efficient incident resolution.

- In addition to leading Incident triage calls, I also take charge of the required technical follow-up calls for high-profile incidents, ensuring that the appropriate functional and management escalation processes are followed in accordance with established standards and procedures.
- To safeguard production operations, I diligently follow up on items that have the potential to negatively impact operations.
- Furthermore, I actively participate in postmortem activities to derive valuable insights and support various efforts aimed at operational improvements.
- Based on management recommendations, I proactively implement new and improved processes, change existing processes, perform new tasks, create comprehensive reports, and address ad-hoc requests to enhance operational efficiency and effectiveness.
- With my effective communication skills, I am adept at influencing and collaborating with technical teams during Incident calls. I have the experience and confidence to interact with all levels of management, and my written and verbal communication skills are excellent.
- I can articulate technical issues in non-technical terms, enabling effective communication with senior management. Additionally, I am capable of managing large conference calls during Incident incidents, involving personnel and management at various levels.

Personal Information

Date of Birth: 11.10.1988
Languages : Urdu, English, Hindi, Kannada Tulu, Malayalam
Phone number : +91-90087 22454

Declaration

I (**ASIF AKBAR.M.)** hereby declare that the above written are true to the best of my knowledge and belief.

Date: Jan2025
Place: Mangalore
