CAREER ABSTRACT

Seasoned Software Engineer with over 8.3 years of experience specializing in Golang-based microservices and cloud-native application development. Skilled in building secure, scalable backend systems and collaborating in Agile teams to deliver high-quality solutions. Actively seeking opportunities as a Golang Developer to contribute expertise in developing efficient and robust software.

EMPLOYMENT

Principal Software Engineer **Eurofins IT Solutions** **Dec 2021 – Present**

- Architected and developed a customer-facing healthcare web application from the ground up, leveraging microservices architecture with robust role-based access control.
- Utilized a modern tech stack including Azure Cloud, Go (Golang), JWT, Gorilla/mux, Redis, PostgreSQL, Docker, and Kubernetes for scalable and resilient application development.
- Collaborated closely with clients in an Agile environment to gather requirements, prioritize features, and deliver iterative software improvements.

Software Engineer **MapleLabs Solutions** **July 2019- Dec 2021**

- Developed and integrated SAML authentication for a cluster monitoring application, enabling secure viewing and management of cloud instances using Golang, Python, MySQL, and Docker.
- Collaborated with client Cohesity as part of the Helios Storage development team, ensuring timely delivery of system backup data from Helios agents by leveraging Golang and Elasticsearch.
- Contributed to Cisco's HXDP team by designing and extending a Python library to automate operations on ESXi nodes via API, significantly reducing manual intervention.

Junior Software Engineer **Textual Analytics Solutions** **May 2017 – July 2019**

- Designed and developed an efficient Python-based data extraction model to retrieve taxonomy-specific information from financial documents of the London Stock Exchange.
- Leveraged anaphoric and cataphoric linguistic properties to enhance extraction accuracy to 85%, significantly reducing false positives.
- Enabled the financial analytics team to quickly access relevant data from documents without needing to read them in full, improving workflow efficiency.
- Created a search tool utilizing Redis to precisely match and retrieve documents from databases based on input text, boosting productivity by over 40%.
- Technologies used: Python, spaCy, NLP, Redis, MySQL, JavaScript.

Languages and Technologies

- Programming Languages – Golang, Python
- Operating System - Linux, Windows
- Database – PostgreSQL
- Cloud – Azure, AWS, ESXi
- Frameworks & tools – DSA, Angular, Django, gRPC, Kafka, Redis, Ansible, SAML, Selenium, Docker, Kubernetes
- Others – JavaScript, HTML, CSS, NLP, API, Microservice, GitHub, Jira, Jenkins, VS code, EXCEL

EDUCATION

Bhilwara (Raj.), India **MLVGTEC** **July 2012 - May 2016**

- B.Tech. in Electronics and Communication Engineering. CGPA: 7.25/10

ACHIEVEMENTS AND RESPONSIBILITIES

- Won Star performer award in Q2 2025.
- Qualified the prestigious AIEEE 2012 and was among top 10% of about 15 lakh students that appeared.
- Coordinator and Problem setter for the annual technical/coding/sports fest of my college.
