Dhanigaivel G

Full Stack Developer

E 9884188219 @ dhanigai05@gmail.com q linkedin.com/in/dhanigaivel-g-2976771ba 9 Chennai, India

SUMMARY

Full Stack Developer with 6 years of experience building scalable enterprise applications across healthcare, analytics, and retail domains. Skilled in Java, Spring Boot, Angular, AWS, and Python, with a proven record of improving system performance, leading UI initiatives, and driving CI/CD automation. Recognized for ownership, collaboration with cross-functional teams, and consistently delivering business-focused solutions.

SKILLS

Backend: Java | SpringBoot | Python | Nodejs | Microservices

Frontend: Angular | HTML | CSS

Cloud/DevOps: AWS | Lambda | S3 | EKS | Docker | Jenkins | OpenShift | UDeploy

Databases: Oracle SQL | PostgreSQL | Elasticsearch | DynamoDB

Practices & Tools: Agile | Git | JUnit | SonarQube | Power BI

EXPERIENCE

Software Engineer

NIQ

04/2023 - Present Chennai

- Developed **RESTful APIs** using **Java** and **Spring Boot**, and contributed to backend modules in **Python** for cross-functional projects.
- Took full ownership of components built with **Java** and **Angular**, **leading maintenance**, **debugging,** and **feature enhancements**.
- Led UI development and multiple enhancement tasks, including **building new pages** using Angular and integrating Power BI with web pages.
- Improved **SonarQube** code coverage to 90% by refactoring legacy code and writing comprehensive unit tests.
- Conducted **performance analysis** to identify slow-performing code sections and proposed optimization strategies, currently under review for implementation.
- Contributed to **vulnerability resolution** efforts, ensuring application compliance with security standards.
- Created **Jenkins pipeline scripts (Jenkinsfile)** and **build.yml** files to automate build, test, and deployment workflows, including building and deploying **Docker** containers.

Senior Software Engineer

Accolite Digital

12/2022 - 03/2023 Chennai

- Strengthened expertise in **Java, Angular,** and **AWS** through advanced training and client project readiness.
- Maintained project readiness by studying industry best practices and updating technical knowledge independently.

Associate

Cognizant Technology Solutions

07/2019 - 11/2022 Chennai, India

- Developed RESTful APIs using **Java** and **Spring Boot**, and contributed to backend modules in **Python**.
- Built and maintained **Spring Boot** and **Spring Batch** applications deployed on **OpenShift** and **AWS**.
- Tested APIs with **SOAP UI** and **Postman**, and performed database operations using **Oracle SQL**. Developed Angular components interacting with RESTful services, including implementation of conversion variables for **Adobe Analytics**.
- Managed deployments on **OpenShift** and **EKS** using **UDeploy**.
- Created **AWS Lambda** functions in **Node.js** and **Python** utilizing **S3**, **DynamoDB**, **Elasticsearch**, and **Secrets Manager**.

PROJECTS

NIV and Smart Track Femsa

04/2023 - Present Chennai

Projects aimed at enhancing in-store efficiency and data management

- Currently working on the **Nielsen Invision Store (NIV)** project, contributing to both frontend and backend development. Responsible for building and enhancing **Angular components** for the user interface and developing **RESTful APIs** using **Java** and **Spring Boot** for backend services. The application uses **PostgreSQL** as the primary database.
- Smart Track is a generic analytics platform being adapted for multiple markets. My primary responsibility involves writing **Python scripts** to process and generate data used for **Power BI** dashboards. These scripts support key business metrics and visualizations by preparing structured data pipelines for various market-specific requirements.
- Developed a web application that integrates and presents **Power BI reports** within a custom frontend built using **Angular**. The backend is developed using **Java Spring Boot**, responsible for handling API communication and user access control.

MyCigna

09/2019 - 11/2022 Chennai

A project focused on building a comprehensive web platform for health insurance managed claims

- I was part of the development team responsible for building and maintaining the **Claims** and **Accounts** sections of the **myCigna** web portal. Our team handled both **frontend (Angular)** and **backend (Java, Spring Boot)** development, ensuring a seamless and secure experience for users accessing their health and insurance information.
- Online Claim Submission, worked primarily on the **backend** using **Spring Boot** and **Spring Batch** to implement and manage business logic and data processing for the online claim submission workflow. Additionally contributed to the **frontend** using **Angular**, developing and enhancing select components to support a seamless user experience. Collaborated closely with cross-functional teams to ensure efficient data flow and system integration between frontend and backend modules.
- Debit Card Submission, developed backend services using **Node.js** to create **three AWS Lambda functions** that handled debit card submission workflows. These functions integrated with **DynamoDB** for data storage and **Amazon S3** for file handling. Additionally, contributed to the **frontend** by developing **Angular components** to support the submission interface and ensure smooth user interaction with backend services.

EDUCATION

B.E in Electronics and Communication Engineering – 7.55 CGPA

Velammal Engineering College

06/2016 - 05/2019 Chennai

Diploma in Electronics Robotics – 84%

Murugappa Polytechnic College

06/2012 - 12/2015 Chennai

EXTRA-CURRICULAR ACTIVITIES

- **Tennis**
- **Cricket**
- **Chess**
- **Badminton**
- **Yoga**
