Abhijit Chattopadhyay

Kolkata, India | +91 9538094232 | ranjubigdata@gmail.com

Professional Summary

Seasoned IT professional with 15+ years of experience, including 6+ years in GCP. Built analytics platforms with BigQuery, Airflow/Cloud Composer, Python ETL/ELT, and SQL-based transformation frameworks (Dataform). Experienced in AWS→GCP **migration** strategies and implementation for NoSQL and RDBMS. Drive cloud adoption strategies with a focus on cost, feasibility, and sustainability and embeds **FinOps** practices.

Core Competencies

- **Cross Cloud Migration (AWS → GCP):** Migration strategy, landing patterns, data/model mapping, Database Migration Service (DMS), cutover planning
- **FinOps on GCP**: BigQuery Optimization, resource labelling/segmentation, BigQuery slot vs on-demand planning, storage lifecycle policies, Billing Analysis in terms of BigQuery usage
- **Data & Analytics on GCP**: BigQuery (modeling, partitioning, clustering), GCS, Dataform, Python, Dataform, DMS for migration, BigQuery integration with Tableau and Power BI
- **Orchestration & Automation**: Apache Airflow (scheduling, dependencies, alerts), Composer, Slack integrations
- **Stakeholder Leadership**: Cloud adoption strategy (cost, feasibility, security), client workshops, team mentoring, inculcating **FinOps** practises.
- **AI**: Upskilling in GEN AI, Agentic AI through Vertex AI, RAG, LLM etc. and exploring these to embed in the existing projects

Technical Skills:

- Cloud Platforms: Google Cloud Platform (GCP), **BigQuery**, GCS, Dataproc, **Dataform**, **CloudSQL**, **DMS, NoSQL(Firestore), DynamoDB(AWS), integrations of BigQuery with Tableau and Power BI**
- Data Engineering: **Airflow**, Composer, Spark, Python, SQL
- AI: Google Gemini, LLM, RAG, Agentic AI, Vertex AI
- Tools: Jupyter Notebook, Anaconda, GitHub, JIRA

Professional Experience

Capgemini – Solution Architect | Dec 2022 – Present

- Designed and implemented GCP-based analytics solutions using BigQuery, Airflow/Cloud Composer, Dataform, BQ integrations with Tableau and Power BI and Python for clients like Virgin Voyages, IKEA, McDonald ; built POCs in Python, Airflow, BigQuery and guided teams to productionise them.
- Defined strategy and SOP for **migration** from AWS to GCP for NOSQL (DynamoDB->Firestore) and RDBMS(Aurora->CloudSQL) and built POC with **DMS(Database Migration Services)** and 3rd party tools for the same
- Conducted structured evaluation of **third-party migration tools** for heterogeneous RDBMS → GCP paths; documented trade-offs and risks to support vendor selection.

- Implemented **FinOps** guardrails: labels, budgets, slot management, GCS lifecycle and BigQuery Optimization
- Ensured strict compliance and collaborated with cross-functional teams for on-time delivery of quality products.
- Mentored teams on BigQuery modelling and Airflow operational hygiene and other emerging technologies.

News Technology Services – Senior Data Engineer (Architect) | May 2019 – Jun 2022

- Architected and developed robust data layers on BigQuery for high-volume media analytics; implemented partitioning/clustering for predictable performance/cost.
- Built complex scheduling and automation with Python and Airflow

MBB Labs – Senior Data Engineer | Mar 2018 – Apr 2019

- Developed Python/Spark ingestion and transformation components.

Vodafone Shared Services – Senior Developer | Sep 2016 – Mar 2018

- Engineered PySpark-based pipelines for telecom data.

Other Experience :

- Also worked in Honeywell, Accenture, HCL, Verizon and CSC in PeopleSoft ERP.

Education

- MCA – NIT Durgapur
- PGDM – IMT Ghaziabad
- B.Sc. (Hons) Maths & Stats – Calcutta University

Certifications

- Wiley Jigsaw Certified Big Data Specialist (WJCBDS)
- GenAI & Vertex AI Upskilling (Capgemini–Google)
