RAM KIRAN DARIMADUGU

AI PROFESSIONAL | GEN AI, NLP, ML & DATA SCIENCE

kiranram.ds@gmail.com 09440784248 Hyderabad, India LinkedIn.com/in/ram-kiran-hksv9r004

PROFILE

AI Engineer with 6+ years of experience specializing in Machine Learning, NLP, DL, Generative AI, and Statistical Modeling. Proficient in Python, SQL, and Power BI, with a strong command of the data science lifecycle, including exploratory data analysis, data cleaning, model building, and results interpretation. Experienced in developing forecasting models, clustering analysis, recommendation engines, RAG pipelines, Chatbots and Agentic AI. Driven by a passion for analytics and business, consistently seeking innovative approaches to deliver impactful solutions.

WORK HISTORY

Data Scientist Engineering Lead • *Persistent Systems*

Hyderabad, India • December 2023 – Present

SQL Conversational AI Agent: Built a conversational AI agent that converts natural language into BigQuery SQL, enabling marketing teams to run index-matching analyses and receive text and visual insights for better decision-making.

Multi-Tool Conversational AI Assistant: Developed an AI chatbot capable of conversational SQL, JIRA, and GitHub integration. Enabled users to interact with backend systems through natural language queries and receive responses in intuitive, plain-text formats—improving accessibility and productivity for technical and non-technical users alike.

AI RAG Chatbot for Audit Domain: Designed and implemented a Retrieval-Augmented Generation (RAG) based chatbot for an audit organization using LlamaIndex, Azure OpenAI, and Azure AI Search (Vector DB). Enhanced natural language understanding and generation to deliver accurate, context-aware responses and elevate user experience.

Data Scientist • *Godomo*

Bengaluru, India • July 2023 – October 2023

Chatbot R&D POC: Built an LLM-based financial chatbot using LangChain + PostgreSQL for account queries, credit scoring, and recommendations.

Rent classification to Reporting: Developed a predictive model using Logistic Regression to classify transactions as rent or non-rent based on historical data, including date, category, amount, description, periodicity, and beneficiary details. The model facilitated accurate reporting of rent transactions to the bureau.

Data Scientist • *LexisNexis*

London, United Kingdom • April 2022 – April 2023

Extracting key information from judgments or law documents:

- Built a hybrid model, which was a combination of fine-tuned Distilbert model and Question-Answering Roberta model for extracting

SKILLS

- **Python programming:** Numpy, Pandas, Matplotlib, seaborn, sklearn, keras, tensorflow, PyTorch, spaCy, NLTK, OpenCv, Transformers, PySpark
- **LLM orchestration frameworks:** Langchain, Langgraph, LlamaIndex, Langflow, Crew AI, Google ADK, N8N, DSPy, Strands Agents
- **LLMS**: OpenAI, Gemini, Claude, Titan, Llama, Mistral AI, BERT.
- Model Context Protocol, A2A.
- SQL / Oracle
- Data Processing
- Exploratory Data Analysis (EDA)
- Data Visualisation
- Data Modelling
- Machine Learning (ML)
- **Classification and Regression:** Decision Tree, KNN, Linear Regression, Logistic Regression, Naive Bayes, SVM
- **Ensemble Models** like Random Forest, XGBOOST
- **Dimensionality Reduction:** LDA & PCA
- **Time Series and Forecasting:** ARIMA, Fb Prophet, Exponential Smoothing, Holt's Winter seasonal Approach
- **Natural Language Processing (NLP):** BOW, TF-IDF, Word2Vec, Stemming, Lemmatization, Transformers.
- **Clustering:** KMeans, Hierarchical, DBSCAN.
- **Deep Learning (DL):** Neural Networks (ANN, CNN & RNN), Faster RCNN's and LSTM, Hugging face, Image and Video Analytics
- **Vector DB:** Pinecone, Chroma DB, Weaviate, Azure AI Search, AWS OpenSeach
- **Prompt engineering**
- **IDEs:** VS code, Cursor, Cloud Workstations, JupyterLab
- **AWS** Bedrock, Kendra, Textract, Comprehend, Lex, Lambda, API Gateway, Sagemaker, EC2, S3, IAM, EKS
- **Azure** OpenAI Services, Cognitive Search, Azure Functions, Blob Storage, Active Directory, Key Vault.

outcome sentence and the key *Outcome* information from the text.

- Devised a fine-tuned Distilbert model for comment's *sentiment* identification which has an accuracy of 62% and 59% F1 score.
- Developed an *expertise* extraction model with a Simple transformer Bert Q&A model (classifying and to answer) to extract the expertise of an expert in a judgement with the help of NER extraction and tagged with right taxonomy instead of free text expertise.

Data Scientist • *Mindtree Ltd*
Hyderabad, India • August 2019 - December 2020

Customer Potential (Using Clustering) and Product Recommendations (NPTB):

- Implemented a ML models to micro segment customers to identify revenue potential, based on other similar customers in segment and generate product recommendations to relationship managers.
- Developed a K means model to micro segment customers based on industry/purchasing capability/ and other prominent features.
- Devised ensemble XGBOOST model to generate product recommendations(deals) using financial and non-financial factors.

Contract Risk Clause Classification:

- Devised NLP based solution to identify potential risk clauses in contract agreement.
- Designed a Multilayer RNN classifier to predict risk clauses in contract documents, which established in skimming documents 3x faster compared to manual.

Data Scientist • *HCL Technologies Ltd.*
Chennai, India • January 2017 - July 2018

Branch Sales Forecast and identifying features for implementation:

- Devised sale forecasting model to forecast sale of operations branch in bank and analysing possible features/operations/plans effects sales.
- Developed data-gathering and reporting structures from ground up and strategized methods capitalizing on system features.
- Implemented XGBOOST regressor to forecast sales of a newly formed branch using other relatable branches.

Loan Product Recommendation:

- Developed Product Recommendation system to bank helps operations team to suggest best products to customers and reduces turnaround time of response and increase hit rate.
- Executed content based filtering method with KNN (5 Neighbours) to be recommended products.
- Scaled analytical capabilities across business areas, evolving analytics to influence bank's strategic planning and decision making.

- **GCP** Vertex AI, Cloud Search, Dialogflow, Cloud functions, Compute Engine, Cloud Storage
- Docker
- Databricks
- Mathematics and Statistics
- Power BI & Looker Visualization tools
- Weka DM
- R programming

UPSKILLING WITH

- AWS, AZURE & GCP services
- Kubernetes

EDUCATION

- **University of Leeds**
  Leeds, United Kingdom
  2021 - 2022

  Master of Science: *Data Science and Analytics*

  Grade: Merit

- **Geethanjali Institute of Science and Technology**
  Nellore, India
  2012 - 2016

  Bachelor of Technology: *Civil Engineering*

  Grade: Distinction

CERTIFICATIONS

- Getting started with AWS Machine Learning *offered by Amazon*

INTERESTS

- Upskilling & checking new technologies
- Analyzing Businesses and stocks
- Playing Chess
