Amardeep Dewangan

Mobile: +91-8373907810, Email: amardeep.dewangan@gmail.com

Professional Summary ~12 years of Industry Experience

- Accomplished Solution Architect with ~12 years of experience across **Data, AI, Cloud, and Conversational Systems**, specializing in **GenAI solutioning**, chatbot architecture, and delivery of enterprise AI solutions aligned with RFP/RFI-driven opportunities and production-grade implementations.
- Proven expertise in **Generative AI**, **Microsoft Azure (Cognitive Services, AI Foundry, OpenAI)**, **intent recognition**, **RAG pipelines**, **Agentic AI**, and integration of AI-driven chatbots with enterprise applications (e.g., CRM, service portals). Adept at applying NLP and LLM capabilities to drive automation, customer experience, and business insights.
- Hands-on experience in **Python** and **CI/CD DevOps** for deploying scalable chatbot and GenAI solutions. Familiar with modern AI architectures including **multi-turn dialogue agents**, **prompt engineering**, and **vector-based search** integrations.
- Broad cloud transformation and **data modernization** experience across **Azure**, **GCP**, and hybrid environments, leading GenAI PoCs, migration programs, and digital platform delivery initiatives with strong focus on governance, data privacy, and contractual adherence.
- Played a hybrid role across **solution architecture**, **pre-sales**, and **delivery**, collaborating with Sales, Finance, and executive stakeholders to define value propositions, create scalable solution architectures, and optimize cost via reusable patterns, accelerators, and pyramid-based pricing aligned to client rate cards.
- Successfully delivered projects for top-tier clients including **JCI, GE Vernova, Kaiser Permanente, British Telecom, Vodafone, Rogers, Etisalat, Airtel, Cyta, Loblaws**, and more. Managed delivery teams (~25 members) and ensured alignment of KPIs, SLAs, and business outcomes in both onshore and offshore models.
- At **Ericsson**, served as both **Architect** and **Consultant** for end-to-end IVR (BSS application) applications/agents enabling telecom services like language preference, prepaid refills, self-service, and customer support. Delivered and supported complex IVR modules across **onshore and offshore models**, catering to major telecom operators including **Airtel, Vodafone, MTN**, and others.
- Skilled in authoring SOWs, technical designs, risk assessments, and transition documents. Capable of managing multiple priorities, leading solution workshops, and delivering production-grade AI and platform solutions under tight timelines.

Work Profile

Company	Designation	Duration
Accenture (ATCI)	Solution Architect Associate Manager- Data and AI	25th Feb 2021 to till date
Ericsson (EGIL)	Senior Solution Integrator	4th Feb 2014 to 24th Feb 2021

Education

Degree	Stream	University/College	Year of Passing
MS by Research (Masters)	Communication System	IIT Madras, India	2013
Bachelor of Engineering	Electronics and TeleComm	BIT Durg, India	2009

Key Skills Functional

Enterprise Solution Architecture & Design (Data, AI/ML, GenAI)	**Delivery Oversight** – Reviews, Go-Live, Handover
Cloud Strategy, Migration Planning (Azure, GCP, AWS, Onprem)	**Agile and Waterfall Delivery Models**
AI/ML Use Case Mapping to Business Value	**Team Building** and Performance Leadership (~25 FTEs)
Conversational AI & GenAI Solutioning (LLMs, RAG, Agents)	**Workshops, PoCs, Demos** for Stakeholders and Clients
Pre-Sales Support, Proposal Writing, Bid Management	Alignment with **BIM Standards** for IT System Design
Client Orals, Value Proposition & Deal Shaping	**Requirement Discovery**, Business-IT Alignment
Stakeholder Engagement across CxO and Delivery levels	Risk/Cost/Impact Analysis, Pyramid-Based Pricing
Project & Engineering Management	Telecom Domain Expertise (BSS Stack, IVR, Voucher Server, OSS/BSS)
Regulatory Compliance & Data Governance (PII, GDPR)	Familiarity with TMF Frameworks, eTOM, SID

Key Skills Technical

Generative AI, LLMs (OpenAI, Azure OpenAI), RAG, Prompt Engineering, SageMaker, Gemini, G-Studio	**API Integration** (REST), Microservices, SaaS, PaaS, IaaS
Conversational AI: **MS Bot Framework**, **Azure Cognitive Services**, ChatGPT APIs, Diaglog Flow, Vertex AI, Bedrock	Infrastructure-as-Code (IaC): **Terraform**
Data Architecture, MDM, DWH, Data Lakes	**Linux & Windows Platforms**; Shell Scripting (Bash, awk)
Data Pipelines, **ETL/ELT**, DataOps using **Azure Data Factory**, **Databricks**	Programming: **Python**, **SQL**, Shell, exposure to **C#**, **JS/React**
Kafka, **Talend**, File Brokers (SFTP, NFS, WinSCP)	Tools: **Jupyter**, **PlantUML**, **Visio**, **PyCharm**, **LaTeX**
DevOps/CI-CD Automation, Git, Azure DevOps, Jenkins	Experience in **System Design**, Troubleshooting, Monitoring, Debugging
Cloud Platforms: Azure (Primary), GCP, AWS, OpenStack	Security & Networking Fundamentals (VPN, SSL, Firewall policies, Cloud IAM)

Certifications and Awards

- Google Cloud Generative AI leader Certification.
- Data Architect Certified from MIT professional Education (ADMD0000029325)
- Google Cloud Associate Engineer Certified (GCP ACE).
- Collibra Certified Data and Solution Architecture.
- ACE Individual Award in Super Mentor Category (Accenture Global Award)
- RedHat Certified System Administrator (RHCSA) on RHEL 6 and 7, (EX200).
- RedHat Certified Engineer (RHCE) on RHEL 6 and 7 (EX300).
- RedHat Certified System Administrator in RedHat Open Stack 6.0 (EX210).
- BUGS GIAP Certified as Integration Engineer Experience.
- SPOT and POWER Award for excellence in the project from Ericsson.

Publications

- Title: Statistics based energy efficient caching decisions for IP-TV services. NCC 2013, IIT Delhi, Feb-2013. Published in IEEE in 2013.
- Title: Energy optimized caching decisions for IP-TV services based on estimated arrival rate. NCC 2014, IIT Kanpur, Feb-2014. Published in IEEE in 2014.

Interests and Extra Activities

- Active contributor to CSR initiatives at Ericsson and Accenture, focusing on education, community support, and pandemic relief.
- Member of Accenture's COVID Care Team (EU-Corona Warriors), supporting employees and communities during the pandemic.
- Instructor in the Teach India program by Times of India, empowering underprivileged youth through education.
- Brand Ambassador for both Ericsson and Accenture India, promoting employee engagement and organizational culture.
- Selected to represent IIT Madras in the prestigious Kizuna-Bond Project in Japan, a cultural and academic exchange initiative.
- Elected Cultural Secretary of the hostel at IIT Madras; led and organized multiple inter-hostel and institute-level cultural events.
- First place winner in SANRACHNA-2008 for developing and presenting an autonomous Line-Tracer robot.
- Active organizer and participant in cross-cultural corporate and academic events.
- Personal interests include playing Cricket, Chess, Badminton, and Cycling.

Project Experience in Detail

Accenture India – Feb 2021 to till date

Accenture | CF DA AI/GenAI Solution Architect (Dec 2021 – Present)

Cloud: GCP (Primary), Azure, AWS | **Key Tools:** Vertex AI, Azure OpenAI, Databricks, BigQuery, Looker, GCS, MSBOT, ServiceNow, Terraform, CI/CD, Azure AI Foundry, Sage Maker, Bedrock, Dialog Flow, Streamlit.

- Led GenAI and cloud-native solutioning for large-scale transformation deals (~$200M+) across aviation, healthcare, telecom, retail, &, Banking.
- Defined end-to-end GenAI architectures: Retrieval-Augmented Generation (RAG), policy/chat assistants, and process automation bots.
- Spearheaded solution planning and tech stack alignment across cloud platforms (GCP, Azure, AWS) with a focus on cost-efficiency and scalability.
- Delivered effort estimation, infra sizing, and AI/ML roadmaps for cloud modernization and AI-based product development.
- Worked on pre-sales, pricing, staffing, risk mitigation, and architectural governance during RFP and solution defense.
- Created cross-platform solutions involving PaaS, SaaS, and on-prem integrations.
- Aligned AI solutions with data governance, security, and compliance frameworks across regulated industries.

GE Vernova | GenAI MVP Lead (Azure OpenAI, MS Teams)

- Delivered a HR Copilot chatbot using GenAI (RAG, Azure Bot Framework) for policy Q&A and SOP digitization.
- Integrated enterprise data (ServiceNow, HR docs) securely within MS Teams using Azure AD & Bot Service.
- Led full SDLC delivery – architecture, MVP buildout, user validation, and iterative improvements.

Kaiser Permanente |Solution Architect (AWS, On-Prem, PII/PHI Compliance)

- Architected and managed delivery of healthcare data pipelines from on-prem to AWS for analytics and AI. Building AI Factory for AI/GenAI usecases.
- Led architecture compliance, risk discovery, and stakeholder orchestration involving PIA, ACF, and HIPAA-aligned processes.

British Telecom, VMO2 | GCP Delivery/Solution Manager (GCP, Informatica, Apigee, Kafka, WebDAV)

- Designed and deployed a GCP-native data lake for Paid Media Analytics leveraging Informatica, Apigee APIs, Batch, and Kafka for ingestion and processing.
- Automated data quality and operational metrics for BT's marketing science models.
- Operationalize the data product through orchestration and automation.
- Designed E2E data pipeline from legacy sources to GCP.
- Used Apache Kafka, SFTP, XFB, APIGEE, WebDAV, and Ab Initio for integration.
- Led SaaS integration via DMZ and CloudWorks connectors.
- Utilized Informatica for ETL and cloud native services for data load in GCP for AI Usecases.

Ericsson Global India – Feb 2014 to Feb 2021

Ericsson India | BSS Solution Architect & Data Migration Lead (Feb 2014 – Feb 2021)
Cloud/Tech Stack: On-Prem & Client Data Centers, Virtualized Environments, Shell Scripting, SQL, Custom ETL Pipelines, IVR Middleware, APIs, OSS/BSS, Load Balancer/Cluster-based deployment

Key Clients: Airtel (India, Africa), Vodafone (Ireland, India), MTN Uganda & Benin, Digicel Jamaica, Cyta Cyprus, DST Brunei, OPT New Caledonia, Etisalat Gabon

Key Projects & Responsibilities

BSS Modernization & Cloud Migration (2016–2021)

- Led full-scale data and application migration from 3rd-party BSS systems to Ericsson BSS suite, across multiple global Telcos.
- Built custom ETL pipelines between legacy on-prem servers and client cloud/Onprem environments; ensured secure, scalable data movement.
- Delivered solution architecture, HLD/LLD, and executed end-to-end data migration strategy (Dry Runs, Live Cutover, Reconciliation).
- Enabled client operations readiness by defining RACI matrix, leading workshops, and driving cross-functional execution.
- Participated in product development and tool enhancements, working closely with engineering teams for IP-based data tools.

IVR Agent Application in BSS Environment (2015–2018)

- Designed and delivered IVR agents and speech-based applications for self-service modules such as language selection, balance top-up, bill payment, and customer support — integrated with core BSS stack.
- Worked across onshore and offshore setups to customize IVR workflows for clients including Airtel, MTN, and Vodafone, ensuring localization and multi-channel access (IVR, SMS, USSD).
- Enabled modular service orchestration via REST/SOAP APIs to route requests to backend billing, CRM, and order management systems.

Full-Stack BSS Digital Transformation (2014–2016)

- Spearheaded deployment of BSS components in both virtualized (VM-based) and physical infrastructure across multiple geographies.
- Created and managed customer adaptations, performed impact analysis, risk mitigation planning, and tool configuration.
- Supported UAT, go-live, and post go-live activities, including customization, asset management, training, and client handover.

==========End==========
