CAREER OBJECTIVE

To secure a challenging position in a high-quality engineering environment where my extensive experience and technical skills can contribute to the success and growth of the organization.

CAREER SUMMARY

• **Experience**: 7.8 YOE in analysis, design, development, and security of enterprise applications.

• **Full Stack Expertise**: Proficient in Java, React, and related tools and frameworks.

• **Open-Source Frameworks**: Extensive experience with Spring Boot, Hibernate, React, and other open-source frameworks.

• **Microservices Development**: Skilled in developing RESTful and GraphQL microservices using Spring Boot.

• **Database Knowledge**: Proficient with relational databases like Oracle and NoSQL databases like MongoDB & In-Memory DB like Redis.

• **Distributed Systems**: Strong understanding and hands-on experience with microservices architecture and implementation of patterns like CQRS and event-driven architecture using AXON and Apache Kafka.

• **Frontend Development**: Expertise in React.js, building responsive and dynamic user interfaces using micro frontends architecture.

• **Concurrency & Reactive Programming**: Solid knowledge of concurrency and reactive programming using Project Reactor.

• **Development Methodologies**: Experience with Test-Driven Development (TDD) and Behaviour-Driven Development (BDD).

• **Design Principles**: Skilled in object-oriented analysis and design using common design patterns and principles.

• **Application Security**: Experienced in securing applications by mitigating vulnerabilities using tools like Sonar and AppSpider, and implementing JWT, OAuth 2.0 mechanisms, and AES encryption.

• **Agile/SCRUM**: Proficient in Agile/SCRUM methodologies for enterprise-scale software development.

• **Technical Knowledge**: Strong understanding of data structures, algorithms, and system design.

SKILL SET

Languages	Java, C, Java script, TypeScript
Frameworks	Spring 5, Spring Boot
ORM	Hibernate, JPA
CICD	Jenkins, Azure pipeline
Web Dev	React, Node, HTML, CSS, Bootstrap
Tools	Git, Maven, Elastic search, Logstash, Kibana, Kafka, RabbitMQ, AXON, Docker, Kubernetes
Security	Spring Security, App Spider, SonarQube, Web Inspect, STAAS, OWASP
Testing	Selenium, Postman, Mockito, Junit 5, REST assured, Cucumber, Jest
Servers	WebLogic, Apache Tomcat
IDEs	IntelliJ, STS, Eclipse, NetBeans, VS Code
Database	Oracle, MySQL, Mongo DB, Redis
Web Services	GraphQL, REST Web Services, SOAP
Architecture	Microservices & Monolithic
OS	Windows, Linux

BOEING EXPERIENCE: MMRO PORTFOLIO

Project: **GOLDn** (Cloud-Native Application Development)

- **Objective**: Modernize the legacy **GOLDesp** application which is utilized by the **MRO** to support military operations, ensuring efficient management of maintenance, repair, and overhaul activities and host it on Azure Cloud.
- **Backend Architecture**: Utilized a microservices-based architecture.
    - **CQRS Pattern**: Implemented Command Query Responsibility Segregation (CQRS) to separate **Allowable Config** and **In Service Config** services into distinct command and query responsibilities.
    - **AXON Framework**: Facilitated communication between command and query components within each microservice, optimizing data processing workflows.

    - **Kafka Integration**: Employed Kafka for asynchronous communication across microservices, ensuring reliable and scalable data transfer.
- **Frontend Development**: Developed individual web-based clients for each service using React, structured as micro frontends.
- **CI/CD Automation**: Implemented automated build, test, and deployment processes using Azure DevOps CI/CD pipelines.
- **Deployment Orchestration**: Managed deployments using Kubernetes containers on Azure Cloud, ensuring scalability and resource efficiency.

ROLE & RESPONSIBILITIES

- **Feature Development**: Enhance and develop new features in **GOLDn**.
- **Full-Stack Flexibility**: Work on both frontend and backend as needed.
- **Release & Process Management**: Oversee release cycles and process improvements.
- **Stakeholder Interaction**: Gather requirements and gain domain knowledge through interactions with stakeholders.
- **Mentorship**: Mentor junior team members.

ORACLE EXPERIENCE

- **Project:** Development of Automation Testing Tool **ARIOS**
    - **Purpose**: Automates testing of the core banking product Flex cube, used by major banks like HSBC and CITI.
    - **Components**: ARIOS Executable Jar (Selenium-powered), Spring Boot Service, and a Spring MVC Web App deployed on WebLogic.

Role & Responsibilities

- Enhancing, maintaining, and securing the ARIOS tool, along with conducting compliance and R&D activities.
- Interacting with users and resolving their queries.

PROFESSIONAL EXPERIENCE

Company Name	*Designation*	*Duration*
Boeing India private limited	Associate Java Full stack developer	July'2023 - Present
Oracle Financial Services Software Limited	Senior Consultant	Jan'2021 - June'2023
HCL Technologies Pvt. Ltd.	Software Engineer	Jun'2019 - Jan'2021
Technospacio Tech Solution Pvt. Ltd.	Software Engineer	July'2018 - Jun'2019
IonIdea Interactive Pvt. Ltd.	Trainee Software Engineer	July'2017 - May'2018

ACHIEVEMENTS & STRENGTH

- **Continuous Learning**: Completed courses and live events on O'Reilly/Safari, LinkedIn Learning and read books to deepen understanding of technologies. Applied knowledge in real projects, earning certifications.
- **Problem-Solving**: Demonstrates a strong work ethic and problem-solving attitude.
- **Adaptability**: Quick to learn and adapt to new technologies.
- **Independence & Time Management**: Capable of working independently and managing time.

ACADEMIC DETAILS

B.Tech (CSE)	Rajasthan Tech. University	60.97%	2016
12th standard	BSE	69.23%	2011
10th standard	BSE	80.67%	2009

PERSONAL DETAILS

Date of Birth	11-01-1995
Father's name	Hafiz Zakir Hussain
Nationality	Indian
Sex	Male
Place & Date	Bangalore, 11 JAN 2025
