EXPERIENCE

Athenahealth

Senior Member of Technical Staff *May 2024 - Present*

- Led a four-member Denials Management engineering team, owning end-to-end delivery, code reviews, and technical design.
- Designed and developed patient insurance rules automation, resulting in a 15% reduction in BPO operations and ~$1M in cost savings.
- Designed and implemented a Spring Boot–based automated charge adjustment service driven by prediction model outputs, reducing BPO effort by 3%.

Technologies Used: Java, Spring Boot, React, Typescript, Microservices, AWS

Accenture

Senior Software Engineer *Apr 2022 – May 2024*

- Designed and built reusable atomic components for a single-page application following best coding and design practices.
- Built a highly available and scalable shopping cart and checkout system for an e-commerce application.
- Designed and developed filter and sort functionality for product and recipe data powered by Algolia.

Technologies Used: Java, Spring Boot, React, Redux, Typescript, Microservices, Azure

FIS Global

Programmer Analyst II *May 2021 - Apr 2022*

- Developed responsive, accessibility-compliant web pages using React.
- Wrote Jest tests for existing components and increased the code coverage from 68% to 93%.
- Built multiple robust client-side dashboard frameworks and integrated them across multiple applications.

Technologies Used: Java, Spring Boot, React

Novac Technology Solutions

Software Engineer *Mar 2018 - Apr 2021*

- Developed a Refundable Security Deposit (RSD) system, enabling bid-based payments and increasing returning customers by ~20%.
- Built and scaled a Monthly Accounts Billing system serving 31K users across 500+ Automalls.
- Designed and implemented a subscription plan feature in the auction engine platform. Added functionality to reschedule auctions for unsold vehicles and manage subscription plans using authentication and authorization.

Technologies Used: Java, Spring Boot, React, C#, SQL, ASP.NET

Ramco Systems

Software Engineer Trainee *Mar 2017 - Feb 2018*

- Automated updates for sensitive, high-volume live data.
- Designed a reporting pipeline to spool data automatically every day from SQL servers with zero data loss.

Technologies Used: C#, SQL, ASP.NET

PERSONAL PROJECTS

Food ordering App

July 2020 - Nov 2020

- Designed and developed a simple food ordering application with restaurant listing, food item viewing and add-to-cart features using React, Node, Express and Mongo.

Natural Language Processing for sentiment analysis

Nov 2015 - Apr 2016

- Built a framework for analyzing user's feedback, posts, and tweets by using Natural Language Processing.

EDUCATION

Sriram Engineering College – Anna University

B.E – Computer Science Engineering 2012 - 2016

- Main coursework: Database Systems, Operating Systems, Networks, Software Engineering.

TECHNOLOGIES

Languages: Java, TypeScript, JavaScript, C#
Backend: Spring Boot, REST APIs, Microservices, Node.js
Frontend: React, Redux, Next.js, HTML, CSS
Testing: JUnit, Jest
Cloud: Azure DevOps, AWS
Databases: SQL Server, MongoDB
Concepts: Data Structures, Design Patterns, System Design

ACHIEVEMENTS

- Got "IChamp" award in Accenture, out of 45 developers.
- Got "Excellence Award" **twice** in Novac Technology Solutions, one given for extraordinary performance in a quarter, out of 60 developers.
