SHIVAM BAGHEL

DevOps Engineer

+91 7895922245 | shivambaghel74@gmail.com

Objective

To leverage 5+ years of DevOps & Cloud experience in AWS, Kubernetes, and CI/CD automation to drive scalable, secure, and reliable infrastructure, while mentoring teams and achieving operational excellence.

Core Skills

CI/CD & Version Control:-- Jenkins, GitLab, GitHub, Bitbucket, AWS CodePipeline
IaC & Automation:-- Terraform, CloudFormation, Ansible, Bash, Python
Cloud Platforms:-- AWS, Azure, DigitalOcean
Containers & Orchestration:-- Docker, Kubernetes, Helm, EKS, ECS
Monitoring & Logging:-- Prometheus, Grafana, ELK, Graylog, Nagios, Zabbix, CloudWatch
Security & Compliance:-- DevSecOps, SonarQube, IAM, WAF, VAPT, Secrets Manager
Databases/Storage:-- MySQL, RDS, Redis, Redshift, S3, ElasticCache
Networking/Serverless:-- VPC, Route53, API Gateway, ALB/NLB, CloudFront, Lambda

Professional Experience

Rezo.AI – DevOps Engineer | Jun 2025 – Present

Challenges: Manual deployments slowed releases, chatbot infra struggled with peak scaling, no voice integration, DB latency, poor monitoring.
Actions: Automated infra with Terraform & Ansible, containerized microservices with Kubernetes+Helm, built CI/CD pipelines (Jenkins & GitLab), integrated Asterisk IVR, optimized MySQL (replication/indexing/backups), strengthened monitoring with Prometheus, Grafana, Nagios, Graylog.
Impact: Deployments cut from hours → **<30 mins**, uptime **99.9%**, MTTR down **50%**, workload reduced **35%**, DB performance boosted **40%**.

Goognu Data Services – DevOps Engineer | Feb 2024 – Jun 2025

Projects Handled: Hindustan Times, NimbusPost, Shipyaari, INSEE Cement, TripClap

Challenges: AWS apps lacked consistency, scaling issues, fragmented monitoring, manual risks, compliance gaps.
Actions: Managed AWS infra (EC2, EKS/ECS, RDS, Redis, S3, ASGs, ALB/NLB, Lambda), automated with Terraform & Ansible, built CI/CD (Jenkins & GitLab), containerized with Docker & Kubernetes, centralized monitoring (ELK, Grafana, Graylog, Prometheus), improved DevSecOps, IAM, event-driven pipelines.
Impact: Deployment errors reduced **70%**, ensured compliance, achieved near zero downtime, faster releases, real-time monitoring insights.

Shodhshala Innotech Pvt Ltd – Linux Admin / DevOps | Jul 2020 – Feb 2024

Challenges: Manual server admin caused downtime, poor monitoring, weak security, unreliable backup.
Actions: Managed Linux servers (users, LVM, FS, patching, backups), automated tasks with Bash/Python, configured Apache/DNS/FTP/NFS/Samba, managed AWS infra (EC2, VPC, IAM, ALB, CloudWatch, Kibana), built monitoring with Nagios/Zabbix/ELK, hardened security, standardized disaster recovery.
Impact: Uptime improved **92%** → **99%**, manual workload cut **30%**, faster recovery, risks mitigated.

Educatio

B.Com, DBRAU University, Agra (2018)
12th (CBSE) – 2015 | **10th (CBSE)** – 2013
