PROFESSIONAL SUMMARY

Technical Leader in Backend Engineering with 10+ years of experience building and scaling distributed, cloud-native systems across BFSI, retail, and e-commerce. Expertise across the backend stack—including microservices, event-driven architectures, data platforms, and cloud —with a strong focus on system design, scalability, and delivering highly scalable business-critical platforms.

SKILLS

Languages: Java (8,11,17,21), Kotlin , Python(basic), SQL (intermediate)
Frameworks, Testing & Tools: Micronaut, Spring Boot, FastAPI, JPA, Project Reactor, JUnit, Mockito, Postman, Jmeter
Databases: Cassandra, MySQL, PostgreSQL, Redis, Snowflake, MongoDB, SybaseIQ, Elasticsearch
Messaging, Caching & logging : Apache Kafka, Redis, ELK, Grafana
Web Services & Deployment: AWS, Azure, Docker, Kubernetes, Jenkins, Git, REST, GraphQL
Practices: System Design, DSA, Design Patterns, Agile, TDD & BDD, SOLID principles, Debugging and RCA

WORK EXPERIENCE

Blue Yonder | Technical Lead (Manager) *Apr 2025–Present*

- Orchestrated machine learning-based slotting enhancements, boosting warehouse picking speed and cutting down on labor expenses across large-scale fulfillment locations, with a 20% throughput improvement.
- Designed and led an API-driven rules framework for item-location constraints, improving space utilization by 20% and reducing placement violations by 30% across enterprise-scale warehouse workflows.
- Influenced multi-team roadmaps through technical leadership, delivering features that increased customer engagement by 20%.

Target Corporation | Senior Engineer (Backend) *Nov 2022–Apr 2025*

- Developed **Target.com** digital Lists capabilities, building scalable APIs and event-driven microservices using Kotlin, Micronaut.
- Partnered with product and engineering stakeholders to align cross-team technical execution, delivering platform capabilities that increased guest engagement by 20%.
- Architected and governed large-scale PySpark ETL pipelines, enabling high-performance migration and processing of 75M+ user data records.
- Set engineering quality standards through design reviews and mentorship, reducing production defects by 15% across teams.

Publicis Sapient | Senior Associate (Investment Banking) *Mar 2021–Oct 2022*

- Implemented backend systems at **Goldman Sachs** supporting high-volume FX and trading workflows, processing millions of transactions daily with low-latency and high reliability.
- Established automated testing strategy using Cucumber, JUnit, and Mockito, increasing test coverage by 35% and reducing production incidents by 20%.

Apexon | Senior Software Engineer *Aug 2019–Mar 2021*

- Scaled AWS-based Spring Boot microservices, with 99.95% availability, and supporting millions of requests across core systems.
- Drove engineering excellence through mentorship, increasing team productivity by 20% and upskilling team members.

Barclays | Developer *Nov 2018–Jul 2019*

- Orchestrated REST API infrastructure for **Barclaycard UK** microservices, slashing server response latency by 25% by optimizing high-traffic backend services and reducing MTTR of service disruptions by 35%.
- Optimized high-traffic backend services, cutting server load by 30% and improving response latency by 25%.

Infosys | Senior Systems Engineer *Jan 2015–Nov 2018*

- Modernized and supported J2EE and Spring enterprise applications for BFSI and manufacturing clients, including **HSBC** and **Toyota Motors**.

PROJECTS

Slotting Optimization (WMS)| Java 21, Kotlin, Micronaut, Kafka, Snowflake, Redis, Azure, REST APIs *Present*

- Directed design and development of WMS slotting services, reducing solver inputs and improving optimization speed.
- Delivered critical enhancements on Item-moves and location clustering to improve warehouse efficiency and reduced labor cost.

Lists & Registries | Kotlin, Micronaut, Kafka, Cassandra, PySpark, Docker, REST, GraphQL, Microservices *Apr 2025*

- Owned end-to-end implementation of Target.com's Lists and Registries platform, enabling shopping lists, wishlists, and registries and driving measurable sales conversions.
- Managed the full platform lifecycle from architecture and development to deployment and optimization—ensuring scalability and reliability during peak traffic events.

Private Wealth Management | Java 8 Kafka, Vert.x, REST APIs, RxJava, SybaseIQ, Docker, Git *Mar 2022*

- Architected and built a real-time order management platform for **Goldman Sachs** Private Wealth Management, supporting multi-asset trading workflows across equities, bonds, and mutual funds, and processing millions of transactions daily.
- Optimized order processing for low latency and high throughput, enabling reliable transaction handling for high-volume trading.

EDUCATION

B.TECH - Electronics & Communication ***Dr. A. P. J. Abdul Kalam Technical University***
