Top Skills

Data Engineering Skills –
ETL Processes (Batch and Stream), Data Warehousing, Data Lake, Data pipelines, Cloud-native Design, Data Governance & Security, Big Data

GCP Cloud Resources – Pub/Sub, Big Query, Cloud Function, Cloud Run, App Engine, Cloud Bucket, Cloud SQL, Firestore/Datastore, Dataflow, Vertex AI

Aws Cloud Resources – Lambda, S3 Bucket, Dynamo DB, Cloud Front, Route 53

Programming & Frameworks
Python, SQL, Java, AngularJS

DevOps & Cloud:
CI/CD Pipeline

Data Visualization:
Power BI, Qlik Sense

Certifications

GCP –Professional Cloud Architect
GCP –Professional Data Engineer
GCP –Associate Cloud Engineer

Current Learning

Dynamic Programming using python
Python: Pandas,Numpy
Apache Kafka, Apache Airflow

Parimal Kumar Verma

Data Engineer | Cloud Computing | GCP & AWS Specialist |

Custom Software Engineering Team Lead at

Accenture

Bangalore

Summary

A dynamic and results-oriented GCP & AWS Data Engineer and Architect with 7+ years of experience in designing, developing, and optimizing data-driven cloud solutions. Skilled in ETL pipeline design, data lake architecture, real-time analytics, and AI-driven automation across GCP and AWS ecosystems.

Expert in Agentic AI and GenAI integrations, building intelligent, self-healing data systems that enhance reliability, efficiency, and decision-making. Proven leader with a strong background in cross-functional collaboration, team mentoring, and delivering enterprise-grade, scalable cloud applications.

Experience

Accenture

Custom Software Engineering Team Lead
October 2021 - Present
Bangalore Area, India

Competence:

* Spearheading the development of data-driven and AI-powered cloud solutions using GCP (BigQuery, Pub/Sub, Cloud Function/Cloud Run, App Engine, Cloud Bucket, Cloud SQL, Firestore/Datastore, Dataflow, Dataproc, Vertex AI, Compute Engine, GKE, Bigtable, Cloud CDN. VPN, Cloud Composer, Airflow, Dataprep, Looker, IAM, Data Catalog) and AWS (Lambda, S3 Bucket, DynamoDB, Cloud Front, EC2, Route 53, ECS).
  Frontend: Angular 20, HTML5, CSS3, TypeScript, JavaScript (ES6+)
  Backend: Java 21 (Backend), RESTful APIs
* Designed and implemented scalable ETL pipelines integrating heterogeneous data sources into data lakes and warehouses for analytics and ML models.
* Automated and optimized data ingestion workflows, reducing processing time by 40% and increasing pipeline reliability across multi-environment deployments.

* Oversaw full-stack development (AngularJS, Java, NodeJS), and data visualization using Qlik Sense, Power BI driving actionable insights from large-scale datasets.
* Engineered an Agentic AI–driven anomaly detection framework integrating GenAI and ML models to autonomously analyze data behavior, detect anomalies in real time, and generate intelligent alert insights for proactive decision-making.
* Developed an AI- and GenAI-powered self-healing data pipeline leveraging ML-based predictive modeling and historical configuration intelligence to auto-recover failed Kafka and connector workflows, ensuring continuous data reliability and system resilience.
* Drove initiatives to improve team collaboration, including organizing events, while also fostering innovation through automation and cross-functional synergy.

Noodle.ai

Data Engineer

October 2019 – October 2021

Bangalore Area, India

Competence:

* Developed Python scripts for data extraction, transformation, and visualization, enhancing the accuracy and speed of reporting processes.
* Automated data pipelines, reducing manual interventions and streamlining workflows by designing reusable frameworks for multiple projects.
* Identified and addressed data quality issues, contributing to cleaner, more reliable datasets through improved validation, processing techniques, and continuous monitoring.
* Maintained and optimized SQL queries for performance tuning, ensuring scalable data architecture to support large-scale machine learning initiatives.

ZS Associates

Business Technology Analyst

March 2019 – August 2019

Pune Area, India

Competence:

* Collaborated with cross-functional teams to design and implement data solutions for the pharmaceutical industry, leveraging SQL for reporting and advanced data analysis.

* Translated complex business requirements into SQL queries, delivering meaningful reports and actionable insights that support strategic decision-making for clients.

Accenture

Associate Software Engineer

March 2018 – March 2019

Bangalore Area, India

Competence:

*Contributed to application development using ASP.NET and SQL Server, adding

new features and optimizing existing functionality to improve performance and user experience.

* Supported backend database management and integration, ensuring seamless application functionality through data-driven solutions.

Education

B.Tech in Electrical and Electronics Engineering (CGPA: 8.28/10)

Vellore Institute of Technology, Vellore (2013-2017)

Higher Senior Secondary (67.40%)

Delhi Public School, Ranchi (2011-2013)

Senior Secondary (CGPA – 10/10)

DAV Public School, Jamui (2011)

EXTRA CURRICULAR ACTIVITIES

*Founder of PATHSHALA, a community initiative for underprivileged children's education.

*Runner-up in Inter-College Volleyball Championship.

*Enthusiast in singing, guitar, and sketching.

Achievements

* Secured a top 10 rank while representing Bihar at the 18th National Children's Science Congress.
