Soumyakanta Satapathy

Phone: +91 9066294806 | E-mail: soumyakantasatapathy654@gmail.com

To leverage expertise in **software architecture, mobile & enterprise application development, and end-to-end SDLC management** to drive innovative technology solutions, optimize processes, and lead high-performing cross-functional teams toward delivering scalable and business-aligned outcomes.

CORE COMPETENCIES

- Mobile Application Architecture & Development
- Flutter & Dart Specialist
- Agile & SDLC Expertise
- Requirement Gathering & Analysis
- Client & Stakeholder Engagement
- Project Planning & Execution
- Team Leadership & Mentorship
- Cloud Integration & API Development
- Testing & Quality Assurance
- UI/UX Implementation & Modern Design Principles
- Database & Offline Data Management
- Version Control & CI/CD Practices
- Advanced Android/iOS Frameworks
- Performance Optimization & Scalability

SOFT SKILLS

- Executive Communication & Influencing
- Strategic Decision-Making & Judgment
- Change Leadership
- People Development & Mentorship
- Resilience, Accountability & Ownership

EDUCATION

2013

B.Tech. / B.E.

Biju Patnaik University of Technology (BPUT)

PROFILE SUMMARY

- **Seasoned Mobile & Software Architect with 12+ years of experience** in driving end-to-end development of enterprise and consumer-grade applications across Android, iOS, and cross-platform frameworks.
- Proven expertise in **Flutter, Dart, Kotlin, Swift, and native SDKs**, delivering scalable, high-performance, and user-centric applications.
- **Adept at leading cross-functional teams, mentoring developers**, and fostering agile practices to accelerate project delivery and enhance code quality.
- **Strong command over SDLC**, from requirement analysis, architecture design, coding, testing, deployment, to post-release maintenance and optimization.
- Skilled in **integrating RESTful APIs, third-party services & cloud solutions**, ensuring seamless connectivity and robust application workflows.
- Proficient in **modern design patterns (MVVM, BLoC), state management** & offline-first solutions with Room/SQLite databases to support high availability.
- Success in **performance tuning, debugging, and optimizing applications** to achieve maximum scalability, responsiveness, and UX efficiency.
- Extensive experience in **defining and executing E2E software architecture, aligning application design** with business goals, and managing the complete SDLC lifecycle—from requirement analysis, system design, and coding to testing, deployment, and post-release maintenance.
- Hands-on **experience in client engagement, requirement gathering**, and translating business objectives into actionable technical solutions.
- Steered **innovation, code quality & continuous improvement**, leveraging CI/CD, version control, and automated testing to deliver enterprise-grade solutions.

CAREER TIMELINE

Since 2024 — Architect | Persistent Systems

2021-2023 — Staff Engineer | Cambium Networks

2019-2021 — Senior Software Engineer | L&T Technology Services

2017-2019 — Android Developer | Smart Management Computer Programming Pvt. Ltd

2013-2017 — Software Engineer | XPRO Solutions

TECHNICAL SKILLS

- **Mobile Platforms & Development:** Mobile Application Development, Android, iOS, Flutter
- **Programming Languages:** Kotlin, Dart, Swift
- **Architecture & Design Patterns:** MVVM, Data Binding
- **Android Frameworks & Libraries:** Jetpack (Jetpack Compose, Room), Retrofit, SQLite, RxJava, Dagger
- **Development Tools & IDEs:** Android Studio, Git
- **Testing & Quality Engineering:** JUnit, Mockito, Code Quality, Crashlytics
- **Backend & Cloud Services:** Firebase
- **Delivery & Methodologies:** Agile, Application Deployment

WORK EXPERIENCE

Architect | Persistent Systems | Mar 2024 – Till Date

- Engaging with clients and stakeholders to capture business requirements, project objectives, and technical constraints, translating them into actionable architectural solutions.
- Leading solution design and technical strategy, creating feasibility studies, design proposals, and cost/time estimations to align with client expectations and project goals.
- Developing robust architecture blueprints leveraging CAD tools, Flutter, Dart, Google Android SDK, and hand-drawn designs, ensuring compliance with standards, safety regulations, and environmental guidelines.
- Designing, building, and optimizing advanced mobile and web applications for Flutter and native Android/iOS platforms, integrating APIs and external data sources for seamless functionality.
- Driving quality and performance enhancements, performing bug analysis, code reviews, and unit testing to ensure reliability, usability, and maintainability
- Preparing technical documentation, including specifications, working drawings, and system design records, to facilitate development, deployment, and maintenance.
- Coordinating cross-functional teams like contractors, engineers & QA specialists, ensuring synchronized delivery across all project phases.
- Overseeing project lifecycle from concept to deployment, managing risk, monitoring milestones & delivering solutions on time and within budget.
- Championing client and user interactions, providing continuous updates, managing expectations, and ensuring alignment between technical delivery and business objectives.

Staff Engineer | Cambium Networks, Bangalore | Jun 2021 – Oct 2023

- Participated in the end-to-end Software Development Lifecycle (SDLC), encompassing requirement analysis, functional and technical documentation, coding, testing, and ongoing maintenance of applications.
- Documented and tracked software defects, providing detailed technical descriptions, evidence, and recommendations for resolution, while reviewing design specifications to ensure clarity and alignment with deliverables.
- Consistently met project deadlines and SLA targets without compromising quality, implementing short- and long-term plans to achieve process objectives efficiently.
- Led client and user interactions for requirement gathering, risk assessment, finalization of technical architecture, and effort/cost/time estimation, while coordinating project status and reporting.
- Designed and developed advanced applications on the Flutter platform, leveraging Google Android SDK, Flutter, and Dart to deliver cross-platform mobile and web solutions.
- Resolved application defects and optimized performance, improving responsiveness, stability, and overall user experience.
- Integrated and collaborated with external APIs and data sources, ensuring seamless connectivity and functional interoperability.
- Developed and executed unit tests for code robustness, addressing edge cases, usability, and overall application reliability.
- Delivered high-quality solutions that aligned with technical standards, client requirements, and industry best practices.

Senior Software Engineer | L&T Technology Services, Bangalore | Sep 2019 – Jan 2021

- Led and mentored a team of 4 engineers, addressing process bottlenecks and ensuring smooth project execution.
- Translated designs into high-quality, reusable code and libraries, enabling future scalability and maintainability.
- Delivered end-to-end software solutions, managing all phases of the SDLC, including requirement analysis, system study, design, coding, testing, documentation, and deployment.
- Planned and coordinated application maintenance, enhancements, and release schedules, while preparing and reviewing functional requirement documents.
- Collaborated with stakeholders to gather business requirements, analyze systems, and finalize techno-functional specifications.
- Optimized applications to eliminate bottlenecks and maximize performance, scalability, and reliability.
- Conducted code reviews and enforced clean code architecture in Agile development environments.
- Maintained continuous client communication, providing updates and ensuring alignment with project goals.

Android Developer | Smart Management Computer Programming Pvt. Ltd., Bangalore | Apr 2017 – Jun 2019

- Designed, developed, tested & deployed Android applications, translating business requirements into robust, high-level code.
- Applied clean code architecture and design patterns, reducing development time and enhancing delivery speed.
- Conducted self-code reviews, debugging, and corrections to ensure application stability and quality.
- Collaborated with cross-functional teams to identify, design, and implement new features.
- Managed bug fixes, performance enhancements, and optimizations to improve application reliability and user experience.
- Acted as a technical point of contact for clients, understanding requirements, resolving issues & reporting project progress to managers.
- Supervised test plan creation and execution, ensuring all deliverables met client standards.

Software Engineer | XPRO Solutions | Sep 2013 – Mar 2017

- Collaborated within a development team to translate design specifications into high-quality, maintainable code.
- Analyzed workflows and business requirements to identify gaps and implement effective solutions during the development lifecycle.
- Provided progress updates and technical reports to the Technical Manager, ensuring transparency and alignment with project goals.

For project details, kindly refer to the Annexure section.

ANNEXURE

PROJECTS

OneApp | 385 Days
- Enabled centralized management of Zebra devices, including scanners, printers, and mobile computers.
- Facilitated seamless installation, scheduling, and tracking of software updates across devices.
- Supported real-time collaboration among front-line workers through integrated messaging and workflow tools.
- Provided secure access to data collected from Zebra devices for operational insights and decision-making.
- Providing support for Wearables, Mobile, Tablet & Web Application.
- **Technologies:** Flutter, WebSocket, Isolates, Clean Code Architecture, Hive, Offline Storage Feature

cnArcher | 462 days
- Developed a mobile application to communicate with device LAN ports over Wi-Fi, assisting in installation of PMP, ePMP, and cnRanger subscriber modules.
- Configured network and security settings, ensuring subscriber modules were ready to connect with access points.
- Implemented SNMP communication, server API integration, and adhered to modern UI design standards.
- **Technologies:** Flutter, BLoC, SNMP, Web Services, Retrofit 2, Room DB, Third-Party Libraries

cnArcher 60 GHz | 151 days
- Extended cnArcher functionality to support cnWave subscriber module installations.
- Integrated Wi-Fi-based device communication, offline storage, and API connectivity.
- **Technologies:** Flutter, Android, iOS, SNMP, Web Services, Retrofit 2, Room DB, Third-Party Libraries

Next Gen App | 153 days
- Developed an app to track & configure controllers on each floor of a building, ensuring proper IP and serial number assignments.
- Implemented master-client controller connectivity and automated data reporting to administrators via email.
- **Technologies:** Android, MVVM, Dagger 2, RxJava, Retrofit 2, Room DB, Web Services, Multi-language Support, Wi-Fi

Electrical Safety App | 152 days
- Built a safety-focused application for disaster management**,** storing and reporting building, power, and security information.
- Supported offline data capture, multi-language UI, and Bluetooth integration for on-site safety checks.
- **Technologies:** Android, MVVM, Dagger 2, RxJava, Retrofit 2, Web Services, MongoDB, NodeJS, Room DB, Bluetooth

Shovest Club | 243 days
- Developed an e-commerce and travel tax-saving app for users to track orders, provide reviews, and purchase store items.
- Integrated ratings, branch information, and PayPal payment gateway.
- **Technologies:** Android, Kotlin, Core Java, iOS, Swift, MVVM, Dagger 2, RxJava, Retrofit 2, Web Services, MySQL, PHP, PayPal

Wallpost Software | 518 days
- Created a cloud-based ERP platform tracking employee tasks, performance, HR, finance, and CRM operations.
- Enhanced organizational visibility into employee performance and company metrics.
- **Technologies:** Android, Kotlin, Core Java, MVVM, Dagger 2, RxJava, Retrofit 2, Web Services, MySQL, PHP

Smart School Application | 394 days
- Developed a school management app providing real-time access to grades, attendance, homework, exams, bus tracking, and admission details; ensured data accessibility, offline support, and secure integration with school systems.
- **Technologies:** Android, Core Java, OkHttp, Web Services, MySQL, PHP, Third-Party Libraries

Avanti Markets | 457 days
- Built a mobile payments and account management app for market purchases, enabling balance checks, reloads, offers, and feedback submission.
- Integrated **secure payment processing via PayPal**.
- **Technologies:** Android, Core Java, Web Services, MySQL, PHP, Third-Party Libraries, PayPal

Box Office India | 304 days
- Developed a news aggregator app for box office updates, with offline reading and bookmarking capabilities.
- **Technologies:** Android, Core Java, Web Services, MySQL, PHP, Third-Party Libraries
