**PASUPULETI VINOD**

**Phone: +91-9701550994** **Email: pasupuletivinod9@gmail.com**

## Professional Summary:

- Having 9+ years of total experience
- Having experience as a **Web/Application Developer and coding** with analytical programming using **JavaScript, Python, Django, and Flask**.
- Experience in developing a User Interface using **HTML**
- Good understanding of front-end technologies, such as **JavaScript, HTML5, and CSS3**
- **Udacity Certified Full Stack Web Developer with Python**
- Experience in using Design Patterns such as MVT and frameworks such as **Django, Flask**
- Experience in handling data with **Pandas** and **Numpy**
- Experience in using **Apache Airflow** for **Authoring**, **Scheduling,** and **monitoring** the Jobs
- Understanding of Python concepts like **Lists, Strings, Indexing, Slicing, Tuples, and Dictionaries**
- Familiar with Python object-oriented concepts like **Classes, Overloading, and Reusable Modules**
- Collaborate with teams to follow the best technical design and approach for development
- Involved in the Design, Development, and Maintenance of Applications.
- Involved in the development of the applications.
- Experienced in working with various Python Integrated Development Environments **like IDLE, Visual Studio Code, PyCharm, and Sublime Text 3**
- Familiarity with **Django ORM (Object Relational Mapper)**
- Excellent knowledge of **Regular Expressions, File Handling, Modules, and Functions**
- Flexibility to adapt changes based on project requirements
- Good knowledge and work experience with **MySQL, SQLAlchemy, Flask ORM**
- Supported project activities at peak hours by extending the work hours
- Good experience in Google Docs, Sheets, Slides, MS Office
- Good experience with tools **VeraCode**, **SonarQube**, **Sonar Scanner,** and **Sonar Lint**
- Good experience in **API Testing with Swagger UI**
- Good with Agile and Scrum methodologies

## Experience Summary:

### Project #1

| | | |
|---|---|---|
| **Title** | : | **Google Chrome Web Store - Google DCR High Risk Pub Items** |
| **Client** | : | Google |
| **Company** | : | Cognizant Technology Solutions (CTS) (2024-Currently working) |
| **Environment** | : | App.Script, Chrome OS, Chrome Extensions, Athena, Navitron, Red Shell |
| **Role** | : | Team Lead |
| **Description** | : | Google Chrome Web Store is a product where developers use to upload their |

extensions into the store. For developers who uploaded extensions, we are going to review their extensions. Our job is to detect, suspect, and identify the bad extensions that contain malware, seed phishing, policy violations, and identify new malware patterns.

**Roles & Responsibilities:**

- My role is to track the team members' activities daily
- Supporting the team members in reviewing the extension and tracking their extension details daily
- Discussing with the Team about new malware and the latest updates
- **Built** an application for instead of using multiple sheets in one centralized portal, where team members can quickly access and track their activity information using **Google App.Script.**
- Built a Chat.Bot 🤖 application for reviewers' assistants using Google GCP, GCS, Vertex AI, Agent Builder
- **Built** an application using **App. Script** & **RegEx** for identifying one of the policy violation scenarios called **Keyword Stuffing** in CWS.

## Project #2

**Title** : **WM morrison's supermarket limited**

**Client** : Morrisons UK client

**Company** : Cognizant Technology Solutions (CTS) (2023-2024 March)

**Environment** : Python, Flask, AWS, ReactJS, GCP, Jenkins, SonarQube, BitBucket, Java

**Role** : Technical Lead Developer

**Description** : WM Morrison's Supermarket Limited is the fifth largest supermarket chain in the United Kingdom. The company had 497 supermarkets across England, Wales, and Scotland. In Morrisons, we have multiple towers, including Online, Retail, and Marketing, each with its own support team. We have worked under the online tower. Online tower focuses on Online order-related applications (eg, if a person orders something through the internet, then it comes under online tower)

**Roles & Responsibilities:**

- Requirements gathering from the client and translating the same into Application programming
- Designing the solution for the project/program
- Worked on upgrading to Python latest version
- Worked as SPOC for production releases
- Worked in development and SonarQube fixing

## Project #3

**Title** : **Xtractly**

**Client** : CoreLogic US Client

**Company** : Tata Consultancy Services (TCS) (2021-2023)

**Role** : Developer

**Description** : Making an automation process for a data entry application. ML models will extract the data from image documents (tif, mortgage documents). Keying all that information into the PostgreSQL DB and extracting data to text files, and will transmit all the files to the client.

**Roles & Responsibilities:**

- Requirements gathering from the client and translating the same into Application programming
- Designing the solution for the project/program
- Development of an application using the required tools and technologies
- Worked in development and manual Unit testing

## Project #4

**Title** : **App Migrate**
**Client** : Pilot Project (now it's deployed in TCS Cloud)
**Company** : Tata Consultancy Services (TCS) (2021-2023)
**Environment** : ReactJS, NodeJS, MongoDB, Google Cloud Platform, Jenkins, SonarQube, GIT
**Team size** : 4
**Role** : Development
**Description** : Accelerator to move the application workloads from Cloud Foundry to Kubernetes.

**Roles & Responsibilities:**

- Requirements gathering from the team and translating the same into Application programming
- Designing the solution for the project/program
- Development of an application using the required tools and technologies
- Worked in development and manual Unit testing

## Project #5

**Title** : **Collibra Data Catalogue**
**Client** : US Client
**Company** : Tata Consultancy Services (TCS) (2021-2023)
**Environment** : ReactJS, NPM, Bootstrap V5, nginx, SpringBoot, Maven, Pivotal Cloud Foundry, PostgreSQL
**Team size** : 4
**Role** : UI Development
**Description** : Led the implementation of the Data Catalogue project, a collaborative effort to enhance the accessibility of complex, unstructured backend data from Collibra. Successfully migrated targeted data to a PostgreSQL database and developed a user-friendly frontend using ReactJS.

**Roles & Responsibilities:**

- Requirements gathering from the team and translating the same into Application programming
- Implemented frontend solutions using ReactJS for intuitive user interfaces
- Utilized RestAPIs to extract and transform data from Collibra to a PostgreSQL database.

- Designing the solution for the project/program
- Development of an application using the required tools and technologies

## Project #6

**Title** : **Payment Systems for Credit Unions (PSCU)**
**Client** : US Client
**Company** : MBIT Computraining Pvt.Ltd (2020-2021)
**Environment** : Python 3.7, Pandas, Windows 10
**Team size** : 4
**Role** : Python Developer
**Description** : Created an automation process to gather data from key PSCU systems, aggregate that data, and insert/update that information into the **Sparx Enterprise Architect Repository**. A total of 18 components/packages (as referred to in I Timeline section) will be in scope for automation and include features like logging, Impact assessment, Rollback, Traceability. The automation process includes the retrieval, transformation, and import of data into the Sparx database. External systems to retrieve the data include Active Directory, Ping, Prime DB, TMC DB, TIMS/Service Now, AppDynamics, Splunk, Bitbucket/GIT, Mobius, Solarwinds, and SonarQube. Python scripting language for data retrieval, transformation, validation, and loading data to the SPARX database, leverage PSCU automation tools to schedule the scripts as per required frequency, UAT, and Production rollout support.

**Roles & Responsibilities:**

- Requirements gathering from the client and translating the same into Application programming
- Designing the solution for the project/program
- Development of an application using the required tools and technologies
- Worked in development and manual Unit testing

## Project#7

**Title** : **More Than Captcha (MTCA)**
**Client** : Johnny Chunnks
**Company** : Sysvine Technologies (2019-2020)
**Environment** : JavaScript, jQuery, NodeJS, MySQL, Windows 7, Visual Studio Code
**Role** : Developer
**Description** : MoreThanCaptcha is an ML-based smart captcha service that focuses on protecting websites, web applications, forums, blogs, and web pages over the internet. The patented ML algorithm is implemented using Scikit-learn in MTCaptcha, providing 99.9% fool-proof protection against hacking the website. MTC acts as a gateway to other systems, and it can be integrated on any website section. It will protect the service-integrated sites by providing security against attackers and bots. MTCaptcha is designed smart enough to tell humans and bots apart while still providing optimal ease for humans to pass through the security checks of MTCaptcha without difficulty. MTCaptcha protects the site against scraping and crawling bots. We are aiming for this service to be tightened with even more advanced security enhancements that will replace the Google reCAPTCHA services. The services are also popular in China, where Google has very limited access. As the name suggests, it provides more than captcha services; it provides analytics, usage, and pattern analysis through a

cloud-based console. Enterprises can monitor the way their CAPTCHA is being used and set various ways of billing too. Technologies: Core JS, React, TypeScript, Bootstrap 4, D3 JS, Chart JS, jQuery, Backbone JS Templating, Underscore JS, Java Server Pages, NPM, Maven, Jenkins, Nginx, Express, Node, Java, MySQL, Nginx, Route 53

**Roles & Responsibilities:**

- Involved in front-end designing using **HTML, CSS, JavaScript, and Bootstrap**
- Worked on Resolving Bugs in the MTCaptcha Administration site
- Involved in handling the Admin Dashboard for the MTCaptcha Administration site

## Project #8

**Title** : **Employee Management System**
**Client** : APSSDC (Andhra Pradesh State Government)
**Company** : Andhra Pradesh State Skill Development Corporation (2015-2019)
**Environment** : Python 3, Django, Windows 7
**Team size** : 7
**Role** : Developer
**Description** : Employee Management System is mainly developed for employee registration it is based on IRIS Authentication, and in this we have maintained their attendance by IRIS kit and track them by IRIS based attendance (When they will come and leave). Project also contains employee transfer system and termination of employee. And their working and issue reports.

**Roles & Responsibilities:**

- Developed Project-wise, Course-wise, and Batch-wise reports generation
- Tracking system employee activities throughout the entire day in the state
- Developed back-end components to improve responsiveness and overall performance
- District-wise user creation

## Project#9

**Title** : **Krishna Pushkaralu Survey**
**Client** : A.P. Pushkaralu Govt. Team
**Company** : Andhra Pradesh State Skill Development Corporation (2015-2019)
**Environment** : Python 3, Flask, MySQL, Windows 7, PyCharm
**Role** : Developer
**Description** : Krishna Pushkaralu Survey project developed based on the Python platform. Through this site, A.P. Pushkaralu Govt. The team can estimate the pilgrim count at each Ghat. This makes it flexible for the volunteer team to manage pilgrims very easily, without any disturbance & crushes in Pushkara Ghats. We generated individual reports & day by day reports for each Ghat. This makes more efficiency for Krishna Pushkaralu.

**Roles & Responsibilities:**

- Involved in front-end designing using **HTML, CSS, JavaScript, and Bootstrap**
- Designed and developed a data management system using **MySQL**.
- Designed the Web application using **Python and the Flask Web Framework** pattern to make it extensible and flexible
- Responsible for **debugging and troubleshooting** the web application
- Build all database mapping classes using **Flask models, Flask ORM** (**SQLAlchemy**)
- Involved in the entire lifecycle of the project, including Design, Development, and Deployment, implementation, and support based on the requirement

**Educational Details:**

---

✔ B.Tech Computer Science and Engineering from Sri Venkateswara College of Engineering, Tirupati (JNTUA) with 66% during 2012 – 2015

✔ Diploma from Dr. Y.C. James Yen Rural Polytechnic College, Kuppam (SBTET) with 66% during 2008-2011

✔ SSC from Sri Venkateswara Children's High School, Tirupati, with 69% in 2008

**Other Qualifications:**

✔ Govt. of Andhra Pradesh Department of Employment & Training Provisional National Trade Certificate

✔ Percentage: 84%

✔ College : O.V.R I.T.C, Tirupati

✔ Branch: Mechanical (DIESEL)

✔ Completed: Apr 2012

**Technical Expertise:**

---

| | | |
|---|---|---|
| Programming Languages | : | Python 3x |
| Operating System | : | Mac and Windows 7, 10, 11 |
| Databases | : | MySQL, MS SQL Server |
| Web Technologies | : | HTML, CSS, JavaScript, jQuery, ECMAScript6, ReactJS App.Script |
| Application Servers | : | Apache Tomcat |
| Web Development Frameworks | : | Django, Flask |
| Cron Jobs Frameworks | : | Apache Airflow |
| Tools and IDEs | : | Visual Studio, Sublime Text 3, PyCharm, |

## Personal Details:

| | |
|---|---|
| Date of Birth | : 18 June 1993 |
| Languages Known | : Telugu, English |
| **Permanent Address** | : 2-1-125, Kola Street, Tirupathi,<br>Chittoor Dist – 517501, Andhra Pradesh (State) |
| **Passport No.** | **:** L4722896 (17 Sep 2023 Yet to renew) |

**Declaration:**

I hereby declare that the above information is genuine to my knowledge.
