Profile summary

A result-driven professional with over 6.9 years of experience in Supply chain management and digital banking domain.
Adept in backend development website design and maintenance, products from requirement analysis to system study, designing, coding, documentation and implementation, and optimization.
An effective leader with proven abilities in leading teams during the project phase guiding team members and enabling knowledge sharing among them.
Strong problem-solving and technical skills coupled with confident decision-making for enabling effective solutions leading to high client satisfaction.

- JAVA has been at the forefront of my experience for the last 7+ years.
- Strong Coding Skills - JAVA, Spring boot, microservices, SQL
- Expertise in Data structures, Algorithms and problem solving.

Skills: Java, SQL, Hibernate, Spring Boot, JUnit, Maven, GCP, Google Cloud Platforms, Microservices, Mockito, Spring Security, TDD, Problem Solving, docker, Kubernetes, Supply Chain, Multithreading, Multitasking, AWS, Broadleaf Commerce, Kafka

Work experience

Senior Engineer – Product & Platform Engineering | Altimetrik(Blackhawk Network) Jun 25 - Present

Project: Bloom & Cashstar Gift Card

Tech Stack: Java, Spring Boot Framework, REST APIs

- **API Development**: Design, develop, and maintain **Order, Submit, Payment, and Checkout APIs** for Bloom platform and related services.
- **Sanity Testing**: Perform **sanity checks** on all developed APIs to validate functionality and integration before release.
- **Microservices Architecture**: Build modular, reusable microservices using **Java (Spring Boot)** and integrate with front-end frameworks.
- Deploying and managing services in **AWS/GCP/Azure** using cloud-native components and **Kubernetes**.
- Implementing observability using **Prometheus, Grafana** defining **SLIs/SLOs** for reliability improvement.
- Integrating observability and automated testing into **CI/CD pipelines** using **Jenkins, GitHub Actions**.
- Collaborating with Product, SRE, and DevOps teams; mentoring junior engineers and driving engineering best practices.
- Advocating modern engineering practices and continuous improvement across the platform.

Senior Software Engineer – Infor Jul 2024 - Apr 2025

- •Implemented, monitored and enforced the continuous improvement of processes and metrics to ensure the engineering organization is creating high-quality products within predictable time frames.
- •Continuous improvement by investigating alternatives and technologies and presenting these for architectural review.

Software Engineer 2 – NCR Corporation Apr 2022 - Jun 2024

- AIC Chatbot, Dynamic Form Automation(DFA), GreenLight Business banking In

  NCR worked on multiple projects like
- •Developed scalable cloud-native microservices which got deployed to GKE and increased TPS by

  25%. •Supported team to react quickly to form updates which potentially increased CSAT score by 50%.
- •Developed new financial dynamic forms software and delivered the product two months ahead of schedule.
- •Designed and developed GreenLight microservice-based application for those below 18 and integrated the same with the NCR platform from scratch.
- •Worked with Chatbot and upgrades are done from Java 8 to Java 17. As well as fixed multiple production bugs.

Software Engineer – Infor Dec 2018 - Apr 2022

- Network Transportation Management(NTM) Java-based Web Application
- Being a part of the engineering team for downstream products, I worked on the following mandate:
- ●Designed and developed high-volume, low-latency applications for mission-critical systems and delivering high availability and performance.
- ●Own and drive successful development and delivery of the company's product initiatives, ensuring high-quality software products are delivered on time and within budget.
- ●Work effectively with the Product Management team to continuously improve the quality of the requirements, specifications, and other information essential to the creation of high-quality software products
- ●Create and implement strategies to continually upgrade the product(s) quality.
- ●Effective utilization of the resources available to optimize engineering capabilities that create and deliver quality products that map to the company's goals, objectives, and vision.

Education

B.Tech/B.E. | Computer Science & Engineering **2017**

Institute of Technical Education and Research, Bhubaneswar Grade - 8.6/10

Additional information

Hobbies: MMA, F1, Driving

Languages: Oriya, English, Hindi
