OBJECTIVE

DevOps & Middleware Engineer with 4+ years of experience in managing CI/CD pipelines, containerization, orchestration, cloud platform and administering middleware technologies. Seeking to leverage expertise in DevOps tools and middleware management to improve application performance, reliability and delivery speed.

WORK EXPERIENCE

Kiya.ai, Mumbai. **Associate Consultant (Jan 2026 – Present)**

Project – Cortek FX (BNP Paribas)

- Provided 24x7 global production support for FX electronic trading platforms (pricing, algo trading, STP) under Follow-the-Sun and on-call models, ensuring high availability and minimal client impact.
- Led incident, problem, and change management, coordinating with global teams, vendors, and stakeholders across APAC, EMEA, and US regions.
- Built, maintained, and optimized CI/CD pipelines using Jenkins, TeamCity, Bitbucket, Artifactory, automating builds, tests, releases, and rollbacks.
- Automated infrastructure, deployments, and operations using Ansible, Shell, Python, SQL; administered and tuned Linux/Unix and Windows systems.
- Implemented and customized monitoring, alerting, and capacity management using Geneos, Dynatrace, Grafana, Splunk, improving performance across application, middleware, database, and OS layers.
- Implemented cloud-native DevSecOps practices by integrating SAST/DAST, container & IaC scanning, secrets management, RBAC, Kubernetes security, compliance checks, and continuous monitoring into CI/CD pipelines for secure automated releases.
- Supported databases (Oracle, SQL Server), middleware and messaging (Autosys, MQ, CFT, SFTP), and network/ECN connectivity, including TIBCO Rendezvous multicast and packet analysis, with strong capital markets domain expertise.

Tata Consultancy Services Limited, Mumbai. **System Engineer (Jan 2022 – Dec 2025)**

Project – RBICIMS (RBI)

DevOps:

- Designed and implemented enterprise-grade IaC and automation using Terraform and Ansible (playbooks, roles, inventories, Vault, dynamic inventory) integrated with CI/CD pipelines for secure, scalable, repeatable deployments across Linux and cloud environments.
- Architected and managed Jenkins CI/CD pipelines (declarative Jenkinsfiles), migrating legacy freestyle jobs and integrating GitHub, webhooks, SCM, SonarQube, and Nexus for automated build, test, and container artifact management.
- Deployed, upgraded, and maintained Kubernetes workloads using Helm and manifests, managing cluster upgrades, etcd backup/restore, node scaling, patching, and ensuring high availability with minimal downtime.
- Implemented Kubernetes security and governance including RBAC, Network Policies, Pod Security, Jenkins folder-based access, secrets management, and enforced code quality and access controls.
- Led production support and incident management, troubleshooting pods, networking, and pipelines using kubectl, logs, monitoring dashboards, implementing HPA, Cluster Autoscaler, and automating health checks and recovery using Bash scripts and cron.

Middleware Admin:

- Installed, upgraded, and administered JBoss EAP/WildFly (standalone & domain), Apache HTTPD/JBCS, Nginx, and JDK across Dev, UAT, PROD, and DR environments; deployed enterprise applications and configured datasources/MySQL drivers.

- Managed reverse proxy, load balancing, virtual hosts, and multi-domain configurations using Apache HTTPD, Nginx, ALB, and NLB for high availability and scalability.
- Performed performance monitoring and troubleshooting using heap/thread dumps, nmon, and implemented Dynatrace for application and infrastructure observability.
- Delivered Production & DR support, executed DR drills, handled VAPT closures, backups, and environment synchronization to ensure security and service continuity.
- Provided Application Production Support (APS) by resolving P1/P2 incidents, collaborating with Dev/DB/Network teams, and supporting releases in Agile (SCRUM) environments.

CERTIFICATION

AWS Developer (MKTESN71WNRE105Z): EC2, Security groups, EBS, ELB, IAM, Route 53, VPC, RDS, cloud front, S3, SNS, Lambda, Cloud Watch.

Google Associate Cloud Engineer (Certification ID- rJHMjx)

Azure Administrator Associate (1790-7165).

SKILLS

Cloud Platform: AWS, GCP, Azure **CI/CD Tool:** Jenkins, Teamcity
Scripting and automation: Bash, cronjobs, Python, Autosys **Monitoring Tools:** Cloud Watch, nmon, JConsole, Dynatrace, Grafana, Prometheus, Geneos, Splunk
Configuration Tool: Ansible**,** Terraform**.** **Repositories**: GitHub, GitLab, Nexus, Bitbucket
Project Management Tools: Jira, Servicenow **Operating System:** Windows, Linux (RHEL)
Databases: MySQL, Oracle
Containers & Orchestration: Docker, Kubernetes, OpenShift
Application and Web Services: jbcs-httpd 2.x, apache-httpd-2.x, JBoss EAP 7.x / 8.x, WildFly 7.x / 8.x, Nginx, MQ
Virtualization: Oracle VirtualBox

EDUCATION

MBA in IT | Dr. DY Patil Vidyapeeth, Pune Maharashtra
June 2024 CGPA:8.33

BE in Mechanical | SKN Sinhgad college of engineering, Pandharpur Maharashtra
June 2021 Percentage: 77.92%
