Profile Summary

- Backend Engineer specializing in building **scalable APIs and services using Golang and gRPC**. Experienced in developing **core financial product features handling high-volume transactions**, troubleshooting production issues, and delivering **reliable, low-latency backend systems**. Adept at collaborating with cross-functional teams to design efficient solutions and optimize performance.

Experience - 5 Years

Fi Money — **Bengaluru, India**

Software Engineer – Backend — ***Feb 2023 - Present***

- Designed and developed scalable APIs and new product features using Golang and gRPC.
- **Built and optimized backend services** in **Golang and gRPC**, delivering high-throughput and low-latency APIs for wealth management products.
- **Developed core backend modules** powering features like **Deposit Accounts, US Stocks, Mutual Funds, and P2P investments**, ensuring scalability and reliability.
- **Diagnosed and resolved production issues** by performing root cause analysis, implementing fixes, and improving system stability.
- **Monitored daily transactions** and proposed design/architecture improvements to enhance system performance and reduce failure points.
- **Partnered with product managers, QA, and external vendors** to define API contracts, integrate services, and maintain backward compatibility.
- Strong expertise in **Golang, gRPC, SQL, Snowflake, Git, and debugging tools**, applied in building fault-tolerant services and maintaining operational SLAs.

FarEye Technologies — **Noida, India**

Solutions Engineer — ***Jan 2022 – Jan 2023***

- Developed and integrated logistics solutions using **Golang, SQL, REST APIs**, and the FarEye logistics platform.
- Collaborated with Development and QA teams to deliver solutions meeting client needs for **scalability and performance**.
- Led **product integrations**, customized solutions, and built **dashboards/visualizations** for enterprise customers.
- Acted as the primary point of contact for **customer issue resolution**, ensuring smooth deployments and faster troubleshooting.

TCS — **Hyderabad, India**

Cybersecurity Analyst — ***June 2019 – Jan 2022***

- Worked on **SIEM log analysis and server integrations** (Linux/Windows) using ArcSight Logger, SQL, and scripting.
- Automated monitoring and implemented **real-time alerting mechanisms** to strengthen security and server reliability.

Technical Skills

- **Languages & Frameworks:** Golang, Python, SQL, gRPC, Protobuf, REST APIs
- **Databases & Cloud:** PostgreSQL, Snowflake, AWS
- **Monitoring & Tools:** Grafana, Kibana, Git, JIRA, Postman

Education

Sreenidhi Institute of Science and Technology — **Hyderabad, India**

Computer Science (GPA**: 8.8/10**) — ***May 2015 – May 2019***
