Summary

Accomplished AI Product and Delivery Manager with 9+ years of experience leading cross-functional teams and delivering complex technology programs across IT, Cloud, Data, AI/ML, Finance, Telecom, and Enterprise Software domains. Expert in AI/GenAI product implementations, cloud migrations (AWS & Azure), SaaS solutions, and digital transformation initiatives, with hands-on experience in project and product lifecycle management using Agile, Waterfall, SAFe, Kaizen, and Lean methodologies. Proven track record in program delivery, system modernization, process optimization, and AI-enabled solutions, driving measurable business impact through improved operational efficiency, reduced latency, revenue growth, and ROI optimization. Skilled in stakeholder management, PRD development, requirement analysis, RAID and KPI monitoring, infrastructure audits, vendor coordination, and risk mitigation, with a strong client-focused and data-driven approach. Demonstrated success in managing budgets up to $3M, leading teams of 10–90+ members, and implementing Agile transformations, Scrum adoption, and DevOps integration to accelerate delivery, enhance product quality, and boost team productivity. Proficient in statistical modeling, algorithms, and data analytics, consistently delivering high-quality, business-oriented solutions while adapting to emerging technologies. Recognized for strategic thinking, execution excellence, and innovation, consistently achieving 25–40% improvements in operational efficiency, productivity, and customer satisfaction.

Skills & Competencies

- Project / Delivery Management
- Product Delivery / MVP Launch
- Agile / Scrum / Kanban / Kaizen
- Financial Markets / Capital Markets
- Strategic Planning / Gap Analysis
- Process Driven / Service Improvement
- Problem-solving / Critical thinking
- OKRs / KPIs / Retrospective Analysis
- SDLC / ITIL / ITSM
- Client / Stakeholder Management
- Automate tasks
- Thorough Research

Technical Skills

- ML / DL / Data Science / GenAI
- Python & SQL / Statistics
- Cloud Native Services (AWS / Azure)
- Google Workspace / Microsoft Office suite
- IBM SPSS / Data Analytics
- DevOps / Cloud / DevSecOps / VAPT
- Microsoft Exchange
- Google Colab / Jupiter Notebook / GitHub
- Azure DevOps / Jira / Atlassian / Confluence
- MPP / Gantt Chart / Smartsheet
- Citrix / VMWare / Linux
- ServiceNow / Power BI / Tableau / SSRS

Professional Experience

The Hackett Group ***Jan 2025 to Present***
AI Product Delivery & Program Manager *– Remote – Product Company*

- Led large-scale, cross-functional programs involving 90+ team members, translating business objectives into refined PRDs and executable delivery plans.
- Directed end-to-end program delivery of complex technical projects, ensuring scope, budget, and timelines were met while maintaining 98% quality standards.
- Owned the creation, review, and maintenance of PRDs, managing requirement changes and maintaining traceability throughout the product lifecycle.
- Partnered with multiple cross-functional teams to launch new services, reducing churn rate by 80% and increasing feature adoption by 50% in the first year of implementation.
- Developed and executed project plans, tracking progress using 10+ metrics, identifying critical milestones, and accelerating time-to-market by 20–35%.
- Led a cross-functional team of data scientists, ML engineers, software engineers, QAs & DevOps; fostering a dynamic work environment and boosting productivity by 35%.
- Spearheaded platform overhauls and system redesigns, infrastructure enhancements, improving reliability, scalability, and connectivity by 30–40% to support AI workloads.
- Championed Agile, Scrum, and CI/CD practices, increasing development speed, team productivity, and operational efficiency by 20–35%.
- Implemented rigorous quality assurance and user feedback loops, reducing downtime by 18%, improving user satisfaction by 10–15%, and slashing bug rates by 30%.
- Managed AI/ML model lifecycle programs, including data acquisition, training, fine-tuning, deployment, and monitoring, improving predictive accuracy by 20%.
- Defined and tracked KPIs, RAID logs, and adoption metrics for AI products, ensuring measurable business impact and continuous improvement.
- Monitored AI performance, ROI, recommending optimizations and enhancements to drive measurable business outcomes.
- Integrated Jira into project workflows, enhancing tracking, transparency, and team collaboration, resulting in a 20–30% productivity boost.
- Ensured compliance with data privacy, security, and ethical AI guidelines, including bias detection, fairness assessments, and governance processes.
- Coordinated vendor and partner engagements, cloud resources, and infrastructure provisioning for scalable AI/ML and SaaS solutions.
- Conducted internal and external audits, monthly and quarterly infrastructure reviews, and cost optimization initiatives, improving operational efficiency and security posture.
- Led R&D and innovative product feature development, integrating AI/ML algorithms to enhance analytics capabilities and increase sales by 15%.
- Managed stakeholder expectations across multiple departments, providing program updates, risk mitigation, RAID logs, and ensuring a 90%+ on-time delivery rate.
- Standardized project documentation, reporting, and PRD management to improve traceability, transparency, and team accountability.
- Facilitated training workshops and change management programs, improving deployment speed and adoption of AI-powered workflows by 30%.
- Utilized market research, A/B testing, and analytics to influence product strategy, optimize features, and increase market share by 10–20%.
- Led code quality and security governance using SonarQube and AWS Inspector, ensuring compliance with coding standards, security best practices, and cloud cost optimization.
- Managed cross-functional teams to develop and integrated AI/ML algorithms into analytics and SaaS solutions, enhancing insights and decision-making and increasing revenue by $90k annually.
- Managed a budget of $2M, reallocating resources to prioritize high-risk projects and achieving an 85% success rate in their timely delivery.
- Expedited the transition from traditional to cloud-native applications for 5 enterprise clients, boosting scalability and operational efficiency by 33%.

Key Achievements:

- Recognized as **Employee of the Month – July 2025** for outstanding program management and delivery excellence – *The Hackett Group*.
- Nominated for **Best Executor Spot Award – March & April 2025** for successful execution of critical AI projects and cloud migration initiatives – *The Hackett Group*.

NCS Global (Singtel Group subsidiary) ***Jul 2023 to Jan 2025***
Technical Program Manager (Data Services, Data Platform & DataOps) *– Hybrid – Service & Product Company*

- Reported to Director and Head of Data Platform; maintained strong relationships with senior leadership, stakeholders, and BAU teams. Managed vendor relations, escalations, service ownership, contracts, and licenses.
- Modernized legacy software systems using SDLC methodology, reducing downtime by 30% and improving operational efficiency.
- Orchestrated legacy system overhauls and microservices migrations, enhancing scalability and reducing latency by 20%.
- Led cutover and migration activities from legacy systems to ADF (Azure Data Factory), ensuring minimal downtime and seamless data transitions.
- Mentored and led data management professionals, integrating DataOps, DevOps, Agile, and ITIL practices for streamlined operations.
- Managed cloud migration projects including Tableau dashboards to Azure Cloud and Cloudera workloads to AWS Cloud, coordinating cross-functional teams, improving system scalability, reducing downtime by 30%, and query performance by 30%.
- Implemented Agile and iterative development workflows, reducing time-to-market by 20% and bug rates by 40%.
- Optimized product release cycles, delivering features 5% faster than industry average while maintaining high quality standards.
- Integrated ServiceNow for project tracking, incident management dashboards, and cross-functional team collaboration, boosting productivity by 20–30%.
- Pioneered AI-driven initiatives, including customer service chatbots and network optimization tools, improving customer satisfaction by 15%, reducing latency by 20%, and lowering maintenance costs by 18% annually.
- Managed process re-engineering projects across 10+ departments, reducing reporting time by 45%.
- Executed vendor partnerships to enhance product functionality, increasing upselling opportunities by 10%.
- Initiated and delivered advanced data visualization dashboards, improving decision-making for 20,000+ users.
- Oversaw telecom service management, ensuring SLA adherence, incident resolution, and service quality across internal and vendor teams.
- Coordinated internal and external audits, ensuring regulatory compliance, data security, and operational best practices.
- Maintained RAID logs to proactively track and mitigate project risks.
- Acted as primary liaison between business, IT, and vendors, providing governance oversight and stakeholder updates.
- Spearheaded platform enhancements and system redesigns, improving system reliability and reducing operational costs by 20%.
- Cultivated a culture of continuous improvement, driving cross-functional alignment and knowledge sharing.
- Facilitated training and adoption of ServiceNow and other ITSM tools, enhancing team efficiency, collaboration, and incident management reporting.
- Managed budgets exceeding $2M, optimizing OPEX/CAPEX allocations, and achieving 90% budget accuracy while saving $200k annually.
- Coordinated Change Advisory Board (CAB) activities, pre-CAB planning, and ensured adherence to ITIL and ITSM practices.

Key Achievements:

- Modernized legacy systems and led cloud migration initiatives, reducing downtime by 30% and improving query performance by 30%.
- Led cross-functional teams in high-impact projects, including migration of 300+ TB of data to distributed storage, completing 3 months ahead of schedule and under budget.

Profusion Systems, Inc. ***Jun 2023 to Apr 2024***
Technical Agile Project Manager *– Remote – Product Company*

- Reported to CEO & CFO, serving as a liaison across Mobile, Cloud, Infrastructure, QA, and Deployment teams; directed a team of 10 to manage a large-scale loan management system, improving data quality and accessibility by 25%.
- Championed the adoption of Agile frameworks (Scrum & Kanban), increasing sprint velocity by 40%, team efficiency by 20%, and project delivery speed by 30%.
- Facilitated quarterly product increment planning sessions, prioritizing 100+ epics, accelerating feature deployment, and maintaining 90% sprint completion across high-performance teams.
- Led migration of 2TB+ customer data systems and multiple SaaS/BI platforms (NetSuite, Smartsheet, ERP, Power BI, Tableau, Marketo/Twilio), ensuring zero operational disruption and delivering projects on time and within budget.
- Directed end-to-end project lifecycles—including scoping, planning, execution, and closure—ensuring adherence to project management methodologies and cross-functional alignment.
- Managed project risks and post-project analysis, preventing over $50,000 in potential cost overruns and reducing future project costs by 10%.
- Implemented dashboards and reporting systems, integrating Power BI/Tableau into workflows, increasing post-meeting inquiries and stakeholder visibility by 23%.
- Defined project roles and responsibilities, coordinated cross-functional teams, and negotiated scope and timelines with stakeholders to deliver 15+ products on time with measurable business impact.
- Delivered 5 high-value data analytics projects, enhancing client operational efficiency and achieving a 15% reduction in project costs and 23% improvement in client satisfaction (C-SAT).
- Facilitated daily stand-ups, sprint retrospectives, and cross-functional meetings, reducing blocker resolution time by 75% and improving team communication and productivity.

Key Achievements:

- Led migration of 2TB+ customer data and multiple SaaS/BI platforms (NetSuite, Power BI, Tableau, Marketo/Twilio) with zero operational disruption, delivering projects on time and within budget.
- Identified and mitigated project risks, preventing over $50,000 in potential cost overruns and reducing future project costs by 10%.

Mapsted Corp., Canada ***Jul 2022 to Jul 2023***
Engineering Project Manager (Engineering and R&D) *– Remote – Product Company*

- Reported to Head of Engineering & R&D, serving as liaison across Mobile, Data Science/ML, Maps/Positioning, QA, and Deployment teams; directed cross-functional teams of 10–20 members to deliver complex CRM system integrations and enterprise software solutions.
- Spearheaded transition from Waterfall to Agile and hybrid project management methodologies, increasing team agility by 25–40%, reducing time-to-market by 30–35%, and improving deployment frequency by 40%.
- Orchestrated cross-functional projects with budgets of $3M, achieving 18% ROI improvement, 7% cost savings, and 95% milestone achievement within scheduled timelines.
- Delivered 5+ major product features and data transformation projects in AWS and Azure cloud environments, enhancing user engagement by 40% and streamlining R&D processes from 1 month to 2 weeks.
- Implemented Agile ceremonies, sprint planning, and Scrum reviews, improving sprint completion rates to 90% and reducing project backlogs by 20%.
- Developed roadmaps, program plans, and risk mitigation strategies using tools like Power BI, Tableau, Databricks, NumPy, Pandas, and Matplotlib, resulting in measurable improvements in operational efficiency and product accuracy (15% increase).
- Established change control boards and quality control systems, improving adoption of new processes and reducing operational costs by 15%.
- Utilized STAR and Eisenhower Matrix frameworks to prioritize project requirements, enabling delivery of 5 projects in 3 months with 8–10% budget savings.

- Monitored calibration, data capture, and test environment processes, driving continuous improvement that enhanced workflow efficiency by 35%.
- Generated performance dashboards and stakeholder reports, tracking KPIs and demonstrating effectiveness of delivered solutions for senior leadership.

Key Achievements:

- Successfully managed projects with budgets of $3M, achieving **18% ROI improvement** and delivering 5+ major product features on time and within budget.
- Spearheaded the transition from Waterfall to **Agile and hybrid methodologies**, reducing time-to-market by 30–35% and increasing deployment frequency by 40%.

Soda In Mind Pte Ltd, Singapore ***Nov 2019 to Jun 2022***
IT Project Manager *– Remote – Service & Product Company*

- Acted as liaison between Business Stakeholders, IT application teams, and C-level executives; led and mentored a team of 20, ensuring high-performance project execution.
- Developed comprehensive project plans including scope, WBS, resource planning, and budgeting, while continuously monitoring workflow and adjusting timelines to maintain delivery efficiency.
- Partnered with UX/UI teams to refine product design processes, reducing user-reported issues by 35% within two quarters.
- Hosted daily stand-ups, sprint reviews, and planning sessions, applying Agile, Scrum, Kanban, and Waterfall methodologies to enhance team productivity by 25%.
- Implemented project management best practices and ITIL-aligned service delivery improvements, reducing project delays by 15% and improving cross-functional collaboration.
- Created and managed project schedules, Gantt charts, and timelines using MS Project, Open Project, JIRA, Trello, ensuring smooth delivery of multiple concurrent projects.
- Automated routine backup and recovery procedures using rsync and Bacula, safeguarding critical data and saving 15 hours/week in manual effort.
- Managed project budgets up to $500,000, achieving 10–14% cost savings while delivering 17+ software projects on time over 2.5 years.
- Analyzed user requirements, authored technical specifications and user stories, contributing to a 20% increase in customer satisfaction.
- Supervised end-to-end project lifecycle, ensuring continuous improvement, compliance, and quality standards, resulting in a 20–35% improvement in project output.

Key Achievements:

- Successfully delivered **17+ software projects** within 2.5 years, achieving on-time phase deliveries and maintaining **12–14% budget savings**.
- Automated backup and recovery procedures, saving **15 hours per week** in manual effort while ensuring data security and compliance.

WNS Global Services, Nashik ***Oct 2017 to Feb 2019***
Senior Associate *– Service / BPM Company*

- Promoted to Senior Associate (Data Analyst) for exceptional proficiency in data analysis; led a team of 7 to establish the NT24 Business Unit in healthcare, driving a 25–28% revenue increase.
- Assisted in report generation, data cleaning, MIS maintenance, and master file management, improving save/load times by 20% and operation efficiency by 15%.
- Led project meetings and delivered projects from concept to implementation using DMAIC & ITIL frameworks, optimizing system performance through kernel tuning for a 20% efficiency gain.
- Implemented robust Linux security measures, including iptables, system hardening, and incident response, reducing security breaches by 85–90% and improving response times to under 2 hours.
- Automated Linux account management and server patching processes, saving 20 hours/month and reducing maintenance windows by 4 hours monthly.
- Proactively monitored AWS cloud environments to maintain uptime and operational stability, ensuring smooth business operations.
- Developed Excel Macros and automated data extraction workflows, increasing efficiency and reducing manual errors across reporting processes.
- Upgraded core networking components and deployed a centralized antivirus solution, improving infrastructure stability and reducing malware incidents by 40%.
- Managed inventory, data distribution, and project deliverables, ensuring timely execution and adherence to quality standards.

Key Achievements:

- Implemented Linux system hardening, security measures, and AWS monitoring, reducing **security breaches by 85–90%** and improving incident response times to **under 2 hours**.
- Automated Linux account management and Excel reporting workflows, saving **20 hours/month** and improving operational efficiency by 15–20%.

Education

- **Master of Science** in **Applied Mathematics**, Parul University, India – 2025 to 2027 (In-progress)
- **Post Graduate Program** in **Data Science (ML, NN, DL and NLP)**, Data Trained Institute – Jul 2022 to Aug 2023
- **Bachelor of Science** in **Computer Science Engineering**, Kalinga University, India – Jul 2015 to Jun 2018

Certifications

- Project Management
- Data Science

Honors & Awards

- Forward Player – SAM English Medium School (National level footballer) – Jul 2010
- Kick-Boxer – Maharashtra Kickboxing Association (State level, silver medalist kickboxer) – Jul 2009
