PROFESSIONAL SUMMARY

Experienced Backend Software Engineer with close to 4 years of hands-on experience in designing, developing, and maintaining robust backend systems. Proficient in Java 8, Spring Boot, Python and RESTful APIs with a solid understanding of software architecture and database technologies like Oracle and PostgreSQL. Skilled in implementing CI/CD pipelines, writing clean and maintainable code, and working within Agile development environments. Demonstrated ability to collaborate across teams and deliver scalable, reliable backend solutions aligned with business goals.

KEY SKILLS

- Languages: Java 8, PostgreSQL, Python (Beginner)
- Frameworks: Spring Boot, Spring MVC
- Databases: PostgreSQL, Oracle, MySQL
- Web Services: REST APIs
- DevOps/Cloud: Git, Jenkins, Airflow (basic), AWS S3 (basic)
- Tools: Postman, Maven, Gradle, SVN, IntelliJ IDEA, Eclipse
- Servers: Apache Tomcat
- Other: Shell Scripting, Oracle Data Modeler, WinSCP, M PuTTY

WORK EXPERIENCE

SOFTWARE ENGINEER, 02/2024 - CURRENT

CIRCANA INDIA PVT LTD, BENGALURU, INDIA

Project Name: Media Lift – Data Analytics Platform

Developed and maintained backend services for a data analytics platform using Spring Boot and RESTful APIs.

- Continued on the Same client project after moving from Harman Connected Services.
- Designed and maintained scalable backend services using Java 8 and Spring Boot. Improved deployment pipeline efficiency, reducing manual intervention by 40%.
- Optimized SQL queries, reducing API response time by 35%.
- Developed modules for report scheduling, file ingestion, and deployment automation.
- Provided production and UAT support; collaborated cross-functionally within Agile sprints.
- Tech Stack: Java 8, Python, Spring Boot, PostgreSQL, Maven, Jenkins, Git

Software Engineer, July 2021 – January 2024
Harman Connected Services, Bengaluru, India
Project Name: Media Lift – Data Analytics Platform

- Developed RESTful APIs for enterprise platforms focused on scalability and maintainability.

PERSONAL PROJECTS

- **Funds management for social welfare**

The objective of our project is to provide a platform to a social welfare trust, to
Manage the also for the users to get reports of their donations.
Technology: Node.Js, React.Js, HTML, CSS

- **Attendance system using face detection and face recognition**

This system automates student attendance using OpenCV and MTCNN for real-time face detection and recognition. It eliminates manual effort, ensures accurate identification, prevents proxy attendance, and offers a fast, contactless solution for modern educational institutions.
Technology: MTCNN, OPENCV, TensorFlow.

- Automated environment setup and deployment scripts using Bash and Jenkins.
- Ensured production readiness and handled live issue resolution under strict SLAs.
- Wrote integration and unit tests to support TDD and improve code quality.
- Tech Stack: Java 8, Spring Boot, PostgreSQL, SVN

EDUCATION

Vellore Institute of Technology, Vellore, India
M. Tech in Computer Science and Engineering
JULY 2019- MAY 2021
Gyan Ganga College of Technology, Jabalpur, India
B.E. in Computer Science and Engineering
JULY 2012- MAY 2016
