ABHAS GUPTA

Senior Software Engineer – Golang | Full Stack Developer
📍 Pune, India | 📍 +91-9993192252 | 📍 sijariyaabhas@gmail.com
📍 LinkedIn: Linkedin

Professional Summary

Senior Software Engineer with **7.2+ years of experience** specializing in **backend and systems development using Golang**. Proven expertise in designing **scalable, production-grade microservices**, secure **multi-tenant APIs**, and **distributed systems** for telecom and cloud-native platforms. Strong command of **Go idioms**, concurrency patterns, error handling, and performance profiling using **pProf**. Experienced in **evaluating code correctness, readability, and API design**, including AI/LLM-assisted code with disciplined validation. Adept at containerization, Kubernetes-based deployments, technical documentation, and mentoring engineers through structured reviews and clear technical explanations.

Professional Experience

Software Engineer III

Cisco, Bengaluru | Aug 2025 – Present

- Contributed to **Cisco Crosswork Network Controller core infrastructure** to automate campus private networks across multi-vendor routers and switches.
- Designed and containerized **modular Go microservices** using **Podman**, deployed and managed on **Kubernetes**.
- Worked with **gRPC, REST APIs, Kafka, NATS, Grafana**, Protocol Buffers, mono-repos, and submodules.
- Implemented enterprise-grade features including **RBAC policies, TLS security, backup & restore workflows**, and configuration management.
- Applied **Go routines, channels, context propagation**, and internal caching for high-throughput and concurrency-safe services.
- Worked with **Gin, Mux, and GORM** frameworks for backend service development.
- Hands-on experience with **PostgreSQL, ETCD, and Kubernetes CRDs**.
- Implemented **Geo-Redundancy (Active–Standby cluster)** architecture ensuring zero-downtime failover.
- Collaborated with cross-functional teams to deliver **end-to-end features**, reviewing code for correctness, clarity, and maintainability.

Senior Golang Developer

Netcracker, Pune | Aug 2024 – Present

- Built scalable **RESTful** and **gRPC** APIs in **Golang** (Gin) for a multi-tenant telecom revenue management system.
- Designed and containerized modular microservices using **Docker** and managed orchestrations, scaling and deployment through **Kubernetes** in a monorepo architecture with **bazel**.
- Applied **GoRoutines**, **channels**, and custom **caching** to boost concurrency and throughput.
- Integrated **Keycloak** for secure role-based access control (RBAC) across APIs.
- Worked with **PL/SQL**, complex sql.Tx, and **GORM** for large-scale telecom billing transactions.
- Used **pProf** to profile and resolve performance bottlenecks.
- Applied **Provider** pattern and context.Context for clean, maintainable service architecture.
- Containerized services with **Podman**, used **MinIO** for object storage, and documented APIs via Swagger/**OpenAPI**.
- Worked with KAFKA for event-driven communication between distribute components.
- Wrote **unit** and **integration** tests, and mentored junior developers through code reviews and hands-on sessions.

Golang & Angular Developer

Signify (Philips Lighting), Pune | Sep 2021 – Jul 2024

- Developed cloud-based control and monitoring solutions for smart lighting systems.
- Built REST APIs and microservices in **Golang** using **Mux** and Gin, and implemented gRPC interfaces.
- Developed front-end modules with **Angular**, and **migrated** Angular from v7 to v16.
- Integrated APIs with Angular, using HTML, CSS, and SPA principles.
- Familiar with **Spring Boot**, **AWS**, **Jenkins**, and Linux-based deployments.
- Practiced **SAFE 5** Agile methodology, working with Jira, Bitbucket, SonarQube, Figma.

Senior Systems Engineer

Infosys (Client – British Telecom), Pune | Nov 2018 – Aug 2021

- Developed microservices using Java Spring Boot and built **BPMN** workflows for financial journeys.
- Created **Cucumber** feature files for regression testing and deployed with Docker & Google Harbor.
- Actively contributed to Infosys Digital Innovation team by implementing automation for BT's client-facing apps.
- Performed SQL operations, used **GitLab**, and worked in Linux environments.

Technical Skills

Languages & Frameworks: Golang, Java, Spring Boot, Angular, HTML5, CSS3, Python

Backend & APIs: gRPC, REST, Gin, Mux, Microservices, SQL/PLSQL

Tools & DevOps: Docker, Podman, Jenkins, Bitbucket, GitLab, Bazel, Postman, Cucumber, Eclipse

Cisco Confidential

Database & Storage: Postgres, MinIO, SQL Transactions, GORM
Other: Keycloak, Camunda BPMN, Visual Studio Code, AWS, Jira, Figma
Testing & Profiling: Go Test, Testify, Delve Debugger, pProf

Certifications

- HackerRank Python Certification – Jan 2021
- HackerRank Problem Solving – Sep 2020
- Infosys Global Agile Developer – Aug 2020

Education

Bachelor of Engineering – Information Technology

Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal | 2014 – 2018

- Completed Telecom Training at Bharat Ratna Bhim Rao Ambedkar Institute of Telecom Training (BRBRAITT)
- Developed web-based applications: Hospital Management System and Library Management System using Java, Spring Boot, AWS, JSP, HTML/CSS

Cisco Confidential
