NAVEEN JANAKIRAMAN

SOLUTION ARCHITECT-
DIGITAL TRANSFORMATION AND DATA SCIENCE (SCM)

Email: naveenj887744@gmail.com
Phone: +91 - 9844989935
LinkedIn | GitHub

EDUCATION :

Visvesvaraya Technological University, Karnataka, India

Bachelor of Engineering-- Mechanical engineering (2012-2016)

TECHNICAL SKILLS :

- Advanced Python
- Advanced Excel
- SQL
- AWS
- LLM
- Hadoop
- Power Bi
- PySpark
- Power Query
- SAP IBP/AERA
- Langchain / langgraph

CORE COMPETENCIES :

- Sales & Operations planning
- Supply Chain Optimization
- Data Science
- Project Management
- Data Visualization and Reporting
- Process Documentation and Batch script
- Leadership
- Statistics
- Big Data Analytics
- Strategic Planning
- Continuous Improvement
- Lean Management
- Agile Methodology
- Agentic AI
- Prompt Engineering

CERTIFICATIONS :

- Certified in **Data scienceMasters (INeuron - April 2022)**
- Certified in **Big Data Masters (INeuron - March 2023)**
- **Project management foundation (Coursera - June-2021)**

Certified in **Agentic AI** - EY badge

SUMMARY

Results-driven professional with overall 9+ years of expertise in **Supply Chain Analytics** and **Digital transformation** through the application of **Data science and AI/ML technologies**. My career is anchored in guiding organizations toward data-driven decision-making through strategic planning, analytics initiatives, digital transformations and implementing **innovative solutions** to complex supply chain challenges.

My career has been marked by a strong commitment to optimizing processes and driving data-informed decision-making. I have a proven track record of successfully managing complex programs, utilizing advanced analytics tools, leading a team and collaborating with cross-functional teams to deliver tangible business outcomes.

WORK EXPERIENCE

ERNST AND YOUNG INDIA (EY), (FEB 2024 - present)

Senior Consultant/Solution Architect -- Digital Transformation and Data Science (SCM)

- Participated in functional / technical requirements gathering and built conceptual design and logical design. As a **Solution Architect** evaluated and chosen technologies that align with project goals and provided architectural guidance, reviewed code and ensured best practices are followed.
- Implemented the **decision automation** with optimization model to optimize DSI to mitigate the **shortage and excess inventories by minimizing the total cost** (trade-off cost and control cost) and Stats models to forecast demand for fulfillment site and replenishment site.
- Designed the solution and defined the architectural blueprint and strategy for end-to-end AI systems, including traditional ML, Generative AI, and autonomous AI agents capable of reasoning, planning, and acting.
- Design and manage the seamless integration of AI agents and data science solutions with existing enterprise systems (eg., SAP IBP, Aera), workflows, and APIs to ensure interoperability and data flow.
- **Lead** a team of 6 developers and 2 junior data scientist by fostering collaboration and innovation and facilitated knowledge sharing sessions to elevate the team's capabilities.
- Developed technical documents, Process flow diagram and Worked closely with Application Developers and translated business/functional requirements to technical requirements to aid development and testing of the models.
- Conceptualized and built dashboards for Deep dive analysis and leadership visibility
- Analyzed the data, conducted research, and derived meaningful insights to support client engagements.
- Analyzed & troubleshoot data integration issues between Aera & SAP IBP.

Projects / Achievements : -

- Improved MRP Planning/Supply Split ratio by **40%** and reduced order repoints/container diversions by **25%** by setting up an automated closed loop feedback system with demand split ratio/ideal sales ratio.
- Designed and integrated the **multi agent workflow** system for Continuity of Supply (COS) orchestration using **Langgraph and Langchain famework** with the help of **function tools**, State management, feedback loops, policies etc. Which resulted in higher level of decision making and ability to scale dynamically to drive outcomes and increased the **adoption rate by 40%** with chat feature.
- Automated inventory planning activities using Aera inventory skills a cognitive automation tool that automates the process of balancing inventory including executing frequent corrections in transactional system helping to effectively manage bigger markets. **70% efficiency improvement.**
- Automated User action on the Demand sensing recommendations based on the confidence score by predicting the user acceptance or rejection. Reduced planners bandwidth by **30%.**

AMAZON INDIA , (OCT 2020- FEB 2024)

Technical Program Manager-- Planning Analytics (SCM)

- Identified pain points and scope out large **high impactful projects** typically involves designing and building complex new processes, **driving technology solutions**, efficiency improvement initiatives or launching exciting **new supply chain models** and responsible for driving cost benefit analysis on various initiatives.
- Worked to evolve a plan and timeline for project execution and **developed a roadmap and metrics** to measure progress of the initiative and **owning reports/docs** that detail the progress to leadership regularly.
- **Lead**, evaluated and guided the **team of 3 support analysts** on projects/ad-hoc asks.
- Built the robust **data pipelines using ETL**, Enhancing/Optimizing and maintaining ETL process across cloud architectures with understanding of broad range of data resources.
- Worked closely with product team and launched new capabilities for volume planning and developed the **UAT** test cases and executed them with project flow.
- Continuous engagement with business teams to pick up possible demand fluctuations early and ensure seamless information flow into the supply planning and deployment teams to help bridge demand-supply gaps and improved plan accuracy by **200bps.**

SOFT SKILLS :

- Customer Obsession.
- Ownership.
- Learn and Be Curious.
- Deliver Results.
- Dive Deep.
- Invent and simplify.
- Bias for action.

AWARDS/ ACHIEVEMENTS :

- **Counsellor Extraordinaire** -- 2024 Q2, E&Y India
- **Bias for Action Award** -- 2021 Q1, Amazon India
- **In Supply chain Marvel award** -- 2022 Q1, Amazon India
- **Going Beyond Award** – 2022 Q3, AmazonIndia
- **Builder's Award** – 2023 Q2, AmazonIndia
- **Supply ChainOutstanding Performer** – 2023 Q3,AmazonIndia
- **Client Extraordinaire** -- 2025 Q2, Q4, E&Y India

ADDITIONAL INFORMATION :

Languages: ENGLISH, KANNADA, TAMIL,TELUGU, HINDI

Location: Bangalore, India

Passport No: R8559336

ACADEMIC TRAINING AND PROJECT

INTERNSHIP - HINDUSTAN AERONAUTICS LIMITED (HAL) | Aircraft Division | 2016

PROJECT TOPIC -
Enhancement of fatigue life in fuel tank assembly of an hawk aircraft by bush bonding

Business Analyst -- Supply Chain Analytics

- Explored and analyzed the data to identify problems occurring in the supply chain process and worked closely with cross-functional team on improvements.
- Created automated systems/process through ETL manager/ **Python** for weekly business reports and daily functional reports | **Savings: 28hrs per week manhours.**
- Owned the design, development, and maintenance of Quick Sight / Power Bi dashboards to do daily/weekly analysis and to track/report on KPI and supply chain performance.
- Tracked and driven 3P bleed reduction due to caps hit from **0.6% to 0.45%.**

Projects / Achievements : -

- Developed and owned **4 ML Based Model and deployed in AWS platform** for predicting **TCAP units** (Transportation capacity aware picking), **Day ahead forecast for OOR (on the road) shipments**, **Large volumetric shipments**, **Hour Cycle shipment arrival predictor**. **Savings- ~2.7MM INR monthly.**
- Built a Time series **Stats Model** plus heuristic approach-based forecasting tool to provide daily forecast of FC Return units for D, D+1 and D+2 based on the D-1 data. **Savings- ~0.6MM INR monthly.**
- Developed a **Simulation model** using python and optimized the model considering the constraints of capacity, demand, and supply (Project: **ShaFaL**- Sharper-Faster-Leaner). **Savings- ~1.45MM INR monthly**
- Developed data visualization aids (Dashboards & Reports) primarily focused at historical deep dives and real time analytics to provide forecasting guidance. **AMZL planning accuracy improved by 248 bps** with WAPE decreasing 7.88% in 2021 to 5.4% 2022 v/s 7% Goal. **Savings - ~3.7MM INR monthly.**

KALPA ELECTRIKAL, INDIA (MAR 2018 - JUL 2020)

SUPPLY CHAIN EXECUTIVE – Supply Chain Analytics

- Deliver on defining business metrics & accurate **BAU reporting**, build visualization dashboards for leadership, drive metrics improvement through deep dives & insights, run high impact **data driven projects** leveraging statistical Modelling & automation.
- Determined project specifications by studying product design, customer requirements and performance standards to evaluate timelines & material required.
- Worked closely with S&OP to understand effective forecast models based on industry trends and demand patterns, then projected the plan to cross-functional teams.
- Monitored and reviewed **Material Quality Performance & On-Time Delivery.**
- Performed regular **Ad-hoc analysis** to uncover areas of opportunity and present business recommendations to senior leadership, that will help shape the direction of the business.
- Created & Maintained the capacity report so that it can be used as a tool in the planning and scheduling process and ensured for the timely supply and delivery of products.

Projects/Achievements : -

- Planned and implemented **Supply chain optimization** projects. **Savings ~1.5MM INR.**
- Controlled and managed SFG and FG inventory and **reduced aged inventory by 27%.**
- By researching and implementing cost-saving proposals using SCM strategies such as **make-vs-buy analysis** or alternative sourcing, **VMI, ABC analysis** and JIT etc. **Savings ~0.75MM INR.**
- Worked closely with suppliers/vendors/customers and cross functional teams to improve operations and reduce cost through Value engineering and Value stream mapping.

OMKAR INTERIOR DESIGNERS, INDIA (SEP 2016 - FEB 2018)

ASSISTANT ENGINEER

- Reorganized an inventory System to prevent material shortages.
- Evaluated and Improved cycle time and reduce labor hours through continuous process improvement and implementing new mixed model assembly line.
- Performed analysis on **product technical designs and prototypes** in development stage and recommended modifications following prototype test results.
- Visited vendors, monitored work in progress and inspected the components.
- Supervised **inbound and outbound operations** including logistics.
- Resolved supply, quality, service and invoicing issues with vendors
- Managed **tracking deliveries**, receiving goods and processing invoices.
- Follow-up with Finance department for timely payment to vendor.

EXTRACURRICULAR ACTIVITIES

- Worked as event manager for I**nternational Business to Business trade fairs such as IMTEX, EXCON, SWITCH, ELECRAMA, ELECTRONICA INDIA** for 3 years during semester leisure.
- Presented 3 teaching sessions about the SQL Basics, Python based forecast post processing model and Quick Sight to the larger audience under **Amazon Teach Initiative**.
- 24 Hrs Hackathon on Data science, **Mu sigma** – June 2022
