ABOUT ME

Passionate Software Developer with 7 years of experience in building, scaling, integrating and testing applications based on Java, Spring Boot, Microservices, and Kafka.

SKILLS

Languages : Java 21, Python, HTML/CSS, SQL/DBMS (MySQL, Oracle, IBM DB2, Sybase).
Frameworks, Version Control & Tools : Spring Boot, Kafka, Microservices, Redis, GraphQL, JPA, Angular, JUnit 5, Mockito, GitHub Copilot, Elastic Search, Github, TFS, Git, BitBucket.
AI, Devops & Cloud : Docker, Jenkins (CI/CD), AWS, S3, EC2, Cloud Formation, ELB, AI Agent, LLM, Prompt engineering.
Code Quality & Security : Spring Security, OAuth2, JWT, SonarQube, Veracode, BlackDuck, Jacoco, Postman.
Methodologies : Agile, DSA, OOPS, HLD, LLD, Design Patterns, SOLID principles, DB Isolation Levels, Concurrency, SAGA, Circuit Breaker.

EXPERIENCE

JP Morgan Chase — 08/2024 - 10/2025

Software Developer Lead, Bengaluru

- **Contributed to the addition of over 70 new CSA curves** to the Pyramid application, leveraging Java and Spring Boot to significantly increase customer acquisition and generate billions in revenue for the company.
- **Spearheaded the migration of historical trade data from HydraDB to Amazon S3**, achieving **over 40% cost savings on storage** and enhancing data accessibility and disaster recovery capabilities.
- Engineered an **SQL Generation AI Agent** using Knowledge Bases and feedback loops, improving **query accuracy by 50%**.
- Built secure APIs with the **JWT, OAuth2,** and improved performance using **Kafka, ElasticSearch and caching.**
- **Enhanced** scalability of a **Spring Boot notification service** for the Portfolio platform to support real-time email and SMS alerts under peak trading loads using **Kafka**.
- **Automated quarterly index roll tasks** with Python scripts, **reducing manual effort by approximately 80%** and ensuring data integrity.

FIS — 11/2021 - 05/2024

Software Engineer Lead

- **Developed and delivered customer-facing (HSBC) solutions** using Spring boot, Spring Data JPA, REST Apis, and AWS improving user engagement **and reducing page response time by 20%.**
- **Crafted RESTful APIs** integrated with relational data via Spring Data JPA, enabling seamless transactions and **data retrieval time by 30%.**
- **Accomplished authentication workflows with JSON Web Token (JWT)** to manage secure user sessions, providing controlled access **over 6000 active users.**
- **Increased Java development velocity by ~25–35%** by effectively using **GitHub Copilot** for boilerplate, API scaffolding, and unit tests.
- Resolved a Java-based data table pagination issue, **improving accuracy of filtered data display by 100%** and enhancing user experience.

Infosys Limited — 11/2018 - 11/2021

Senior Systems Engineer, Bengaluru

- **Implemented** and **maintained Spring-based web/desktop data masking, subsetting, and generation** modules and algorithms within IEDPS, improving data processing efficiency by 20%.
- Integrated and optimized RESTful APIs, **leading to a 25% increase in data throughput** and enhancing user experience across client platforms.
- Elevated **backend code coverage from 0% to over 80%** by designing and implementing comprehensive JUnit 5 test cases, reducing production code breaks by 15%.
- **Led a team of 6 junior Java developers**, mentoring them through successful delivery of Spring Boot and Hibernate-based features, resulting in a 30% improvement in team delivery efficiency.
- **Obfuscated deployable JARs** to **prevent reverse engineering**, reducing IP and **data exposure risk by 40%**.
- **Won Insta Award at Infosys** for exceptional Spring solutions and client-driven (Verizon) project success.

EDUCATION

Bachelor of Engineering in Computer Science — 2014 - 2018

Global Engineering College — Jabalpur, M.P.
