FAIZAL NAVROZ

Senior Software Engineer

+91 9789869207 | sfaizalnavroz@gmail.com | linkedin.com/faizalnavroz | Chennai, India

SUMMARY:

Senior Software Engineer with 10+ years of Java (11/17) experience delivering scalable, **production grade microservices using Spring Boot, Spring Cloud, MongoDB and AWS**. Engineered REST-based microservices ecosystem using Spring Boot, focused on API performance tuning services orchestration across independent modules supporting various products.

KEY SKILLS:

- Java & Frameworks: Java 11/17, Spring Boot, Spring MVC, Hibernate (JPA)
- Microservices & APIs: RESTful Web Services, Microservices Architecture
- Databases: MySQL, Azure SQL, MongoDB, Redis Cache
- DevOps & CI/CD: Maven, Gradle, Jenkins, Docker
- Cloud Platforms: AWS, Microsoft Azure, GCP
- Frontend & Scripting: JavaScript, jQuery, React JS(Beginner)
- Other Tech: Spring Batch, Android (MVVM), SonarQube, Splunk, Grafana, Dynatrace

PROFESSIONAL EXPERIENCE:

SENIOR SOFTWARE ENGINEER - *PEARSON PLC., Chennai, India*

(DEC 2022 - PRESENT)

ACTIVEHUB PRIMARY:

- Orchestrated and maintained multiple standalone microservices using **Spring Schedulers** for batch processing
- **Designed and developed a Spring Boot microservice using Spring Batch** to automate license renewal processing, replacing a previously manual batch job. Integrated scheduled job execution, chunk-based processing, and retry logic to handle high-volume renewal tasks efficiently.
- **Drove sprint release readiness**, preparing release notes, orchestrating rollback plans, and securing stakeholder sign-off. This led to a 95–100% on-time delivery rate with minimal P1 issues**.**
- **Served as team Security Champion**, advising and mentoring developers fixing code quality issues and vulnerabilities integrating tools like SNYK.

SENIOR ENGINEER - *FORD GLOBAL BUSINESS SOLUTIONS., Chennai, India*

(MAY 2019 – DEC 2022)

FORD PASS:

- **Built the xAPI (Experience Dashboard Experience API**, a Spring Boot microservice that delivers real-time vehicle data to iOS and Android apps whenever users open the dashboard supporting over 100k daily users using **TDD.**
- Spearheaded the design, delivery and production rollout of the **online service-booking backend feature for fleet clients**, replacing a manual process with an API-driven microservice integrated across systems that handled approx. 4000 bookings per month.
- Utilized Spring Boot, PostgreSQL collaborated with three frontend teams via REST API contracts and operated with 99.5% high availability for the services.

ASSOCIATE - ***COGNIZANT TECHNOLOGY SOLUTIONS., Chennai, India***

(MAY 2018 – MAY 2019)

CALL VOLUME REDUCTION:

- Contributed to transforming legacy .NET monoliths into Spring Boot microservices.
- **Implemented Spring Cloud Config Server** to centralize and externalize configuration management across multiple Spring Boot microservices, enabling dynamic property updates, environment-specific configurations, and secure handling of sensitive data, thereby enhancing scalability and maintainability in a distributed system.
- **Designed circuit breakers using Spring Cloud Circuit Breaker** to enhance fault tolerance across microservices, preventing cascading failures by isolating service dependencies and providing fallback mechanisms using **Resilience4j**.
- **Leveraged Java reactive programming features** in Spring Web Flux to build non-blocking, asynchronous APIs, resulting in improved scalability and reduced response times.

SENIOR ENGINEER - ***MINDTREE LTD., Chennai, India***

(OCT 2014 – MAY 2018)

WILLIAMS LEA TAG:

- **Developed and optimized RESTful APIs as** for a high-traffic B2B e-commerce platform using Java 8 features such as Streams, code readability and performance.
- **Optimized MongoDB queries** for large datasets in a B2B e-commerce platform by implementing **Projections, aggregations and paginations.**
- **Engineered an automatic approval process** for a B2B e-commerce platform using Spring Batch, streamlining order validation and approval workflows using **Spring Batch**.
- **Generated dynamic Excel reports** using Apache POI to compile and format order data, enhancing data accessibility and decision-making processes.
- **Designed and sent HTML email notifications** utilizing Thyme leaf templates
- **Implemented Redis caching** for large API responses in a B2B e-commerce platform, reducing response times from 2305ms to 145ms and significantly decreasing database load by serving frequently accessed data directly from memory.

EDUCATIONAL QUALIFICATIONS:

Bachelor of Engineering in Electronics & Communication

Madha Engineering College Chennai, Tamil Nadu, India with CGPA 7.6 on a scale of 10 | May 2014

Secondary and Higher Secondary School

Vels Higher Secondary School, Chennai, Tamil Nadu, India with 84.7 %,2010 | May 2010

Vels Vidyashram, Chennai, Tamil Nadu, India with 76%

CERTIFICATIONS:

AWS Certified Cloud Practitioner (Amazon Web Services), Feb 2025

DECLARATION:

I hereby declare that all the statements furnished above are true, complete and correct to the best of my knowledge and belief.
