Govind Kumar Sah

Senior DevOps Engineer

govind.sah2016@gmail.com |+919509492682 | linkedin.com/in/govindsah7 | Pune, Maharashtra

- Senior DevOps Engineer with **4+ years of hands-on experience building CI/CD pipelines from scratch** and automating build, deployment, and release processes.
- Proficient in **Azure DevOps, Azure Cloud, Docker, Kubernetes, and Terraform**, with solid **Python and Bash/Shell scripting** and **Linux administration** experience.
- Managed **end-to-end deployments across Azure and on-prem environments**, focusing on **automation, release stability, and faster delivery.**

Skills

- **Cloud Platforms:** Azure, AWS
- **CI/CD Tool:** Azure DevOps, GitHub Actions
- **Container Platforms:** Kubernetes, Docker
- **Secret Management:** Azure Keyvault, External Secrets, Secret Store
- **Scripting:** Shell, Python
- **Networking:** Azure Application Gateway, NGINX Ingress Controller, Azure Load Balancer
- **Infrastructure as Code:** Terraform
- **Configuration Management:** Ansible
- **Service Mesh:** Istio Gateway, VirtualService
- **Monitoring:** Prometheus, Grafana, Azure Monitor
- **VCS & OS:** Git and Linux, Windows
- **Security & IAM**: IAM, RBAC & Service Principals, App Registrations

Professional Experience

Volkswagen Group Technology Solutions India

Senior DevOps Engineer: Oct 2024 -Present ***Pune, India | Stuttgart, Germany***

- Designed and implemented **CI/CD pipelines using GitHub Actions** and custom **Dockerfiles** to automate containerized deployments to **Azure Kubernetes Service**.
- Provisioned and managed **Azure services** using **Terraform** integrated into CI pipelines for consistent and repeatable deployments.
- Set up **Istio Gateway**, **VirtualService**, and **Azure Load Balancer** to manage internal traffic securely and efficiently, improving service communication and reliability.
- Implemented **ExternalSecrets** and **SecretStore** to securely pull secrets from **Azure Key Vault**, removing the need for manual handling and reducing the risk of exposure.
- Configured **Grafana dashboards** for real-time monitoring and visibility into system metrics and application performance.
- Defined and applied **Kubernetes RBAC** policies by creating **ClusterRoles** and **RoleBindings** to enforce secure access control.
- Managed **IAM policies**, **Service Principals**, **App Registrations**, and **Access Management** to maintain secure identity and resource governance across Azure environments.
- Integrated with **API Management** to expose and manage APIs securely with fine-grained access control.
- Took ownership of improving **deployment reliability**, optimizing **cloud resource usage**, and mentoring junior engineers in **DevOps** and **cloud-native tools**.
- Collaborated with global teams across Germany to enforce **DevSecOps** practices, including **IaC** and **container security scanning**.

Wipro Ltd

DevOps Engineer: July 2021 – Oct 2024 ***Pune, India | Geneva, Switzerland***

- Built and maintained CI/CD pipelines using Azure DevOps to automate containerized application deployments to AKS, with integrated checks for code quality and security using SonarQube and BlackDuck.
- Developed and optimized **Dockerfiles** to ensure efficient image builds and consistent deployment workflows across environments.
- Managed and scaled **Azure Kubernetes Service** clusters to support high availability and smooth performance during traffic spikes.
- Deployed and configured **Kubernetes resources** like deployments, services, and pods, adhering to best practices for stability and uptime.
- Automated infrastructure provisioning using **Terraform**, helping reduce manual tasks and improve consistency across staging and **production** setups.
- Set up **Prometheus** and **Grafana** for monitoring and alerting, giving better visibility into system health and helping to reduce downtime.
- Integrated **Azure Key Vault** to securely handle secrets and sensitive configuration data, with access managed through defined policies.
- Configured **Azure Application Gateway** for secure load balancing, SSL termination, and efficient routing to backend services.
- Installed and managed **NGINX Ingress** Controllers to streamline external access to Kubernetes workloads and improve response times.
- Used Kubernetes deployment **strategies** like rolling updates and rollbacks to push changes with zero downtime.
- Wrote **Shell scripts** to automate routine operations and reduce manual effort.
- Worked closely with development teams to troubleshoot issues, tune performance, and improve deployment workflows end-to-end.

Professional Achievements

- Worked on-site at client location in Germany and Switzerland, to understand new requirements and showcase existing workflows.
- Received Customer Delight recognition for conducting multiple Proof of Concepts and collecting good feedback.
- Recognized as a Shining Star for exceptional performance in handling deployments and implementing new requirements within given timeframes.

Education

Institute Of Engineering & Management **Kolkata, West Bengal**

B.Tech in Information Technology *Aug. 2017 - Aug. 2021*

Cumulative DGPA: 8.25/10
