CAREER OBJECTIVE

Experienced Cloud & System Engineer with 3 years in implementing, and optimizing cloud infrastructure and automation solutions. Skilled in AWS, Azure, Kubernetes, and continuous integration and deployment (CI/CD) pipelines. Known for a focus on system reliability, process automation, and cross-functional team collaboration. Seeking a role to drive scalable infrastructure and high-performing deployments.

Programming & Scripting: SQL | Python | Bash Scripting
Cloud & DevOps: AWS | Microsoft Azure | Azure DevOps | AWS CloudFormation | Terraform | Docker | Ansible | Jenkins
System Administration & Monitoring: Linux | Grafana | ServiceNow

WORK EXPERIENCE

ComScore, Inc. Jun '25 - Sep 25

System Engineer

- Provisioned and managed Azure infrastructure **including VMs, VNets, NSGs, Load Balancers** and Storage Accounts.
- **Server Patching & Automation**: Managed server patching using Kace, automating updates to ensure system security
- **Salesforce for Incident Tracking**: Managed and tracked incidents via Salesforce, improving issue resolution efficiency.

Cognizant Technology solution Jan '24 - Sep'24

SENIOR SYSTEM Engineer

- Led the design and deployment of scalable and resilient cloud infrastructures on **AWS/Azure to bolster enterprise applications and services**
- Designed and maintained **CI/CD pipelines using Azure DevOps** for application deployments across dev, test, and production environments.
- Skilled in utilizing containerization technologies such as **Docker and Kubernetes**

Cognizant Technology solution Apr '22 - Dec '23

SYSTEM ENGINEER

- Implemented monitoring solutions using **Prometheus and Grafana** to improve system visibility.
- Deployed **Kubernetes with Helm** and implemented **GitOps** for efficient infrastructure management
- Configured **Azure Monitor, Log Analytics and** Alerts to improve system reliability**.**

PROJECTS

BHF IT Steady state 2020

- Provided **ongoing support** to the team, troubleshooting and resolving **technical issues** in a finance-based IT environment
- Ensured **smooth operations** by maintaining **system stability, resolving incidents, and improving performance**

CERTIFICATIONS

1. Obtained certification as an **AWS Certified Developer Associate** showcasing expertise in AWS technologies and services
2. Achieved **Azure DevOps Engineer Expert** Certification**.**
