PROFESSIONAL SUMMARY

Highly skilled Software Engineering Professional with diverse experience in software development, system architecture, and project management. Demonstrated ability to develop complex software systems, optimize code functionality, and lead cross-functional teams. Strengths include problem-solving, strategic thinking, and communication skills. Previous roles have delivered significant improvements in system performance and user experience.

TECHNICAL SKILLS

- React.js
- Angular
- Material UI
- Tailwind CSS
- HTML5
- Css
- JavaScript
- Typescript
- jquery
- Ajax
- PWA
- Node.js
- Express.js
- Nest.js
- RESTful APIs
- PHP
- Laravel
- MYSQL
- MongoDB
- Postgresql
- GitHub, Jenkins, CI/CD
- AWS (EC2, S3, Lambda, RDS, IAM)
- Docker

EXPERIENCE

SOFTWARE ENGINEERING SPECIALIST, 08/2024 - Current
LTIMindtree LTD

- Developed and deployed full-stack web applications using React, Node.js, and MongoDB
- Optimized backend Node.js services, improving performance by 30% through load balancing and efficient database queries
- Built microservices architecture to manage logistics workflows in logistics management projects, reducing response times by 25%
- Collaborated closely with cross-functional teams, including front-end developers, back-end developers, and DevOps, to deliver highly scalable web applications

SENIOR SOFTWARE ENGINEER, 03/2022 - 08/2024
Softower Private Limited, Chennai

- Implementing strategic data validation and indexing techniques to optimize database performance
- Collaborated seamlessly with backend teams, ensuring Node.js applications integrated smoothly with MongoDB and MySQL databases
- Designed and created responsive user interfaces using React, emphasizing modular and reusable components for enhanced integration
- Managed state efficiently, resulting in improved front-end performance and responsiveness
- Collaborated closely with design teams to implement visually appealing and responsive UIs
- Utilized Angular to develop dynamic and feature-rich web applications, leveraging the framework's robust architecture to deliver high-quality solutions
- Collaborated with cross-functional teams in the analysis of requirements, design of solutions, and implementation of high-quality software applications
- Identified and implemented ideas to improve system performance and enhance availability
- Actively contributed to the development of technical solutions
- Responsible for the end-to-end process, including the development, testing, and implementation of new software programs

BACKEND DEVELOPER, 10/2021 - 02/2022
EnigmaSoft Technologies

- Developed a robust TMS using Node.js, Nest.js, and Angular 15
- Implemented features for optimizing logistics processes and improving transportation operations
- Utilized MySQL & MongoDB for data storage and retrieval

WEB DEVELOPER, 07/2019 - 09/2021
CloudelabsTechnology Pvt Ltd, Chennai

- Developed and maintained server-side applications using Node.js, ensuring high performance and responsiveness to requests from the frontend
- Designed and implemented RESTful APIs, enabling efficient communication between the server and client applications
- Integrated third-party services and APIs to enhance application functionality
- Utilized npm packages to streamline development processes and enhance application capabilities
- Collaborated with frontend developers to integrate user-facing elements with server-side logic
- Implemented data storage solutions using databases such as MongoDB and SQL, ensuring data integrity and security
- Conducted code reviews and provided feedback to improve code quality and adherence to best practices

EDUCATION

The New College, *Chennai, 05/2018*
BCA: **Computer Application**
GPA: 74 %

Princess Mat Hr Sec School, *Chennai, 01/2015*
SSLC & HSC
GPA: 74 %

CERTIFICATIONS

JLPT N5

PROJECTS

Ally Financial - Web Helios Insurance
Ally Financial, aimed at streamlining policy handling, claims processing, and customer interactions. This web-based application is built using **ReactJS** for the front end, ensuring a dynamic and responsive user experience, while the back end is powered by **NodeJS and ExpressJS**, providing robust API services and data management.

Transport Management System (TMS)
Developed a robust TMS using Node.js, Nest.js, and Angular 15. Implemented features for optimizing logistics processes and improving transportation operations. Utilized MySQL & MongoDB for data storage and retrieval.

Ezfleets
Fleet Management Application, Implementation of Ezfleets, a comprehensive fleet management solution. Utilized Node.js, Nest.js, Angular 14, React.js, and MongoDB for development. Streamlined fleet operations and enhanced decision-making processes.

Supply Chain Management Solution
Contributed to the development of a Supply Chain Management solution. Technologies used: Node.js, Nest.js, Angular 14, and MySQL. Optimized inventory control and improved supply chain visibility.

Japan Marine Spares
Full-stack development of a solution for Japan Marine Spares using Node.js, Nest.js, Angular 15, and MongoDB. Developed a detailed plan outlining the migration steps and timelines. Collaborated with cross-functional teams to gather requirements, conduct testing, and deploy updates.
