Shubham Chaturvedi

Summary

Experienced Senior Software Engineer in backend development, specializing in Java. Demonstrated success in enhancing system performance and implementing scalable solutions that significantly boost operational efficiency. Skilled in solving complex technical challenges through innovative approaches and a strong focus on continuous improvement.

Skills

- Data structure and Algorithms
- Design Patterns
- System Design
- Object-oriented Programming
- Problem Solving
- Java Development
- Spring Framework
- Microservices architecture
- RESTful APIs
- gRPC communication
- SQL/NoSQL databases
- JUnit, Mockito
- Kafka messaging
- Redis caching
- Angular, React
- IntelliJ, Eclipse, VS Code
- Git, Maven, Gradle, Jira

Education

2012 - 2016
Bachelor of Technology:
Computer Science & Engineering
Krishna Institute of Engineering & Technology, Ghaziabad

Achievements

- Google Code Jam Qualifier: 2016, 2017, 2019, 2020
- HackerRank Hackfest 2020: Ranked 157/8051
- January Circuits 2021: Ranked 307/6551
- December Circuits 2023: Ranked 34/3150
- January Easy 2024: Ranked 69/728
- January Circuits 2024: Ranked 35/2155

Interests

- Tech Enthusiast
- Competitive Programming
- Badminton, Chess

Experience

LinkedIn (p/y Acesoft Labs) - Senior Software Engineer
Bengaluru, India
03/2023 - 09/2025

- Worked in the LinkedIn Ads team, building and enhancing REST APIs, Kafka pipelines, Samza and Spark jobs.
- Implemented and optimized multiple Lix experiments for testing and deploying new features.
- Developed a new ad format for LinkedIn Ads using Lix, enhancing advertising capabilities and user engagement.
- Implemented the Dead Letter Queue (DLQ) process for the review ads to retry failed messages in the Samza job processing. It improves the success rate by 30%.

S&P Global (formerly IHS Markit) - Software Engineer
Gurugram, India
02/2020 - 01/2023

- Designed and developed enterprise-level features using Angular, Spring MVC, JDBC, and the Oracle database.
- Debugged and resolved critical business and performance issues using logs, heap dumps, AWR reports, and advanced debugging tools.
- Developed a Hibernate proof of concept to introduce second-level caching, improving database performance.
- Addressed security vulnerabilities identified via MEND plugin analysis.

Coforge (formerly NIIT Technologies) - Senior Software Engineer
Greater Noida, India
07/2016 - 02/2020

- Analyzed business requirements and implemented optimized solutions using pagination, caching, logging, and multilingual support.
- Developed and optimized stored procedures, functions, views, and SQL queries to enhance system performance.
- Resolved complex issues reported on Jira, ensuring smooth system functionality and client satisfaction.
- Got chance to work **on-site** with international clients.

Personal Projects

Contact Management System
A digital contact diary using the TRIE data structure & file handling in C.

Image Enhancement Technology
Implemented the concepts of digital Image processing using Core Java.
