EDUCATION

CHANDIGARH GROUP OF COLLEGES
BTech in Computer Science
April 2015 - May 2019 | Punjab, India
CGPA : 8.6/10

KURUKSHETRA UNIVERSITY
Post Graduate in Computer Application
May 2022 - May 2023
CGPA: 7.5/10

SOPHIA GIRLS SENIOR SECONDARY SCHOOL
Science
May 2014 | India
CGPA: 8.5/10

PROGRAMMING
Java • Spring Boot • SQL • Design Patterns • MongoDB • Microservices • Low-level design • ElasticSearch • REST APIs • High-level design

TOOLS
Linux• Git• IntelliJ• Postman• Datadog• RabbitMQ• Kibana• Jenkins• Kafka• AWS (EC2, ECS, Lambda, S3)• Docker• PostgreSQL• MongoDB• Redis• Elasticsearch• CI/CD• SonarQube• Agile/SCRUM• Selenium• Mockito• Algorithms• Launch Darkly• JMeter

AWARDS & ACHIEVEMENTS

• Cleared PTE Academic – Communicative Skills: 87; Speaking: 90
• PayU Rockstar Award (FY 2019–20)
• Clean, bug-free optimized code award (Awantunai, 2019)
• Semi-finalist, Techgig Code Gladiators (Deloitte, 2018)
• 2nd – Privartan Fest Singing Competition (2015)

EXPERIENCE

NETOMI | Senior Backend Java Developer
Nov 2022 – Present | Gurugram, India

- I work with the AI engine team that lets quickly respond to customer needs, extracting intent and sentiment within seconds. Automatically resolve 80% of customer service inquiries, decrease resolution time, increase customer satisfaction, and reduce support costs.
- Built end-to-end MCP action framework and backend services using Java, Spring Boot, SQL, and Redis, reducing onboarding by 40% and enabling intent-driven automation with over 80% automated customer inquiry resolution.
- Released multiple high impact features like Handle multiple sources for AnswerNet, Restrict Response, AI agent personality, Copy a bot functionality, Enabled users to search all parameters,customize Summarization output
- Implemented Auto Translation, boosting feature usage by 80% for effective global platform utilization.
- Performed thorough code reviews, guiding junior developers to enhance standards and foster continuous improvement
- Tech Stack : Java, Spring boot, Kafka, SQL, redis cache, datadog

AWANTUNAI | Senior Backend Java Developer
Nov 2020 – Nov 2022 | Gurugram, India

- Delivered high-impact merchant-facing features like Awanpoint, SKU Discounts, and Referral System, increasing MAU by 50% and transactions by 150%.
- Designed, developed, and maintained scalable backend services and RESTful APIs using Java 8, Spring Boot, and microservices architecture.
- Optimized system performance by reducing API latency and improving responsiveness, while ensuring high code quality and reliability.
- Implemented distributed tracing with Spring Cloud Sleuth and application monitoring with Datadog to support diagnostics and debugging.
- Released secure Awan Wallet feature with "one device one user" authentication, leading to an 80% increase in transactions; collaborated with cross-functional teams throughout.
- Tech stack: Java, Spring Boot, RabbitMQ, SQL, MongoDB, Redis Cache.

PAYU PAYMENTS PRIVATE LIMITED | Software Engineer
Jan 2019 – Nov 2020 | Gurugram, India

- Worked in the Biz-BN team handling PayU's netbanking transactions, building and maintaining backend services that directly integrated with banking systems.
- Designed and developed scalable backend services and REST APIs using Java, Spring Boot, SQL, and Redis, translating business and RBI regulatory requirements into compliant payment systems.
- Built Rails-based banking simulators and Selenium automation to simulate transaction loads, while resolving complex API and database issues and adding Mockito-based unit tests to improve coverage and production stability.
