MANHAR SAINI

DevOps Engineer | Kubernetes | AWS & Azure | Docker | Git | CI/CD Automation | IaC

+91 9729042811 | manharsaini@gmail.com | linkedin.com/in/manharsaini | Gurugram, Haryana

Professional Summary

DevOps Engineer with 5.5+ years of experience designing, implementing, and managing scalable cloud-native infrastructure and CI/CD pipelines across AWS and Azure. Skilled in Kubernetes (EKS/AKS), Docker, Terraform, and Jenkins/Azure DevOps. Strong background in Infrastructure as Code (IaC), automation, observability, and security. Proven ability to optimize pipelines, reduce costs, and enable zero-downtime deployments. Recognized for delivering robust, secure, and high-performing DevOps solutions.

Experience

DevOps Engineer – M.T.S-II

Mavenir Systems Pvt. Ltd | Feb 2020 – Present | Gurugram, Haryana

Project 6: Infrastructure as Code & Advanced Container Orchestration

- Enforced Infrastructure as Code (IaC) with Terraform to provision AWS (EC2, VPC, IAM, RDS) and Azure (VMs, VNets, Storage), cutting manual setup time by 70%.
- Refined Docker images using multi-stage builds and caching strategies, reducing image size by 50% and accelerating build speed by 40%.
- Upgraded CI/CD pipelines (Jenkins, Azure DevOps, AWS CodePipeline) with parallel stages and reusable templates, decreasing execution time by 35%.
- Configured advanced Kubernetes scheduling (node affinity/anti-affinity, pod placement rules, DaemonSets) to balance workloads and lower node contention by 30%.
- Fortified cluster security with RBAC policies, namespace isolation, and secret encryption.

Project 5: DevOps Integration

- Orchestrated workloads on AWS EKS and Azure AKS, cutting cluster maintenance overhead by 30%.
- Developed Azure DevOps pipelines integrating GitHub/Azure Repos, Docker, and Kubernetes for automated deployments.
- Delivered zero-downtime releases with automated rollbacks, enhancing uptime SLAs and customer satisfaction.
- Implemented monitoring with Prometheus, Grafana, and Azure Monitor, reducing incident resolution time by 40%.

Project 4: Cloud-Native Deployment with Kubernetes on VMs

- Launched production Kubernetes clusters on AWS EC2 and Azure VMs, scaling to handle 2x traffic without downtime.
- Streamlined infrastructure provisioning via Jenkins, AWS CodePipeline, and Azure Pipelines, lowering release effort by 45%.
- Secured cloud environments with IAM roles, RBAC, and secrets management.
- Optimized cloud costs by 20–25% through efficient resource utilization.

Project 3: CI/CD Automation with Jenkins & Git/GitHub

- Engineered Jenkins pipelines automating build, test, and deployment for microservices.
- Integrated GitHub with Jenkins for version control, triggers, and PR checks.
- Accelerated build/test feedback cycles from hours to minutes, boosting developer productivity by 35%.
- Increased release frequency by 50% with stable weekly deployments.

Project 2: Kubernetes Adoption for Orchestration

- Migrated applications to Kubernetes for container orchestration with rolling deployments and self-healing.
- Minimized manual production interventions by 40%.
- Expedited release cycles by 50% using Docker + Kubernetes integrated CI/CD pipelines.

Project 1: On-Premises Containerization

- Containerized enterprise applications with Docker, improving deployment speed by 30%.
- Established a private Docker registry for secure, faster image pulls.
- Automated builds and deployments, increasing release efficiency by 35%.

Skills

- **Containerization & Orchestration:** Docker, Kubernetes (EKS/AKS), Helm
- **CI/CD:** Jenkins, Azure DevOps, GitHub Actions, Git Hooks, GitLab CI/CD
- **Infrastructure as Code (IaC):** Terraform, AWS CloudFormation, Azure ARM Templates
- **Cloud Platforms:** AWS (EC2, VPC, IAM, RDS, ECS, EKS), Microsoft Azure (VMs, VNets, AKS, App Services)
- **Monitoring & Logging:** Prometheus, Grafana, Azure Monitor, EFK Stack
- **Scripting & Automation:** Python, Bash
- **Version Control:** Git, GitHub, Azure Repos
- **DevOps Practices:** RBAC, Cost Optimization, Autoscaling, Load Balancing, Disaster Recovery, Service Mesh (Istio/Linkerd), Cloud Security & Compliance

Education

Bachelor of Technology (B.Tech) in Computer Science & Engineering, SRM University (2015–2019)
