*Targeting assignments in the field of **Software Testing** with an esteemed organization*, preferably in

CORE COMPETENCIES

- Software Requirement Specification (SRS) Analysis
- Agile Methodology
- API Testing
- Firmware Testing
- Embedded Application Testing
- Bug Reporting and Tracking
- Test Environment Preparation
- Firmware Upgrading
- Network Connectivity Validation
- Software Testing Life Cycle
- Software Development Life Cycle

TECHNICAL SKILLS

- **Test Management and Defect/Bug Tracking Tool**: JIRA,and TestRail
- **Web Driver:** Selenium
- **Programming Language**:JAVA
- **Other Tools:** Putty, Postman, and WinSCP

SOFT SKILLS

- Communication
- Problem-solving
- Team Collaboration
- Decision-Making
- Time Management

CERTIFICATIONS

2019: BE_EEE in KLE institute of technology Hubli

2016: Diploma in EEE in KHK institute of technology Dharwad

SUMMARY

- Overall, 2.4 years of expertise in Software Testing within the Information Technology industry, with a deep understanding of SDLC, STLC, and Test methodologies.
- Proficient in using **Selenium WebDriver** for automating web applications across multiple browsers
- Expertise in writing automated test scripts using Java/Python with Selenium WebDriver.
- Hands-on experience with locators such as XPath, CSS Selectors, ID, Name, and Link Text to interact with elements on web pages.
- **Proficient in Functional Testing, UI Testing, Sanity Testing, Regression Testing, System Testing, and Integration Testing**, with hands-on experience in Verification and Validation Testing.
- **Excellent in analyzing and reviewing Software Requirement Specification (SRS) documents**, ensuring a comprehensive understanding of project requirements.
- **Excel at API testing and translating functional requirements** into comprehensive test cases.
- **Knowledge of both Agile and V-model methodologies**, tailoring testing approaches to project requirements for optimal results.

PROFESSIONAL EXPERIENCE

***Test Engineer*| Digitectura technologies pvt ltd, Bangalore | Mar'24 – Present**

Project Executed: LMS Commissioning

Description: As a **Tester** at **Digitectura** since **March 2024**, I have been working on a **web-based application** for **LMS commissioning**. This process involves mapping sensors to the cloud using the installed sensor IDs and configuring the settings of lights according to the customer's requirements.

Key Result Areas:

- Test the interaction between the application and the **cloud infrastructure**, ensuring proper data transmission and mapping of sensors to the cloud.
- Work closely with **development teams** to understand application requirements and assist in creating test cases based on business logic.Manually executing and validating test cases against specified requirements.
- Maintaining documentation for clear requirement-traceability.
- Validate the process of configuring **light settings** as per the customer's requirements, ensuring the application adjusts settings accurately.
- Executing tests, reporting defects, ensuring timely closure, and retesting cases for validation.

Quality Analyst | Authority Entrepreneur , Bangalore | Aug' 23 – Dec'23

Project Executed: Hyper Service

Description: ***As a QA*** with **AE** from Aug 2023 to December 2023 worked on a web-based application as designing and managing **digital campaigns**, creating compelling content for websites and email marketing, and optimizing performance through **data analytics**. I am proficient in utilizing tools like **Google Analytics**, **Google Ads**, **Facebook Ads**, and **SEO techniques** to continuously optimize campaigns and achieve key performance indicators.

Key Result Areas:

- Used **Selenium WebDriver** or other relevant tools for automating repetitive testing tasks, especially for the mapping and configuration processes.
- Execute both **manual and automated tests** to ensure the reliability and accuracy of the web-based application.
- Troubleshot device issues and created comprehensive guideline documents.
- Prepared timely Status Reports and updated Test Reports.
- Go High Level: Verify workflow and check all conditions are present as per Documents
- Functional Testing, Regression testing, Smoke Testing on web mobile and Desktop application

Quality Analyst | Calibre Code Solution , Bangalore | Dec 22 – Jun'23

Project Executed: EVA

Description: ***As a QA*** with **CCS** from Dec 2022 to December 2023 worked on a web-based application and device management tool. Worked on automating the testing of the EVA web application, a leading online job portal, using **Selenium WebDriver** and **Java**. The primary focus was to ensure the functionality, performance, and security of the website, ensuring that features such as user login, job search, profile management, and application submission worked as expected.

Key Result Areas:

- Automated key workflows such as **user login**, **job search**, **profile creation**, and **job application** submission.
- Integrated **TestNG** for test case management and reporting, ensuring efficient execution of test suites and real-time feedback on test results.
- Prepared timely Status Reports and updated Test Reports.
- Go High Level: Verify workflow and check all conditions are present as per Documents
- Functional Testing, Regression testing, Smoke Testing on web mobile and Desktop application
