Profile Summary

I have 3 years of IT experience in the Quality Assurance phase, with hands-on experience in automation testing, performance testing, functional testing, and database testing.

- In depth Knowledge and expertise in functional, Integration , Sanity, Regression and Smoke Testing
- Good experience in Performance testing – **Jmeter, postman**
- Strong knowledge in Java - selenium and Writing SQL query,
- Abilityto understand Business requirements and converting them into practical Test Scenarios.

- Worked in dynamic Agile-scrum environment and actively participated in all scrum ceremonies
- Good knowledge in preparing test plan and test case document.

- Strong experience in the entire Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC) and specialized in Validation.
- Solid understanding of Ecommerce domain terminologies and hands on experience in web Applications like Admin portal
- Proficient experience in Defect Tracking Tool **JIRA**.
- Strong experience in preparing Test Strategy, Test Scenarios and Test Scripts for Automated Testing for various web applications.

- Managing testing activities like Task Allocation, Future Release Planning and Supporting for the release plan.

TECHNICAL SKILLS

- Skills: Java Selenium, Basic Python ,Functional Testing , Mobile Testing, API Testing, Database Testing, SQL, Performance Testing, HTML.
- Database: MongoDB, Databricks
- Tools: Jmeter, Postman, Maven, TestNG, Eclipse, jupyter notebook
- Test management tool : JIRA ,Clickup
- Domain : Ecommerce
- Automation : Java – selenium, Eclipse

Experience Summary :

Exathought Technology Consultant Pvt Ltd, Bangalore, KA
Software Engineer – Testing **Oct 2022 – Jun 2025**

PROJECT1: Admin Portal for E-Commerce Application and Mobile application

Role : Software Engineer - Testing

Project Description:

The **Admin Portal for E-Commerce Application** is a web-based backend management system that allows administrators and authorized staff to manage the core operations of an online store. This portal acts as the control center for maintaining the catalog, tracking orders, handling customer queries, monitoring analytics, and configuring business settings—ensuring smooth and efficient operations of the e-commerce platform.

The portal is designed to be user-friendly, secure, and scalable, allowing real-time control and visibility into the various aspects of the store.

Project Responsibility

- Developed and maintained Selenium-based automation scripts using Java for testing the Admin Portal's key functionalities
- Automated regression test suites for critical workflows like login, product addition, inventory updates, and order status changes to reduce manual testing effort.
- Integrated test scripts with **TestNG** for test execution,
- Understanding the application and customer requested enhancements.
- Involved in writing test scenarios, Test plan and test cases.
- Involved in test case and test plan review meetings.
- Logged defects in **JIRA**, coordinated with developers for resolution, and retested resolved bugs.
- Proficient in creating test cases, executing test scripts, identifying and reporting defects, and ensuring the overall quality of software applications.

PROJECT2: Catalog service and price Engine

Role: Software Engineer - Testing

Project Description:

This project consists of two core components: a **Catalog API** (backend) and a **Price Engine Front-End Application** (frontend), both of which are designed to work together to manage product data and dynamically calculate and display prices based on configurable rules.

Project Responsibility

- Analyzed business requirements and translated them into comprehensive, practical test scenarios to ensure thorough test coverage.
- Executed functional, regression, and performance testing across web and backend systems to validate stability and functionality.
- Performed backend API testing to verify web service functionality, security, and performance under various scenarios.
- Conducted end-to-end front-end testing to identify UI/UX defects, ensuring a seamless and consistent user experience.
- Managed and executed test cases in both development and UAT environments, ensuring software met business expectations and end-user needs.

Meru Data LLP, Hyderabad **Jun 2025 – Nov 2025**

Role : Senior Quality Assurance Analyst

PROJECT2: Web Application Functional Testing

Project Description:

Involved in testing a web-based enterprise application consisting of multiple functional modules such as **Datamap, Survey, and DSR Request,** The project focused on validating end-to-end workflows, ensuring data consistency across modules, and verifying the integration between front-end and backend systems.

Project Responsibility

- Analyzed requirement documents and prepared detailed test scenarios and test cases for each module (Datamap, Survey,DSR Request)
- Performed functional, integration, and regression testing for all web application modules
- Executed UI testing to verify field validations, form submissions, and navigation between components
- Logged and tracked defects using Azure DevOps and collaborated with developers for resolutions Participated in test plan reviews, daily standups, and release readiness discussions
- Contributed to smoke and sanity testing post-deployment to verify environment stability

EDUCATION

Bachelor of Engineering from ATME COLLEGE OF ENGINEERING , VTU, Belgaum, Karnataka, India
