AI Automation Specialist | DevOps Engineer | MLOps Engineer | Linux Admin

AWS CERTIFIED SOLUTIONS ARCHITECT – ASSOCIATE

SUMMARY

DevOps, MLOps, and AI Cloud Engineer (2 years) specializing in automation, scalable cloud architecture, and AI-driven development. Proficient in CI/CD, Terraform, n8n workflows, serverless architecture, and ML/LLM deployment on AWS, Azure, and open-source platforms. Experienced in integrating LLMs (Ollama, Bedrock, GPT) and building AI agent pipelines for intelligent automation, monitoring, and observability.

EDUCATION

2021 – 2024 **Bachelor of Computer Engineering**
Annapoorana Engineering College

2016 - 2019 **Diploma in Computer Engineering**
Thiagarajar Polytechnic College

TECHNICAL SKILLS

Cloud & VPS Platforms: AWS (EC2, Lambda, S3, RDS, EKS, CloudFormation, CloudFront, IAM, CloudTrail, Bedrock, SageMaker, Route 53, Elastic Beanstalk), Azure (VMs, AKS, Functions, Blob Storage, App Services, Monitor), GCP (Compute Engine, Cloud Run, APIs, Cloud Storage, Vertex AI), VPS & Hosting: DigitalOcean Droplets, Linode, Vultr, Hetzner Cloud, OVH, Contabo, Hostinger, cPanel, Webmin, Virtualmin

DevOps & CI/CD: Terraform, Jenkins, GitHub Actions, GitLab CI, CircleCI, AWS CodePipeline, Ansible, n8n, CloudFormation, Docker Compose, ArgoCD, Kubernetes Operators, Infrastructure as Code (IaC), Bash Automation, Cron Jobs, API-based CI/CD Integrations

Containers & Orchestration: Docker, Kubernetes (EKS/AKS), Ingress Controllers, Auto-scaling, Pod Security, Service Mesh (Istio, Linkerd)

MLOps & AI: SageMaker, MLflow, LangChain, Bedrock, Ollama, Generative AI, Prompt Engineering, Model Deployment & Monitoring, Data Versioning, Feature Store, LLMOps, Vertex AI Pipelines, Hugging Face, OpenAI API

Monitoring & Observability: Prometheus, Grafana, CloudWatch, ELK Stack, Datadog, Zabbix, Uptime Kuma, Loki, Alertmanager

Programming & Scripting: Python, Bash, YAML, JSON, FastAPI, Flask, Node.js, React.js, TypeScript, Shell Scripting, REST APIs

Databases & Storage: MySQL, PostgreSQL, DynamoDB, Redis, Elasticsearch, SQLite, S3, EFS, Azure Storage.

Security & Networking: IAM, VPC, SSL/TLS, Firewall, VPN, Security Groups, Load Balancers (ALB/NLB), Fail2Ban, UFW, Reverse Proxy (Nginx/Traefik), Cloudflare CDN, WAF Configuration

Server Administration: Linux (Ubuntu, RHEL, Rocky, CentOS), Shell Automation, Systemd Services, Process Monitoring, Nginx, Apache, Certbot (Let's Encrypt), VPS Optimization, Backup & Recovery, Log Management,
User Access Control

Version Control: Git, GitHub, GitLab, Bitbucket, Branching Strategies, Merge Request Pipelines

Tools & Platforms: Docker Desktop, AWS CLI, Azure CLI, Postman, VS Code, Jupyter, n8n, Git Bash, Datadog, Cloudflare Dashboard

EXPERIENCE

AI Automation Engineer & DevOps Engineer | Neurobit AI | Nov 2025 - Present

- Designed and deployed AI automation systems using n8n for business workflows, SaaS operations, and internal tooling.
- Built and managed voice AI agents using Retell AI, ElevenLabs, and Vapi AI for customer support, lead qualification, and AI assistants.
- Implemented Claude Code and Vibe Coding methodologies to accelerate AI-driven development and automation.
- Developed and maintained SaaS products, handling architecture design, feature rollout, monitoring, and scalability.
- Led website development and database management for AI and SaaS platforms with secure, scalable deployments.
- Integrated LLMs with APIs and databases for real-time automation, analytics, and conversational workflows.
- Managed cloud infrastructure, CI/CD pipelines, backups, monitoring, and zero-downtime deployments.

AI DevOps & MLOps Engineer | Airavad Web Solution | May 2025 – Oct 2025

- Automated full CI/CD workflows using CircleCI, GitHub Actions, and Terraform for AWS EKS deployments.
- Built intelligent n8n pipelines for cross-service orchestration (Git, Slack, CloudWatch, and Lambda triggers).
- Integrated Ollama and Bedrock LLMs via FastAPI and LangChain to enhance cloud monitoring automation.
- Developed MLOps pipelines using SageMaker, Google Colab, and MLflow for model training, testing, and deployment.
- Implemented Prometheus-Grafana dashboards for real-time Kubernetes and SageMaker monitoring.
- Deployed AI-driven alerting and voice-based notifications using ElevenLabs and Lovable integrations.

Cloud & Linux Administrator (DevOps Focus) | Nux Software Solutions | May 2024 – Apr 2025

- Managed Linux infrastructure (RHEL, Ubuntu, Rocky) and deployed containerized workloads via Kubernetes.
- Built modular Terraform scripts for provisioning EC2, S3, RDS, and VPCs with automated security policies.
- Automated Lambda + EventBridge triggers for serverless workflows and system monitoring.
- Created AI-powered Python scripts using ChatGPT APIs for automated incident diagnostics.
- Set up Prometheus-Grafana monitoring and alert systems improving uptime by 30%.

PROJECTS

- **AI Voice Agent Platform :** Built voice agents using Retell AI, ElevenLabs, Vapi AI
- **SaaS Automation Platform :** Multi-tenant AI automation system using n8n and AWS
- **AI-Enhanced CI/CD Orchestration:** Automated build and deployment pipelines using CircleCI + Terraform + Lambda for zero-downtime delivery.
- **MLOps Pipeline Automation:** Integrated SageMaker, MLflow, and Google Colab for model training, testing, and versioned deployment.
- **LLM Infrastructure with Ollama & Bedrock:** Deployed containerized local LLM models using Ollama and integrated Bedrock APIs for hybrid AI workflows.
- **N8n Automation System:** Designed multi-cloud workflow automation connecting AWS EventBridge, Slack, GitHub, and Azure APIs.
- **Intelligent Monitoring Suite:** Combined Prometheus, Grafana, and LangChain for predictive anomaly detection and AI-assisted observability.
