PROFESSIONAL SUMMARY

Profile Summary

- .NET Developer with 3+ years of experience in full-stack software development, including design, coding, testing, deployment, and maintenance of enterprise-level applications.
- Proficient in C# and core Microsoft technologies such as .NET Core, ASP.NET MVC, Entity Framework, LINQ, and RESTful APIs.
- Strong understanding of OOP principles, data structures, algorithms, SOLID principles, and software debugging practices.
- Experience across multiple industries, including **Energy & Utilities**, **Healthcare IT**, **Finance & Banking**, and **SaaS-based solutions**.
- Skilled in front-end development using HTML5, CSS3, JavaScript (ES6+), TypeScript, Angular, and React.js for building responsive UI/UX.
- Hands-on experience with cloud platforms and DevOps tools, including **Microsoft Azure**, **GitLab**, **CI/CD pipelines**, and **Postman** for API testing.
- Knowledge of **Python**, **MATLAB**, and **MySQL**, with exposure to **Artificial Intelligence**, **Machine Learning**, and **Natural Language Processing (NLP)**.
- Experienced in Agile/Scrum methodologies using tools like **Jira**, and capable of collaborating with cross-functional teams to deliver high-quality, scalable software.

SKILLS

- C#
- ASP .NET MVC
- ENTITY FRAMEWORK, LINQ
- OOPs, DATA STRUCTURES AND ALGORITHMS
- FRONTEND (HTML, CSS, JAVASCRIPT), ANGULAR/REACT
- Cloud Service: Azure
- Soft Skills: Problem-Solving, Communication, Team Collaboration, Agile Methodologies, Mentoring
- ASP .NET CORE
- RDBMS(SQL SERVER, MySQL), NOSQL (MongoDB, Neo4j)
- MICROSERVICES, REST APIs
- AGILE METHODOLOGY, VERSION CONTROL (GIT)
- Tools & Platforms: Visual Studio, Azure DevOps, Jenkins, Git
- Other Technologies: Docker, Kubernetes, Kafka, Redis, IBM MQ
- Additional Skills: Unit Testing, API Development, Continuous Integration/Continuous Deployment (CI/CD), Performance Optimization

WORK HISTORY

SOFTWARE ENGINEER
QSS Technosoft Pvt Ltd, Noida
Nov 2024 – Present
Project: *Miami Jail Management System*
A comprehensive .NET Core and Microservices-based platform for managing the operational and medical needs of inmates in Miami County Jail, featuring both admin and inmate-facing applications.

Key Achievements:

- Team Leadership: Led a team of 5 developers, overseeing feature rollouts, task assignments, code reviews, and sprint deliveries in coordination with the delivery manager.
- Modernisation: Migrated legacy JavaScript codebase to ES6 standards, enhancing code maintainability and performance.
- Media Integration: Developed full-stack media upload functionality, enabling image and video uploads across modules.
- Grievance Module: Designed and implemented the Grievance and Appeal workflow, including UI, backend API integration, and database schema.
- Reusable Components: Created a universal DataTable utility for consistent data display, reducing code duplication by 70%.
- Automation: Implemented auto-acknowledgement of tickets based on elapsed time, ensuring real-time updates between admin and inmate applications.
- Background Services: Developed worker scheduler and Windows Service to synchronize ticket statuses across platforms.
- Status Indicators: Introduced colour-coded ticket status indicators to improve user visibility and tracking.
- Data Synchronization: Built services to populate real-time inmate data across applications.
- Activity Logging: Added comprehensive activity logging for ticket views and actions, enhancing audit capabilities.
- Performance Optimisation: Implemented JS and CSS bundling to reduce request load and improve application performance.
- Messaging Integration: Integrated IBM MQ for secure, real-time message transfer between applications.
- Media Management: Developed server-side logic for efficient media saving using a structured file directory.
- Database Optimisation: Refactored stored procedures to handle large data volumes efficiently with simplified SQL queries.
- User Experience: Enhanced media screen with preview loading and upload progress indicators.
- Security: Integrated JWT authentication and API header forwarding using Securus SSO.

Technologies: C#, .NET Core, .NET 6/8, ASP.NET MVC, Razor Views, Entity Framework, REST APIs, JavaScript (ES6), jQuery, HTML5, CSS3, Bootstrap, SQL Server, Dapper, IBM MQ, Microservices, JWT, Hangfire, SignalR, Windows Services, Postman, Swagger, GitLab, Azure DevOps, IIS, Securus SSO

SENIOR SOFTWARE ENGINEER
Mindfire Solutions, Remote
Sep 2024 – Nov 2024
Project: *Goal Plans Accounting (SaaS-based Accounting Platform)*
An application facilitates clients to raise tickets and manage billing for projects, including day-to-day payments and resource payouts.

Key Contributions:

- Issue Resolution: Addressed user-reported issues and implemented weekly feature enhancements.
- Frontend Migration: Migrated the application from Angular 8 to Angular 16, improving UI consistency and performance.
- Performance Improvement: Optimised invoice and receipt processing, reducing processing time by 50%.
- Automation: Implemented functionalities to automatically calculate off days of resources, integrating them into billing and payouts based on client preferences.
- Database Optimisation: Refactored SQL procedures for better performance and simplified data access.
- API Redesign: Redesigned APIs to enhance scalability and maintainability.
- Client-Side Enhancements: Made significant client-side functionality changes to improve user experience.
- Data Integrity: Ensured data integrity during migrations and updates.

Technologies: C#, .NET 7, ASP.NET MVC, Razor Views, Entity Framework, LINQ, REST APIs, HTML, CSS, JavaScript, Bootstrap, Microsoft SQL Server, MySQL, GitLab, Jira, Angular 8 & 16, TypeScript, Swagger, Postman

SENIOR EXECUTIVE (.NET DEVELOPER)
Transactional Solutions International India Pvt., Delhi
Jul 2024 – Sep 2024
Project: *ATM Ticket Management System*
An in-house application to handle tickets from banks related to cash deposits, theft alerts, cash balances, and other ATM-related activities.

Responsibilities:

- Feature Implementation: Developed functionalities allowing banks to upload cash deposit memos, updating ATM systems accordingly.
- Server Integration: Integrated a remote SFTP server for secure IP-based remote connections without third-party dependencies.
- Server Maintenance: Addressed server issues and IP ping problems to ensure seamless remote connections to ATM servers.
- Reporting: Handled reports and change requests from leads, focusing on server problems and remote connectivity.

Project: *Video Downloader & Surveillance Integration*
An application to monitor ATM locations using integrated camera DVRs, facilitating video downloads, alarm raising, and remote software issue resolution.

Responsibilities:

- Camera Integration: Implemented support for four new cameras per bank, addressing increased surveillance requirements.
- Security: Integrated OAuth for secure API access to DVR/NVR systems for remote and designated surveillance devices.
- Performance Optimisation: Reduced live footage loading time from 20 seconds to 5 seconds by optimising RTSP protocols and DVR methods.
- Exception Handling: Developed robust classes and methods to handle exceptions, reducing video footage extraction time by 40%.
- HD Camera Support: Integrated HD cameras for specific banks, managing complex NVR code handling and reducing wait times for live feeds and downloads.

Technologies: C#, ASP.NET Core, ASP.NET MVC, WinForms, Python, HTML, CSS, JavaScript, Bootstrap, Microsoft SQL Server, MongoDB, Git, Jira, WinSCP, IIS, TCP/IP, PuttyGen, GStreamer, FFmpeg, SignalR, WebSockets, OAuth, Postman, REST APIs, SFTP

SOFTWARE ENGINEER (.NET DEVELOPER)
CGI India, Chennai
Nov 2022 – Mar 2024
Project: *Shell H3 (Shell Asia)*
Developed and maintained robust web applications for Shell Asia, ensuring high performance and responsiveness.

Key Deliverables:

- Backend Development: Designed and developed backend services using .NET Core and C#, ensuring scalability and high performance.
- Frontend Integration: Collaborated with UI/UX designers to integrate HTML, CSS, and JavaScript, enhancing user experience.
- Database Management: Utilised Entity Framework Core for efficient database operations and seamless interaction with MSSQL Server.
- Agile Participation: Actively participated in Agile development processes, including daily stand-ups, sprint planning, and retrospectives.
- Microservices: Implemented microservices architecture to improve application modularity and scalability.
- Cloud Services: Leveraged Microsoft Azure for deploying and managing applications.
- Containerisation: Utilised Docker and Kubernetes for containerisation and orchestration of applications.
- Messaging Systems: Integrated Kafka and Redis for efficient messaging and caching mechanisms.

Technologies: C#, ASP.NET Core, Entity Framework Core, LINQ, MVC, Web APIs, Razor Pages, Microservices, HTML5, CSS3, JavaScript, TypeScript, Angular, SQL Server, MySQL, Visual Studio, Azure DevOps, Jenkins, Git, Microsoft Azure, Docker, Kubernetes, Kafka, Redis, Swagger, Postman

TEST ENGINEER
CGI India, Chennai
Jun 2022 – Nov 2022
Project: *Euro Shell Cards BV*
Conducted functional testing for customer handling and card services across multiple countries in the new GFN HPOC environment.

Responsibilities:

- Functional Testing: Created and executed test cases for functionalities like membership fees, price rules, price lists, bonuses, discounts, and other complex pricing and billing features.
- Billing Reports: Generated billing reports for national and international transactions.
- Environment Testing: Performed GFN POC smoke tests and pilot access tests to ensure correct permissions and environment access.
- Defect Management: Reported and tracked defects, verified bug fixes, and ensured their resolution.
- Testing Methodologies: Conducted both manual and automation testing, focusing on functional and regression testing.
- Status Reporting: Reported testing progress to the test lead and business stakeholders on a daily and weekly basis.

Technologies: Postman, .NET, Python (for automation), SQL Server, REST APIs, GFN POC, Jira, Microsoft Excel, Test Case Management Tools

EDUCATION

National Institute of Technology - Agartala, India | B.Tech
Electronics and Instrumentation Engineering, 05/2022

Kendriya Vidyalaya No.1, Kunjaban - Agartala, India | School I-XII
