SAI THEJA PENDLIMARRI

SENIOR SOFTWARE ENGINEER

+91-9063639446 tejasai2887@gmail.com

Proficient in Python, AWS, Azure, Kafka, and Agile methodologies, targeting a Senior or Lead Back-end/Cloud Engineering role to leverage expertise to design and deliver scalable, efficient, and secure multi-cloud solutions that drive business value and innovation.

Education

2015-2019, B.Tech. in Engineering
Sree Vidyanikethan Engineering College, Tirupati

2015, 12th, Sree Chaitanya Junior College, Vijayawada

2013, 10th, Keshava Reddy Educational Institutions, Tirupati

Core Competencies

- Serverless Architecture & Data Pipelines
- Software Development
- Automation (Testing, Firewall Services)
- Continuous Integration / Deployment
- Automation (Testing, Firewall Services)
- Continuous Integration / Deployment
- Multi-Cloud Encryption & Tokenization
- Kafka-Based Streaming
- Back-end API & Microservices Development
- Cloud Cost Optimization
- Agile Software Delivery & CI/CD
- Cross-Platform Application Design
- Data Modeling & Analytics Engineering

Technical Skills

- **Languages & Frameworks:** Python, Java, JavaScript, REST API
- **Cloud & Infrastructure:** AWS, Azure, Terraform, Kubernetes, Kafka, GCP
- **Data & Analytics:** Snowflake, SQL, ETL, Azure Data Factory
- **DevOps & Tools:** GitHub Actions, ArgoCD (GitOps), Git, Unit Testing (Pytest), JIRA, Agile
- **Other Tools:** Apache ETL, Azure Machine Learning, Jupyter, Shell Scripting, GCP

Profile Summary

- Results-driven Software Developer with **6+ years** of experience in backend architecture and development, specializing in backend development, cloud architecture, and serverless solutions. Currently working as a **Senior Engineer at Carelon Global Solutions**, delivering scalable and efficient software solutions.
- **Cloud & Serverless Specialist**: Spearheaded design and development of a petabyte-scale, fully serverless platform enabling seamless data exchange between cloud and on-prem systems.
- **Streaming & Automation Expert**: Reengineered batch file exchange with Kafka-based streaming, improving data-handling throughput by **20×** (1M→20M files/day).
- **Cost Optimization Leader**: Deployed streamlined cloud architecture across AWS and Azure, achieving a **15% reduction in cloud costs**.
- **DevOps & Agile Practitioner**: Delivered high-quality software via CI/CD, design patterns, and Agile best practices throughout the lifecycle.
- Competent in **multi-cloud environments** with strong focus on **data encryption, tokenization**, and **performance engineering**.

Achievements

- **Data Streaming Innovator** – Enhanced file processing throughput by **20×**, going from 1 million to 20 million files per day.
- **Serverless Architect** – Architected a full-scale, petabyte-level serverless system with secure cloud–on-prem interoperability.
- **Efficiency Champion** – Reduced manual testing effort by **30%** using automated Python tooling.
- **Top Performer** – Consistently recognized for leadership and high-impact project delivery during critical phases.

Work Experience

Sep'22- Present, Senior Software Engineer, Carelon Global Solutions, Bangalore

Carelon is a technology and business process solutions provider focused on delivering digital healthcare transformation.

- Played a pivotal role in developing a petabyte-scale, fully serverless application enabling seamless and secure data exchange between cloud and on-premise environments.
- Spearheaded end-to-end migration from AWS to Azure, aligning with client requirements to ensure seamless workload transition, optimized cost structures, and enhanced security compliance with zero business disruption.
- Integrated Kafka-based streaming to replace legacy file-based processing, improving data throughput and operational efficiency.
- Implemented advanced data encryption and tokenization strategies to enhance security compliance across cloud platforms.
- Actively contributed to Agile sprints, peer code reviews, and cross-functional discussions to maintain quality and align with business goals.
- Leveraged infrastructure-as-code tools and DevOps pipelines to streamline deployments and maintain consistency in environments.

High Impact Project

Sep'22-Present, Cloud Data Exchange

- Architected a **fully serverless application** on AWS and Azure to enable seamless cloud ↔ on-prem data exchange with advanced data encryption and tokenization.
- Replaced legacy file-based transfers with **Kafka streaming**, boosting processing scale to 20 million files/day.
- Optimized infrastructure for cost efficiency and scalability.

Soft Skills

- Analytical Problem Solving
- Cross-Functional Collaboration
- Effective Communication
- Agile Team Leadership
- Innovative Thinking
- Time Management

Jun'19-Sep'22, Python Developer & Project Coordinator, Cognizant Technology Solutions, Bangalore

Cognizant is a global IT services company offering digital, technology, and consulting solutions.

- Led the end-to-end backend development lifecycle, from architecture and coding to deployment and post-deployment support.
- Acted as a liaison between technical teams and clients, ensuring that project objectives were met and escalations were proactively mitigated.
- Collaborated on various backend solutions using Python, implementing robust logic and data-handling pipelines across critical applications.

Delivered key contributions to multiple high-impact projects, including:

Nov'2021-Sep'22, Dell Chromebook Health Monitor

- Designed cross-platform software to relay device health metrics to backend systems.
- Built reusable frameworks in OOP, enhancing code modularity and maintainability.

Jun'21-Aug'21, Marketing Intelligence

- Developed ML-based customer behavior prediction using Azure ML and handled ETL with Python and SQL Server.
- Delivered predictive insights to support targeted marketing strategies.

Jul'20-May'21, DCN Firewall Automation

- Automated firewall rule creation and management to streamline network security operations.
- Led automation, bug-fixing, and migration efforts to enhance client service delivery.

Oct'19-Jul'20, Web Analytics for Cisco

- Captured web activity from Apache logs, processed via GCP and Snowflake, enabling analytics-driven marketing.
- Enhanced reporting using Dataproc and SnowSQL pipelines.

Jul'19-Oct'19, STB Testing Automation

- Automated remote control testing for set-top boxes via Python and STB test tools to reduce manual testing effort.

Jan'19-Apr'19, Image Recognition

- Leveraged Google Cloud Vision API to implement an image classification system based on historical data.

Personal Details

Date of Birth: 27th March, 1998
Languages Known: English, Telugu & Hindi
Address: Bengaluru
