Professional Summary

Quality Assurance Engineer with 3.2 years of experience in manual and API testing, SQL database validation, and telecom domain testing. Strong expertise in CSG SingleView, OSS/BSS systems, and end-to-end billing validation. Adept at identifying and documenting defects, ensuring robust software delivery in agile environments. Experienced in collaborating with cross-functional teams and utilizing tools such as JIRA, Postman, and HP ALM for defect management and test planning.

Professional Experience

Virtusa, Chennai, India

QA Engineer (March 2021 – April 2024)

• Executed comprehensive manual and API testing processes to identify, document, and manage defects, contributing to high-quality software releases.

• Developed and maintained detailed test cases, test plans, and test scripts to ensure full coverage of functional and non-functional requirements.

• Performed SQL queries to validate backend data integrity, ensuring accurate transaction processing and reporting.

• Conducted regression testing, smoke testing, and UAT to verify software stability and functionality post-code changes.

• Effectively tracked and managed defects using JIRA, coordinating with development teams for prompt resolution.

• Collaborated with stakeholders to gather requirements and provide accurate test estimations and plans.

Projects

BT Speed (British Telecom)

• Performed end-to-end manual and API testing for BT Speed, ensuring compliance with British Telecom's standards.

• Billing Systems: Validated invoice generation, payment processing, and rating functionalities. • OSS/BSS Testing: Ensured seamless integration between Operational Support Systems (OSS) and Business Support Systems (BSS), testing order management, service activation, and network provisioning.

• SQL Database Testing: Wrote and executed complex SQL queries to validate backend data, ensuring data accuracy and consistency.

• Automated regression test cases using Selenium to enhance test efficiency and reduce manual efforts.

Tools Used : JIRA, HP ALM, Sing view

Health First Insurance

• Conducted manual testing processes to detect and document defects, ensuring software quality.

• Designed and executed automation scripts in Selenium to test critical functionalities. • Performed end-to-end API testing using Postman and automated test workflows to streamline operations.

Education

Bachelor of Technology (B. Tech.)
Yenepoya Institute Of Technology, Mangalore, India (August 2016 – August 2020)

Software Testing Training
Qspiders, Rajajinagar, Bangalore – Manual and Automation Testing (November 2020 – March 2021)

Certifications

- **SQL Developer** – Udemy

Technical Skills

• Testing Methodologies: Manual Testing, API Testing, Regression Testing, UAT, Smoke Testing, Black Box Testing, White Box Testing

• Defect Tracking Tools: JIRA, HP ALM

• Languages: Java

• Databases: MySQL, SQL

• API Testing Tools: Postman

• Other Skills: Test Planning and Design, Defect Management, Communication Skills, Problem Solving, Team Collaboration

---

Key Achievements

• Identified critical defects in multiple projects, ensuring early resolution and minimal post-release issues.

• Received recognition from clients for precise defect documentation and efficient management, resulting in enhanced project outcomes.

• Automated 30% of manual regression test cases using Selenium, reducing testing time by 25%.

Additional Information

- **Availability**: Immediate
- **Location Preference**: Open to relocation and remote opportunities.
