CORE COMPETENCIES

- Scalable Application Design
- Cloud-Based Solutions
- Agile Development Methodologies
- User Experience Optimization
- Software Development Security Protocols
- Performance Tuning Techniques
- Cross-Platform Mobile Development
- Native iOS App Development
- React Development
- Team Collaboration & Leadership
- Microservices Architecture
- Event-Driven Development
- API Development & Integration
- CI/CD Migration & Setup
- Software Development Life Cycle (SDLC)

TECHNICAL SKILLS

- Microservices
- Spring Boot
- Spring Core
- Spring REST
- MongoDB
- REST API
- Hibernate
- Git
- Kafka
- Jenkins
- Maven
- Tomcat
- Elastic Search (ELK)
- iOS Native
- Flutter
- Firebase
- XCode Cloud

Deepak Sharma

Senior Software Developer

PROFILE SUMMARY

- **Accomplishment-driven Software Developer** with wealth of experience in delivering scalable, high-performance applications across **Java (Spring Boot, Microservices)**, **Flutter**, **iOS Native**, and **React.js**; skilled in both back-end systems and cross-platform mobile/web development, bringing holistic full-stack value to Product Teams.
- Currently at **Carelon Global Solutions** as **Senior Software Developer**, working on back-end modules for healthcare analytics, guiding small pods, contributing to system architecture decisions & improving deployment workflow.
- Proficient in designing **event-driven microservices**, building robust **REST APIs**, and integrating **Kafka-based messaging systems**; key contributor to enterprise-grade platform enhancements, including the migration of **Jenkins to Tekton**, and auth transition from **SiteMinder to Okta** for secure and streamlined access management.
- Rich experience in leading back-end development in large-scale projects such as **Opportunity Analysis (O.A.)**, focused on real-time healthcare pricing insights and SDOH segmentation; expertise in guiding junior developers and showcasing strong leadership within **Agile environments**.
- Showcased cross-functional capability through delivering features using **React.js**, and mobile platforms (**Flutter/iOS**), including real-time messaging (**WebSocket**), user-based feeds, and seamless in-app payment flows; played an active role in architecting and integrating front-end-to-back-end systems.
- Strong command of modern development tooling, including **MongoDB**, **Redis**, **Git**, **Maven**, **Jenkins**, **Tekton**, **ELK Stack**, **Tomcat**, **Firebase**, and **XCode Cloud**, ensuring clean, performant, and secure delivery pipelines.

WORK EXPERIENCE

May'23 – Present | Senior Software Developer | Carelon Global Solutions, Gurugram

Project: Opportunity Analysis
Tech Stack: Java, Spring Boot, Jenkins, MySQL, Eureka, Kafka

Key Result Areas:
- Leading the Opportunity Analysis project to deliver real-time health insurance analytics for tracking expenditure and pricing trends.
- Collaborating with cross-functional teams to design and implement scalable, maintainable microservices.
- Mentoring a team of 2-3 developers to ensure code quality and adherence to best practices.
- Administering integration of technologies like Kafka and MongoDB for efficient data flow and storage.
- Conducting code reviews and establishing feedback loops to enhance code quality and team performance.
- Driving the migration of legacy systems to modern architectures with minimal operational disruption.

Highlights:
- Managed the integration of microservices into existing applications, ensuring seamless communication and data exchange.
- Developed features to categorize health insurance data, with emphasis on oncology, demographics, SDOH (Social Determinants of Health), and clinical drivers to enhance analytical capabilities.
- Migrated from JDBC to JPA ORM, enhancing code maintainability and minimizing boilerplate throughout the application.
- Supported the implementation of software development best practices, including code reviews and Agile methodologies.
- Engaged in troubleshooting and debugging to resolve application issues and improve user experience.

Jul'22 – May'23 | Software Developer | Collabera, Remote

Project: TataNeu
Tech Stack: Java, CloudWatch, MongoDB, Resilience4j, RateLimiter, Spring Boot

AWARDS & ACHIEVEMENTS

- Recognized twice with "Employee of the Month" Awards at Quokka Labs for excellence in code quality and work efficiency.
- Received the **"Employee of the Month"** Award at Carelon Global Solutions for performance and efficiency.
- **3 Times** University Rank Holder.

ACADEMIC ACHIEVEMENT

- **3 Times** University Rank Holder.

EDUCATION

B.Tech. in Computer Science
NGF College of Engineering & Technology
2019 | 81%

Key Result Areas:

- Contributed to the TataNue project, focusing on UPI transactions, including money transfers and requests.
- Led the categorization and optimization of the homepage for improved user experience.
- Managed the transition of TataNue to a microservices architecture, leveraging Eureka for service discovery and Feign Client to enhance API call efficiency.

Highlights:

- Improved system scalability and performance through architectural enhancements, ensuring better resource management and faster response times.
- Enhanced user experience and operational efficiency by optimizing key processes and refining interface structures, leading to a more streamlined platform.

Mar'19 – Aug'22 | Software Developer | Quokka Labs, Noida

Tech Stack: Java, Spring Boot, MongoDB, iOS Native, Flutter, Resilience4j

Project: ESEO
Highlights:

- Developed a location-based coach discovery system, integrating user reviews and ratings to facilitate seamless coach evaluation.
- Implemented real-time messaging functionality between users and support agents, optimizing scalability through persistent WebSocket connections.
- Integrated in-app purchases, streamlining navigation and ensuring secure payment processing.

Project: Seattle | Portland Dating App
Highlights:

- Designed and implemented a location-based user discovery system, enabling matches based on user preferences.
- Built real-time messaging capabilities between users and support agents, optimizing scalability through persistent WebSocket connections.
- Integrated seamless in-app purchase functionality, enhancing navigation and ensuring secure payment transactions.

Project: Talent Quest
Highlights:

- Led the implementation of tipping, payment processing, and real-time chat features using WebSocket connections to improve user experience.
- Developed and refined homepage feed algorithms to deliver tailored, dynamic suggestions, boosting user engagement.
