PROFESSIONAL SUMMARY

A dedicated professional with 3 years 3 months of IT experience in DevOps, AWS Cloud, and Azure Cloud skilled in using CI/CD tools such as GIT, JENKINS, ANSIBLE, DOCKER, and various AWS Cloud Services. I am passionate about contributing my technical expertise to support organizational growth while continuously enhancing my knowledge to keep up with the latest technologies.

I am committed to delivering high-quality results with a strong sense of loyalty, dedication, and professionalism. My goal is to embrace challenges, promote innovation, and create a positive and rewarding work environment.

PROFESSIONAL SYNOPSIS

- 3 years and 3 months of experience in DevOps and AWS Cloud as a DevOps Engineer.
- Strong knowledge in AWS services such as EC2, VPC, S3, IAM, CloudWatch, CloudTrail, SNS
- Strong knowledge in Azure services such as VMs, VNet, Azure Blob Storage, Azure AD,RBAC, Azure Monitor, Azure Activity Log, Azure Notification Hubs
- Good Experience with Jenkins for automating build, test, and deployment
- Good Knowledge of Maven for automating builds and dependency management in Java projects.
- Good Knowledge of Shell Scripting and Jenkins Declarative Pipeline (Groovy) for automation, along with Ansible for infrastructure configuration and environment management.
- Good Knowledge of Docker for containerizing applications and managing Mult container environments using Docker Compose.
- Self-motivated, proactive, and a quick learner of new concepts and technologies.
- Supported various environments such as DEV, QA, UAT, and PRE-PROD.
- Implemented tools and processes to improve delivery to customers.
- Having very good experience in the FinTech domain.
- Good understanding of the Software Development Lifecycle (SDLC) and Agile methodologies.
- Worked in Agile methodology and participated in scrum meetings.
- Integrate Kubernetes into CI/CD workflows.
- Troubleshoot issues related to Kubernetes deployments.
- Manage and orchestrate containerized applications using Kubernetes.
- Monitor and scale applications within Kubernetes clusters.
- Use Terraform to define and provision infrastructure.
- Automate the deployment and scaling of infrastructure components.

TECHNICAL COMPETENCIES

- Monitoring: CloudWatch, CloudTrail, SNS,Azure Monitor,Azure Activity Log,Azure Notification Hubs
- Servers: Apache Tomcat 8
- CI/CD Tools: Jenkins.
- SCM: Git, GitHub.
- Build Tools: Maven.
- Containerization Tools: Docker.
- Configuration Management Tools: Ansible.
- Operating Systems: Linux (RHEL 7), Linux(Ubuntu) .
- Database Services: MySQL (RDS).
- Scripting Languages: Shell Scripting, Jenkins Declarative Pipeline (Groovy), Yaml.
- AWS Cloud Services: EC2, VPC, S3, IAM, CloudWatch, CloudTrail, SNS.
- Kubernetes (K8s): Deployments, Services, Ingress, ConfigMaps, Helm.
- Ticket Management Tool: Jira, Manage Engine, Dev-Rev

PROFESSIONAL WORK EXPERIENCE

Working as a Senior Associate at Products support in Lentra.ai Pvt Ltd. From Aug 2022 To till

---

EDUCATION

 Bachelor of Engineering (**BE**) from Babasaheb Ambedkar Marathwada University (BAMU), Aurangabad

Company Projects

Client : HDFC Bank,IDFC FIRST Bank,Multitenanet

Project Name : GoNoGo, Multibureau , BRE , Go trust , Gogetr , TransferX, CYOR

Company Name : Lentra AI
