PROFESSIONAL SUMMARY:

Cloud/DevOps Engineer with 4+ years of hands-on experience building secure, scalable infrastructure across **AWS, Azure and GCP Cloud**. Proven track record of:

✔ Reducing deployment times by 70%,

✔ Improving uptime to 99.9% in high-stakes Health-care environments,

✔ And cutting cloud costs by 25%.

Skilled in **Kubernetes**, **CI/CD automation**, **IaC**, and **monitoring solution**s. Passionate about cloud-native security, **developer productivity**, and **resilient infrastructure design**. Adept at cross-functional **collaboration**, **technical documentation**, and **mentoring junior engineers**.

TECHNICAL SKILLS

- **Cloud Platforms:** Multi-Cloud (AWS, Azure, GCP), AWS (EC2, ECR, S3, EKS, ECS, Route53, CloudWatch), Azure (AKS, Blob, Monitor), GCP (GKE, VPC, Stackdriver)
- **Infrastructure as Code & Automation:** Terraform, Ansible, Helm, Jenkins (Declarative Pipelines), GitHub Actions, CloudFormation (basic), ARM Templates
- **Containerization & Orchestration:** Docker (multi-stage builds, image hardening), Kubernetes (EKS, AKS, GKE), Helm, Ingress Controllers, RBAC, Network Policies, Autoscaling, Service Mesh (Istio basic)
- **CI/CD & DevSecOps:** Jenkins, GitHub Actions, JFrog Artifactory, SonarQube, Trivy, Snyk, Code Scanning & Artifact Security, Policy-as-Code (OPA, Terraform Sentinel)
- **Monitoring & Logging:** Prometheus (Federation), Grafana, ELK / EFK Stack, CloudWatch, Azure Monitor, Stackdriver, Alertmanager, Log Aggregation & Tracing
- **Security & Networking:** IAM, VPC, VPN, RBAC, Network Security Best Practices
- **Scripting & Programming:** Bash/Shell, Python (Automation & API Integration), YAML, JSON
- **Collaboration & Tools:** Git, GitHub, Jira, Confluence, Nginx, Linux (RHEL, Ubuntu), Agile/Scrum

WORK EXPERIENCE

Senior DevOps Engineer | Indegene (Pfizer) **September** 2021 - **Present**

Project: Multi-Cloud DevSecOps Platform for Regulated Pharma Applications

- Designed and deployed a **multi-cloud infrastructure** across **AWS, Azure, and GCP**, orchestrating containerized workloads on **EKS, AKS, and GKE** using **Helm** for release automation and **Terraform + Ansible** for IaC provisioning.
- Built **enterprise-grade CI/CD pipelines** using **Jenkins and GitHub Actions**, integrating **Docker image scanning (Trivy, SonarQube)** and automated testing to reduce deployment time by **65%** and improve reliability.
- Implemented **Cloudflare CDN with Anycast DNS** for global load balancing and failover between cloud providers, achieving **99.99% uptime** and improving response latency by **40%**.
- Established **centralized observability** with **Prometheus Federation, Grafana, and ELK**, aggregating metrics and logs across all environments to reduce MTTR by **35%**.
- Enforced **DevSecOps and compliance** using **policy-as-code**, **RBAC hardening**, and **secret management** via **AWS Secrets Manager, Azure Key Vault, and GCP Secret Manager**, ensuring **HIPAA/GxP** adherence.

Technologies used: AWS | Azure | GCP | Kubernetes (EKS, AKS, GKE) | Docker | Terraform | Ansible | Jenkins | GitHub Actions | Helm | Cloudflare CDN | Prometheus | Grafana | ELK | Trivy | SonarQube | Nginx

DevOps Engineer | Maxemos HR Services LLP, Bangalore (Indegene) **March** 2021- **September** 2021

- **Cloud Migration & Infrastructure:** Migrated a monolithic on-prem application to a cloud-based microservices architecture, improving scalability and reducing maintenance overhead.
- **Infrastructure Automation:** Automated cloud provisioning using Terraform and ARM templates to create consistent AWS resources (EC2, ECS, networking).
- **CI/CD & Deployments:** Managed Jenkins CI/CD pipelines and Bitbucket Pipeline integrations for automated builds, tests and blue/green deployments to improve release reliability.
- **Configuration Management & Orchestration:** Used Ansible for automated server setup and configuration; deployed services on Kubernetes using Helm charts for simplified scaling.
- **Monitoring & Incident Reduction:** Implemented Prometheus and Grafana monitoring with Slack/OpsGenie alerts reduced incident response time by ~40% and decreased downtime by ~25 hours/month.
- **Containerization:** Dockerized Python and Node.js apps to ensure environment consistency across dev/stage/prod.

Technologies used: AWS (EC2, ECS, CloudWatch) | Docker | Jenkins | Bitbucket Pipeline | Terraform | Ansible | Kubernetes (Helm) | Prometheus | Grafana | ELK/Kibana

Technical Portfolio & HomeLab Project: rootbysatya.in AI-Powered Multi-Cloud Portfolio (RAG + GitOps)

Deployed a 2-master, 5-node Kubernetes cluster hosting Dockerized RAG (Groq + Qdrant + FastAPI) workloads. Implemented ArgoCD GitOps for automated, version-controlled deployments and Traefik ingress integrated with Authentik SSO for secure authentication. Automated SSL certificate provisioning using Cert-Manager with Let's Encrypt, and configured Prometheus-Grafana monitoring with Cloudflare CDN for global availability, observability, and resilience.

Stack: Kubernetes | ArgoCD | Traefik | Authentik | Cert-Manager (Let's Encrypt) | Docker | Groq | Qdrant | FastAPI | Prometheus | Grafana | Cloudflare

PROFESSIONAL STRENGTH

- **Cross-functional collaboration:** Effectively bridge communication between development, operations, and security teams.
- **Problem solving:** Quickly diagnose and resolve complex infrastructure and deployment issues.
- **Technical documentation:** Create clear, accessible documentation that improves team knowledge sharing.
- **Continuous learning:** Rapidly adopt and implement emerging technologies and best practices.

Certifications & Awards

- AWS Certified Cloud Practitioner
- **(Pursuing) SAA-C03, DOP-C02**

EDUCATION

Bachelor of Technology (Electrical Engineering)
Krupajal Engineering College, Bhubaneswar (**BPUT**) 2012-2016

LANGUAGE SKILLS

English (C2) | Hindi (C2)

HOBBIES

Participating in marathons and endurance events
