Education

Bachelor of Engineering (CSE) |Velammal Engineering College |CHENNAI, TN | **8.71 CGPA** **2021**
12TH | State Board|CSI Boys Higher Secondary School|ERODE, TN|**90.60 AGGREGATE** **2017**
10TH | State Board|CSI Boys Higher Secondary School|ERODE, TN|**97.80 AGGREGATE** **2015**

Work Experience

Software Development Engineer - K4K - Kaar Technologies **July 2021 - Present**

- **Leadership and Project Management**
  - **Led a 12-member development team** automating HR and Operations processes for a 2000+ employee organization, ensuring on-time delivery of scalable and impactful solutions.
  - Acted as the **primary liaison with customers**, gathering requirements, refining product features, and aligning development goals with business objectives.
  - Conducted **monthly project status reviews with the CEO**, showcasing progress and ensuring alignment with strategic priorities.
- **Product Development and Technical Expertise**
  - Designed and delivered a suite of **end-to-end ERP applications**, including:
    Performance Management System (PMS), OKR, Employee Directory, Timesheet & Leave Management, Salary Master, Rewards Management, Compliance Management System, Resource Management, Applicant Tracking System (ATS), and Onboarding System.
  - **Architected scalable databases** using **MongoDB** and **MySQL**, optimized for high performance and seamless data synchronization.
  - Developed intuitive and **responsive frontends with Angular** and implemented **optimized RESTful APIs in Node.js**, resulting in a **25% latency reduction** and improved user experience.
  - Spearheaded **authentication systems** with **role-based access control and token-based mechanisms**, ensuring secure access across multi tenant environments.
  - Created an **ElectronJS-based executable app** integrated with **RFID devices** to automate timesheet processes, boosting task efficiency by **30%**.
  - Automated repetitive processes using **scheduler jobs**, reducing manual intervention and improving operational efficiency by **35%**.
- **Scalable Solutions and Integrations**
  - Delivered a **multi-tenant ERP system**, achieving operational scalability while reducing infrastructure costs.
  - Integrated **Microsoft Graph API** for **Teams meeting scheduling**, automating workflows and reducing coordination overhead by **40%**.
  - Delivered a **access management system** to ensure secure access across system

Technical Skills

- **Programming Languages** Java, Python, JavaScript, TypeScript, C, HTML, CSS, SQL
- **Databases** MongoDB, MySQL
- **Frameworks & Libraries** Angular, Node.js, Express.js, Bootstrap, SpaCy, Electron.js
- **Cloud & DevOps** AWS (Cloud Services), Docker, Git, Bitbucket
- **Developer Tools & APIs** VS Code, Postman, Microsoft Graph
- **Technologies & Concepts** Data Structures & Algorithms (DSA), DBMS, Microservices Architecture, Multitenancy, RESTful APIs, Authentication & Authorization Management, Natural Language Processing

Achievements/Leadership Roles

- **Achieved**: International Speech Competition Winner, Coffee With Java Runner-up (M.I.T 2020), LeetCode - Expert Rating
- **Lead:** Team Lead – HR and Operation department automation
