Experience

Rapyder Cloud Solution — **Bangalore, KA**
Azure DevOps Engineer — *April 2025 – Present*

- Designed and managed CI/CD pipelines using Jenkins and Azure DevOps; collaborated with developers to deliver scalable, fault-tolerant microservices and optimized workflows.
- Provisioned and maintained Azure/AWS infrastructure; deployed monitoring tools (Prometheus, Grafana, ELK, StatusCake, Site24x7) and implemented SLIs, SLOs, and error budgets to embed reliability.
- Automated operations and deployments with Bash/Python; built self-healing workflows and integrated monitoring and alerting to reduce manual effort and enhance resilience.

LMG8 Tech — **Bangalore, KA**
DevOps Engineer — *March 2023 – April 2025*

- Delivered scalable, secure, and cost-optimized cloud solutions on Azure with IaC (Terraform), integrating Cosmos DB, Storage, Key Vault, Redis, Service Bus, Function Apps, Web Apps, APIM, SignalR, DNS, Microsoft 365, Entra ID; ensured high availability, seamless scaling, and secure secrets management.
- Built and maintained CI/CD pipelines, containerized microservices with Docker, AKS, integrated nginx Ingress; managed MySQL users, connection strings, backups, and scaling, reducing errors by 30%.
- Optimized observability stack (Prometheus, Azure Monitor, Grafana, SonarQube); participated in on-call rotations, performing root cause analysis and postmortems to enhance resilience.

Trigate Consulting — **Bangalore, KA**
DevOps Engineer — *June 2022 – Feb 2023*

- Managed AWS Dev/Test/Prod environments (EC2, S3, RDS, Lambda, IAM, VPC), resolved infra issues, implemented monitoring/alerting best practices, handled ServiceNow tickets, and decommissioned servers.
- Stabilized production, automated BAU tasks, administered Linux/Windows servers, maintained CI sheets, improved SOPs, and managed user access/roles.

Microsoft — **Bangalore, KA**
Engineering Intern — *Dec 2021 – June 2022*

- Gained hands-on experience in Azure cloud, security, and GitHub; deployed applications using Static Web Apps, contributing to early adoption of cloud-native practices focused on scalability and reliability.

Skills

Cloud DevOps: AKS, Azure DevOps, Function App, VMSS, ACR, API Gateway, CDN, DNS, Storage, Cosmos DB, Load Balancer, Application Gateway, EKS, EC2, IAM, CloudWatch, Lambda, S3, RDS, Git, GitHub, BitBucket, Terraform, Jenkins, Docker, Kubernetes, Prometheus, Grafana, ELK, Azure Monitor, OpenTelemetry, MySQL, Kafka, Linux, Windows, Python, Bash, PowerShell, SRE practices (SLI/SLO/SLAs, Error Budgets, Incident Mgmt), Ansible, System Design, Leadership (Mentoring, Guidance)

Education

Gandhi Institute for Technological Advancement, BPUT University — **Bhubaneswar**
Bachelor of Technology (**SGPA: 7.8**) — *August 2017 – July 2021*

Project Experience

Retail E-commerce Platform on Azure
Role: Cloud Infrastructure, Azure DevOps Site Reliability Engineer

- Deployed microservices-based platform on Azure using Azure DevOps; containerized APIs with Docker, stored images in ACR, implemented scalable Linux node pools with Helm; integrated Nginx Ingress and Elasticsearch.
- Implemented SSL (Let's Encrypt/GoDaddy), managed DNS in Azure Microsoft 365, secured custom domains with SPF, DKIM, DMARC; improved performance by 35% using Azure Front Door CDN.
- Managed DB/service connection strings SSL in Key Vault, added env variables in CD pipelines, automated Dev infra start/stop; integrated Logic Apps + SharePoint API; enforced CI/CD branching, approvals, NuGet feeds.
- Defined SLIs/SLOs/error budgets; automated monitoring/alerting with Prometheus, Grafana, ELK, OpenTelemetry; developed Python/Bash self-healing scripts.
- Participated in incident management, root cause analysis, postmortems; reserved Prod instances for 3 years and reduced Dev costs by migrating PAYG to CSP.
- **Tech stack:** AKS, Docker, ACR, IAM, Storage (Blob), MySQL, Cosmos DB, Service Bus, Key Vault, Function Apps, Redis, DNS, Azure Security Center, Microsoft 365, Entra ID, Prometheus, Grafana, ELK, OpenTelemetry, Python, Bash.

Logistics Platform on Azure AKS
Role: Site Reliability Engineer / Cloud DevOps Engineer

- Managed 19-microservice logistics platform on Azure AKS with VM Scale Sets, Application Gateway, Load Balancer, and APIM; implemented CI/CD with Jenkins Bitbucket.
- Configured monitoring observability via Prometheus, Grafana, Site24x7; managed Kafka messaging and Redis caching; ensured scalability, reliability, and high availability.
- **Tech stack:** Azure AKS, VM Scale Sets, Application Gateway, Load Balancer, APIM, Kafka, Jenkins, Bitbucket, Prometheus, Grafana, Site24x7, Redis.

Financial Data Management CI/CD Infrastructure
Role: Cloud Infrastructure DevOps Engineer

- Developed and deployed microservices-based project management app on Azure using Azure DevOps; created Function Apps Web Apps, configured app settings, CORS, KeyVault secrets, and custom domains.
- Implemented SignalR and webhook connections; managed APIs in APIM.
- **Tech stack:** Function App, Web App, APIM, MySQL, Storage Account, Key Vault, Redis, SignalR, Service Bus.

Migrated PAYGO to CSP Subscription
Role: Cloud Infrastructure Engineer

- Migrated all PAYGO resources (Web App, App Service Plan, Function App, Storage Account, MySQL data, Service Bus, Redis, KeyVault, SignalR) to CSP for dev prod; configured custom domain and Azure DevOps service connection via Managed Identity.
- **Tech stack:** Web App, App Service Plan, Function App, Storage Account, MySQL, Service Bus, Redis, KeyVault, SignalR, Azure DevOps, Managed Identity.
