SAKSHI SINGH

DATA SCIENTIST | Transactions & Payment | VISA

Phone: +91-9835960183
Bangalore, India
Email: sakshisingh.du.or.21@gmail.com

A **motivated and result driven Data Scientist** with **4 years of experience** in **Data Science, Data Analytics, Business Analytics, Data Integration, Data Engineering, Data Visualization, ETL, Automation, Financial Modelling, Financial sheet, and Client Interaction**; targeting to collaborate with a reputed and dynamic firm.

Profile Summary

- Worked proactively in streamlining and automated report generation using **SQL, Tableau,Python,PySpark and Excel Work**
- Created various Automation using **Python(scikit-learn, pandas, numpy, and matplotlib) ,PySpark**
- **Created & Maintained Tableau Dashboard**
- **Worked on Anet Chatbot data prep and dashboard creation**
- **Worked on traditional ML(logistic, xgboost)**
- **Worked on Mistral AI model to predict cases summary and description**
- **Completed course on LLM and Agentic AI**
- Experience in BigData, Digital Services, Transaction Data, Marketing data
- Created, Managed JOBS in SSMS having SSIS Packages
- Take **ownership** and work independently on projects with complexity, ensuring **high level of service quality**
- Skilled in providing **data-driven, action-oriented solutions to challenging business problems**
- An effective communicator and team leader with strong problem-solving skills and analytical skills

Core Competencies

Payment Domain	**Business Consulting**	**Data Visualization**
Ownership	**Stakeholder Management**	**Problem Solving**

IT Skills

Python	**SQL Sever/Hive**	**ETL (SSIS)**	**Automation**
PySpark	**BigData**	**Tableau**	**AI/ML**

Accomplishments and other responsibilities

- **CCE Coordinator**: Organize & look after events held for data analytics members
- **Transportation SPOC for NCR office**, collect employee feedback to improve overall experience
- Received **Rising Star, Spot Awards & Value Achiever**

Organizational Experience

VISA Data Scientist – Client Services | July'24 - Present

Key Result Areas:

- Design Developed and maintained various PySpark related project. Migrated data from SQL Server to Hive/Hadoop using PySpark
- Prepared Data for project Cases and Merchants along with Co-Pilot
- Prepared Data to apply Row Level Security on Varius Tableau related work
- Maintained, Monitored SSIS package (ETL Tool)
- Worked on prediction project duration using XG Boost
- **Worked on Mistral AI model to predict cases summary and description**

The Smart Cube Sr. Data Engineer | (Sep'23 – June'24)

Key Result Areas:

- Contributed to **Johnson & Johnson** Sustainability Project
- Created, maintained, and managed **Tableau Dashboards**
- **Input Amazon Redshift Data in Alteryx Designer** and created workflows as per Johnson & Johnson client Requirement

- **Configured Tableau Server in Python** which saved the cost to client by 20% of the budget
- Hands on experience in **Python** library such as Pandas, Numpy, Matplotlib and plotly
- Documented SQL Queries as Per Client Requirement

The Smart Cube Sr. Data Analyst | (July'21 – August'24)

Key Result Areas:

- Designed, developed, tested and maintained **Tableau Dashboard(s)** based on Johnson & Johnson client requirement
- Created an automation in Python that can take Screenshots of various Dashboards in Tableau Server and the automated PPT to the desired email address via Alteryx and thus increased the efficiency of Client and reduced delivery time
- **Data Preparation and EDA in Python** by configuring Amazon Redshift Data
- Contributed to **PepsiCo** Dataroma Maintenance and Created Creative Worn Out Dashboard in **Power BI**
- **Worked on Dataroma, Python and SQL for Marketing Campaign Data**

Projects

Tableau PPT (Dec'22 – June'23)
Technologies Used: Tableau, Alteryx Server, Python, Amazon Red shift
Description: Created Chained Application in Alteryx Server by integrating Python in the Server and using the Python script to connect it with five Tableau Dashboards and thus creating more than 50 pages PPT and mailing to the user. It also has nine relative filters which are applied from the Alteryx Application and it gets fed into python script and thus we filter all the Tableau Dashboards with it and attach the screenshot in PPT and send it to the user.

Enterprise Dashboard (Oct'21 – June'2023)
Technologies Used: Tableau, SQL Server, Amazon Red Shift
Description: It is the target-based dashboard. The metrics that are missing the target are in Red colour, the one who is achieving is in green and other are in yellow.

Work Plan Dashboard (Oct'21 – June'2023)
Technologies Used: Tableau, SQL Server, Amazon Red Shift
Description: Built this Dashboard as per Environmental Health Safety and Sustainability to give the insight to all the health and welfare based on different Site labels.

Event Management Dashboard (Oct'21 – June'2023)
Technologies Used: Tableau, SQL Server, Amazon Red Shift
Description: Helped Client to analyze the growth and behavior of the Environmental Health and Safety Program through dashboards and visualization. Created & Analyzed 8 Tabs and consolidated in a single Tableau Workbook.

Route Optimization (POC): (Jun'23 - July'2023)
Technologies Used: Python Ortools
Description: Shortes Route Optimization

Dataroma Support and Maintenance (Oct'23 – June'24)
Technologies Used: SQL, Dataroma, Python, Databricks
Description: Helping Client to Analyze marketing campaign Data growth and worn-out behaviour through visualization on Dataroma and error automation in Python

Client Services Data and AI (July'24-till)
Technolgies Used: SSMS, SSIS, Pyspark, Tableau, Hadoop, Hive, Tabpy, AI Automation
Description: Managed Client Services Transaction Data, auth Data and migrated various Sql proc and SSIS Packages data to Hadoop/Hive using PySpark.
Dashboards : ANET Dashboard, SLA dashboard based om various Regions

Academic Details

- **Master in Science** (Operation Research) | University of Delhi, Delhi
- **Bachelor of Science** (Mathematics (Hons.)) | University of Delhi, Delhi
