WORK EXPERIENCE

HDB Financial Services **March 2025 – February 2026** **Senior Test Engineer**

Project Title	Digital Integration / Fintech Projects
Domain	NBFC
Testing Type	API, Postman.
Team Strength	10

Project Description:

- Modern Loan Origination System (**LOS**) platforms require more than just static, rule-based workflows; they must function as integrated ecosystems. These systems must offer the extensibility needed to support a broad spectrum of **secured loans** and **unsecured loans**, including **personal loan, digital product loan**, and **vehicle loans**
- Digital project, which is API integration with other online sources (like Amazon, Pinelabs, Yubi, Finbox, Suvidha).
- This project is based on the loan origin system **(LOS)** for the existing customer (**ETB**) & new customer (**NTB**).
- This project is developed by HDB to provide instant loan to their existing customers.
- API is having validations for customers' requests & details for their loan process.

Responsibilities:

- Gathered requirements from product owner and delivered to development team.
- Preparing BRD based on the business requirements.
- Organized and closed the project agenda on scrum calls on daily basis
- Ensuring smooth coordination between teams.
- Helping the team resolve technical and non-technical issues.
- Regularly updating managers, business team and product owners on project progress.
- Understanding project requirements and ensuring the team delivers what is needed.
