Cloud Certified Professional

PROFESSIONAL SUMMARY

Dedicated and results-driven DevOps professional with 5 years of hands-on experience in optimizing and streamlining IT operations. Seeking a challenging role to leverage expertise in DevOps technologies and cloud infrastructure to contribute to a dynamic team.

PROFESSIONAL PROFILE

Certifications	
Microsoft Azure	Azure Fundamentals certification - AZ-900 Certified
Google	Google Cloud Certified - Cloud Digital Leader
AWS	AWS Certified Cloud Practitioner
Forage - Accenture	Developer and Technology Job Simulation - Accenture

Technical Skills	
Cloud	Microsoft Azure, AWS
Infrastructure as Code & Automation	Terraform, Bicep, Ansible, ARM Templates, Azure CLI, PowerShell DSC
CI/CD	Azure DevOps, Argo CD, Jenkins, GitHub Actions
Containers & Orchestration	Docker, Kubernetes (AKS), Helm
Scripting & Programming	Python, Bash, PowerShell
Monitoring & Observability	Azure Monitor, Application Insights, Log Analytics, Prometheus, Grafana, Elastic Stack
Security & Compliance	Key Vault, RBAC, AAD, NSG, WAF, DevSecOps scans, HIPAA/SOC2 exposure
Networking	VNet Peering, VPN, Private Endpoints, Front Door, App Gateway
Databases & Messaging	Azure SQL, Cosmos DB, Service Bus, Event Hubs
Version Control	Git, GitHub, GitLab, Azure Repos
Operating Systems	Linux, Windows
Administration & Collaboration	Jira (task tracking, sprint planning), Confluence/Wiki (documentation), Reporting

PROFESSIONAL SUMMARY

HEALTHEDGE, BANGALORE - DEVOPS ENGINEER

Source Project

MAY 2024 – PRESENT

- Build and maintain Azure CI/CD pipelines for multi-tier microservices using Azure DevOps and Argo CD, which helps developers release updates faster.
- Automate provisioning of AKS clusters, Key Vault, App Gateways, Front Door, VNets, subnets, and private endpoints using Terraform and Bicep, following Azure Policy and RBAC rules.
- Integrate Azure Service Bus and Event Hubs so microservices can talk to each other asynchronously and track real-time telemetry, collaborating closely with development teams to ensure correct integration.
- Secure Kubernetes deployments with Key Vault Secrets, Managed Identities, and AAD integration; deploy apps with Helm charts for configuration management.
- Write Python scripts and Azure Functions to process incoming data and automatically clean old/stale

files, saving storage costs.

- Set up monitoring dashboards with Azure Monitor, App Insights, Log Analytics, Prometheus, and Grafana, and create alerts for critical issues, coordinating with SRE and Ops teams for data accuracy and alert tuning.
- Support disaster recovery for Azure SQL and Cosmos DB using ASR and Geo-replication, performing occasional failover drills in collaboration with DBAs and infrastructure teams to validate readiness.
- Maintain Jenkins agents on VM Scale Sets to handle high build loads; run static code analysis and DevSecOps scans (SonarQube, Trivy).
- Automate Windows/Linux server patching and configuration using Ansible and PowerShell DSC, covering around 100 servers, working alongside sysadmins to schedule and validate changes.
- Track work in Jira, document in Confluence/Wiki, and generate project reports for leadership.
- Collaborate with QA and SRE teams to troubleshoot issues and ensure smooth deployments, providing technical inputs to resolve environment-specific problems.

KYNDRYL, BANGALORE - DEVOPS ENGINEER

Telstra Project | Jan 2021 – May 2024

- Managed and improved Jenkins and Azure DevOps CI/CD pipelines integrated with Git and Maven, helping developers release faster with fewer failures.
- Automated provisioning of VMs, VNets, subnets, and NSGs using Terraform, Bash, and Azure CLI, reducing manual work by ~70% and coordinating with infra teams for network approvals.
- Deployed and maintained Azure infrastructure including Compute, Networking, Storage, App Services, and SQL databases, collaborating with infrastructure and networking teams for production deployments.
- Configured Application Gateway and Front Door for load balancing and secure routing of client requests.
- Set up monitoring dashboards with Azure Monitor, Application Insights, and Elastic Stack to detect and fix issues quickly, working with SRE teams to interpret logs and optimize alerts.
- Helped containerize legacy apps using Docker and migrate them to AKS clusters, coordinating closely with development teams to test deployments.
- Implemented code review and approval policies via Azure Repos and GitHub Actions for secure CI/CD.
- Wrote Python scripts to automate deployment checks, artifact versioning, and track build performance.
- Participated in release planning, sprint demos, and incident reviews following Agile methodology, contributing inputs to improve overall process and reliability.

ACADEMIC PROFILE

- Bachelor of Engineering- Dept, of ISE, NMIT – Bengaluru (2016-2020)
- 10th Std – Kendriya Vidyalaya AFS Yelahanka – Bengaluru (2012-2014)
- 12th Std – Kendriya Vidyalaya AFS Yelahanka – Bengaluru (2014-2016)

DECLARATION

I hereby declare that the above information is authentic and true to the best of my knowledge and conscience.

Thank You!
